MID-TERM ADDRESS

OF

Hon. Edward F. Harrington

MAYOR OF NEW BEDFORD
MASSACHUSETTS

TO

City Council

FEBRUARY 12, 1965

BRADBURY-WARING, INC.
New Bedford, Mass.

MID-TERM ADDRESS
OF
HON. EDWARD F. HARRINGTON
TO
CITY COUNCIL
FEBRUARY 12, 1965

MR. PRESIDENT, GENTLEMEN OF THE COUNCIL:

This year, 1965, I have chosen to break a long standing and time honored tradition of delivering the Mid-Term Address of the Mayor of the City of New Bedford in the City Council Chambers. My primary reason for electing to take this course of action is that a Mayor's Mid-Term Address is essentially concerned with reporting present conditions in the city to its populous, and charting the course to be followed in the years ahead. It is my opinion that so long as this address is oriented to the future, it is only fitting that it should be delivered to those of you who are assembled here today, and who represent so much of the future of our city of New Bedford.

New Bedford is the fourth largest city in this Commonwealth, and is an extremely complex and extraordinarily intricate business operation to run. The problems of conducting the "people's business", calls for a willingness to accept the responsibilities of leadership, and at all times to take those courses of action which provide the greatest benefit for the city and for its people. These courses of action may not always in the first instance be popular, but must always be followed through if the best interests of the greatest number of our people are to be properly served. I have always endeavored,

while serving as Mayor to accept the responsibilities of leadership entrusted to me by the electorate, and to implement programs which I felt were in the best interest of New Bedford and its future. I shall continue at all times to administer wisely and justly, and to seek those courses best designed to solve, not only our present problems, but to chart our future.

You are certainly aware that sitting immediately behind me are the members of the New Bedford City Council. They are the legislative branch of our city. It is their sworn duty to serve as a check and balance upon the administrative function of the City of New Bedford with the Mayor as its chief executive officer. It is conversely the function of a Mayor to serve as a check rein upon the actions of the City Council. It should not be surprising, therefore, that from this system of checks and balances there should arise situations where the City Council and the Mayor find themselves with serious differences of opinion and realistic disputes as to the best way of producing the greatest good for the city. The differences which unquestionably do, and will from time to time arise, should not blind anyone to the common purpose which we all serve — the betterment of the City of New Bedford.

The differences between our actions and our philosophies serve only to emphasize the ingenious balance which is the Hallmark of the American form of government. It is a system of government in which different opinions are tested in the crucible which we call the legislative process, and out of which hopefully comes a compound which represents the best courses of action in any given situation. If the course of government here in New Bedford is not always smooth, be ever mindful that we are now grappling with great ideas, broad programs, and far-reaching conclusions which will guide your destinies, that of your parents, and that of your children for generations to come.

During the three years that I have served as Mayor, the New Bedford City Council has adopted every single piece of major legislation without exception, which I have sent to

them. This, I believe, is an unparalleled record of cooperation between the administrative and legislative arms of any government. I am certain that in the vital days ahead, during which I propose to introduce many new programs with far-reaching effects, the members of this City Council will be as cooperative and as dedicated to civic purpose as they have shown themselves to be in the past.

In January of 1962 when I took office, there was only \$68,404.66 in free cash to enable me to meet the ordinary expenses of the running of the "people's business". In January of 1965, through prudent administration and effective new programs of tax collection, there is available for these same purposes \$1,095,310.35, which is an increase of \$1,026,905.69. On December 31 of 1961, the day before I took office, the City of New Bedford had only \$404,827.81 in revenue cash on hand. On December 31 of 1964, the City of New Bedford had on hand as revenue cash \$2,320,516.76, which is an increase of \$1,915,688.95. The comparisons are startling and striking. They indicate the difference between running a municipality as an enlightened business, and simply conducting the affairs of our city without any regard for our taxpayers or for our future.

I am proud to say today, that the financial affairs of my city and your city are in the best condition that they have been in the last 12 years. I have called a special meeting of the New Bedford City Council this morning to request a transfer of \$800,000.00 from the Excess and Deficiency Account to be applied to the control of taxes. This money was contributed to our municipality by our taxpayers, and it is my opinion that this money should be used to assist them in the keeping of the tax rate within reasonable limits for 1965. It is essential also that some money be retained in the Excess and Deficiency Account to meet any unusual occurrences or unexpected expenses which may confront us during 1965. Provision for these possibilities has already been made. Maintenance of a sound domestic economy and a relatively stable tax rate, are crucial to continued growth.

I ask the members of the City Council to return to the City Council Chambers, following this address, and vote to show their continued faith in the taxpayers of our city through the adoption of the order to transfer \$800,000.00 from Excess and Deficiency to control of taxes which I have submitted today. This is the reward to the city of three years of prudent financial management, coupled with progressive reform.

I should like to review with you now some of the decisions which have been reached during the past year, some of the courses upon which we have embarked, and some of the accomplishments which have been recorded.

In 1965, actual physical construction will begin in the South Terminal area, which will bring to our city a 1700 foot pier capable of providing needed docking space for our fishing vessels, and adequate pier facilities for ocean-going cargo vessels. There will also be adequate space adjacent thereto for the relocation of substantial industry capable of providing good paying jobs for our people. No longer will our expanding forward looking 20th century fishing industry be forced to operate in 19th century facilities.

We are presently embarking upon a substantial development program north of New Bedford-Fairhaven Bridge, and I confidently expect that during 1965 additional plants will locate in the area, paving the way for substantial development, much of it through the utilization of private rather than public funds.

The New Bedford Harbor Protection Barrier will be completed in 1965.

Plans are nearing completion for a program to end pollution in the Acushnet River.

Contracts have been let for the construction of a Soda Ash Treatment Plant at our municipal reservoir. This is the first major step to improve the quality of New Bedford's water in many years.

Our Urban Renewal program will move into actual construction stages in 1965.

New Bedford has started two of the very first programs under the Economic Opportunity Act of 1964 in the entire United States.

Routes 195 and 140 will begin to render benefits to our city during this year.

Construction will be started on a segment of Route 140 to make it a double-barreled and relatively safe highway to Boston.

The Commonwealth of Massachusetts will commit itself during 1965 to a program to improve our East Beach on the Acushnet River, and to correct previous construction defects therein existent. This program will be paid for in part with local funds.

We are presently in the process of planning a high rise low rent apartment facility in the redevelopment area. Preliminary discussions and planning have already been undertaken with the New Bedford Housing Authority, and the executive director of the New Bedford Redevelopment Authority. This particular type of development is as yet unknown in this section of the State, but will be a dynamic improvement in the renewal area.

Plans are being drawn at the present time to provide sewerage for those areas in the north end, which have so long needed this service. Plans are also being completed for a Sewerage Treatment Plant, which will soon become urgently necessary to protect the health and well-being of our people.

Plans are also being drawn for a Swimming Pool in Brooklawn Park to provide for the Recreational needs of the people of the North End of our city.

We realize that one of the critical problems that has beset our city for a number of years is that so many of our people

who desire a decent paying job have been unable to find one. Just a little over 10 years ago, only 88.6 percent of those people in our city who were able to work and actively sought work, were able to obtain employment. This resulted in an unemployment rate of 11.4 percent of our work force. As late as 1958 and even in 1960, the unemployment rate hovered between 9 and 11½ percent of our population. Since 1962, the average unemployment rate in our city has not been greater than 8 percent. Last year, our unemployment rate dropped to 7.8 percent.

I am happy to report that the picture is brightening with each and every day. During the past fiscal year, there were 25 percent less claims for unemployment compensation benefits in the City of New Bedford than during the prior year.

Through a constant diversification and a broadening of our industrial base, we have created a situation whereby New Bedford shall be forever insulated against death blows which inflicted upon a municipal economy when a major employer closes its door.

Today it gives me a great deal of pleasure to announce that Plastic Manufacturing, Inc. has moved to our city, is hiring our workers, and is actually ready to begin production in a vacant building at the New Bedford Industrial Park. This firm will manufacture sail boards and sail boats, and will initially employ about 50 people. Its growth prospects are excellent, and we envision added employment and increased payrolls in the years to come. We welcome this vibrant new manufacturer to our Industrial community.

I can say, without any fear of contradiction, that 1965 will be the best year in the last 10 years for the location within our community of new industries offering substantial numbers of well paying employment opportunities for our varied and efficient work force.

We have succeeded in becoming a leader throughout the United States in acquiring Federal cooperation and assistance

in many and varied programs. We were one of the first cities to receive substantial Federal Grants under the Economic Opportunity Act of 1964, and were selected as that city which has done the most to pull itself up by its own bootstraps, by the Area Redevelopment Administration.

No longer does the City of New Bedford look longingly to other cities for direction; no more do the people of New Bedford grudgingly admire the successes of other cities — we have now become a city to which others look, because we have become a city which is first in many things, and a leader in others. This is the position our city deserves and we must be absolutely committed to a continuation of our efforts in these directions until deficiencies in our industrial economy and other areas have been overcome.

While we have been engaged in the head-long pursuit of material well-being, and the restoration of our industrial economy, and while we have recognized that the industrial economy of this city is our lifeblood, we have not ignored the preservation and development of our cultural heritage. We feel that preparation for the future and pride in the past are not only compatible, but inextricably intertwined. Therefore, we work simultaneously to preserve our heritage and develop our future. We will preserve, through urban renewal, the historic past of our city so nobly displayed in our commercial center.

While the main thrust of my administration and of New Bedford's direction over the past three years has been directed to the restoration of our city's economy, it has not ignored the education of our children.

It is my belief that every young person in New Bedford, as well as in every city in this great land, has a right to the best possible education which the people of this city can afford. While much has been done in this direction, I am acutely aware that much more remains to be done. A full comprehensive program designed to give each child the best possible

education could not be accomplished until a solid and lasting economic and commercial base for the City of New Bedford could be reconstructed.

It is because I am now firmly convinced that such a firm and lasting economic base has been established that I intend to direct every available energy, every available mind, and every available scholar toward fulfilling our obligation to the children of this city.

The next few weeks and months will determine what part the Commonwealth of Massachusetts will play in the efforts of our cities and towns to meet their obligations in these important matters. I fully realize that we have not solved the problem of meeting the needs of that student who, for one reason or another, does not profit substantially from matriculation in our junior and senior high schools. Neither have we solved the problem of that young boy or girl refused admission to our New Bedford Vocational High School, simply due to the lack of physical space, who cannot acquire a vocational skill any place else within the community.

In 1965, we must make a beginning in the solution of these grave problems if our children are to be the leaders we expect them to be. I have many thoughts along these lines, and will offer effective solutions during this year.

We are presently exploring a terminal vocational educational program. A program to assist those who would otherwise be nearly unemployable in our society; a program to teach some of our people to become commercial fishermen, and additional MDTA and ARA education programs, will be inaugurated within a few months.

The most dramatic developments in our section of the Commonwealth in the last century has been the planning for a fully comprehensive 4-year college located in Dartmouth, just beyond our city limits. There is an extremely objective relationship between our ability to elevate our economic, industrial and cultural levels, and the location of a top-grade

educational institution in our midst. It is imperative that a fully comprehensive college offering both technology and liberal arts degrees be established in accordance with the time schedules originally set up for the development of SMTI.

Any effort exerted by us on an individual or collective basis to support SMTI will necessarily be small in proportion to the tremendous benefits which our people in our area will gain from the early construction of a fine university, offering all of the educational opportunities we so badly need.

There is, however, one accomplishment which transcends all others in importance to our people at this stage in our history — and that is the resurgence of pride in the hearts of our people in their city and its future. For many reasons, we stand here in the early days of 1965 secure in the knowledge that great strides forward have, in fact, been made, and are continuing to be made. New Bedford will be restored to that magic period in its history when our city was a beacon of economic, social and cultural well-being for all other cities in this great land to follow. We have seen the beginnings of this resurgence and can look to the future with realistic hope.

It is my hope that you now understand my reason for coming here and departing from tradition. I wish to impress upon you that the future of this city is being molded in a large part by those of us who are entrusted with the administration of your city government, and that our foremost goal is the creation of a city, which through the sheer force of its magnetism as portrayed in its social, cultural and economic condition will cause you to view it with pride, assist it with all of your energies and abilities, love it with all of your hearts, labor to aid its dynamic growth, and hopefully build your futures in its midst.

18th Annual Report

of the

AIRPORT MANAGER

of the

NEW BEDFORD MUNICIPAL AIRPORT

For the Year Ending December 31, 1964

BRADBURY-WARING, INC.
New Bedford, Mass.
1965

December 31, 1964

To the Honorable Edward F. Harrington, Mayor, and the
Gentlemen of the City Council of the City of New Bedford.

Gentlemen:

The Annual Report of the Airport Manager for the year 1964 is most encouraging.

High standards of safety have again rewarded the conscientious and dedicated work of our entire Airport Staff.

Our program for leasing airport property has been greatly encouraged by the O'Hara lease mentioned in the Annual Report. This lease will pay us an average of \$7,200.00 per year for a base period of 35 years, for a total of over \$250,000.00 and all this for a piece of land which had remained dormant for over 10 years.

In addition, the Commission has begun with projected plans for the development of an Air Industrial Park which we have every hope of implementing in the near future. This healthy trend promises to bring the realization of our program which is designed to make the operation of the Airport self-sufficient instead of a drain on the tax-payers of New Bedford.

The Commissioners regret the fact that our efforts to improve our Commercial Airline Service have not yet been rewarding. The reasons for this are not in our control because greater New Bedford and neighboring cities have shown a strong potential Airline attraction. The trouble is that we have a financially disabled Air Carrier to contend with. The solution therefore, to our Air Carrier's problem is outside our control. We must seek aid from Government and the Courts to help us in this regard. Our continuing goals for the future are improved Commerical Airline Service, leasing of Real Estate for our financial needs and continued happy landings at the Airport.

The Airport Commission concurs in the recommendations of the Airport Manager for the next year.

Respectfully submitted,
N. B. AIRPORT COMMISSION

LOUIS J. OSTRIC,

Chairman

NEW BEDFORD AIRPORT COMMISSION

Year Ending December 31, 1964

**Holdover appointments*

December 31, 1964

The New Bedford Airport Commission:

Gentlemen:

December 31, 1964 marks the end of the eighteenth full year during which the City of New Bedford has operated its Municipal Airport.

The number of takeoffs and landings recorded by the Federal Aviation Agency Control Tower during 1964 totaled 43,288 compared to 40,957 during 1963, an increase of 2,331.

The following percentages, based on the total number of takeoffs and landings of the past two years, show clearly the type of aircraft now using the field:

TYPE	1963	1964
Air Carrier	17.12%	15.06%

Itinerant Aircraft:

USAF	4.80%		4.70%	
Navy	3.54%		2.56%	
Civil	47.34%	55.68%	51.84%	59.10%

Local Aircraft:

USAF	9.40%	10.09%		
Navy	6.90%	5.50%		
Civil	10.90%	27.20%	10.25%	25.84%

The following chart shows the number of takeoffs and landings recorded during the years 1963 and 1964 and the number of days they were recorded:

Number of takeoffs and landings	Number of days during the year	
	1963	1964
200 or more	12	35
100-199	217	201
75- 99	51	39
50- 74	36	27
25- 49	17	26
15- 24	11	9
10- 14	6	11
5- 9	5	5
1- 4	4	7
0	6	6

HIGHLIGHTS OF THE YEAR'S ACTIVITIES:

This has been an eventful year in the history of the New Bedford Municipal Airport. Despite rising costs of materials, services and pay increases for all airport personnel, we were able to decrease our deficit \$1,150 below that of the previous year and increased our income by approximately \$4,050. If this trend continues, the time will come when the airport can operate without the help of the taxpayers of this city.

At the request of the Health Department, our D7 Bulldozer and operator were loaned to the Refuse Disposal Plant for approximately two months during 1964 to help bury refuse while the new smoke stack was being constructed. There was no charge for this service which, if hired through an outside contractor on an hourly basis, would have cost the city in excess of \$5,000.

At the beginning of the year, the commissioners met with Professor John Alevizos and Architect Edgar Wood, consultants for City Planning Associates, for the prime purpose of obtaining assistance in the development of an industrial air park. Preliminary plans and artist sketches were submitted to the commission and it was suggested that City Planning Associates be allowed to develop the park area. Progress along this line has been quite slow, although approximately three quarters of the proposed site has been cleared of all trees and overburden by airport personnel.

It is my belief that efforts to develop this site might be delayed until such time as Route 140 and 195 are completed.

The highlight of the year, after more than two years of talks and negotiation, was the leasing of 8 acres of airport controlled property to the O'Hara Realty Inc. for the purpose of erecting a new automotive dealership complex. This lease, which commenced in October, is for a period of thirty-five years with renewal options to ninety-nine years. The income to the airport for the first thirty-five years will amount to \$251,000. All taxes on this property will be paid by the leasee and at the end of the leasing period, unless renewed, the buildings become the property of the City of New Bedford. I feel that this lease is an excellent example of good business on the part of the airport commissioners, especially our Chairman, Attorney Louis J. Ostric, and Vice Chairman, C. Eric Lindell, who devoted a great deal of their personal time to the finalizing of this lease. I hope that in the future there will be more leases as lucrative to the airport as this one.

We have had unusually good luck in locating surplus government equipment this year. Through our efforts, we acquired two Dodge Pick Up trucks in like-new condition, a large 10-wheel cargo truck to be used for snow removal purposes, a 9-inch metal lathe, a 17-inch industrial drill press, a diesel powered front end loader, and other small miscellaneous items. The combined original acquisition cost of these items amounted to over \$32,000. Our cost to put this equipment in excellent condition was less than \$500. Because of our ability to acquire surplus equipment on a donation basis, the efficiency, relative to the maintenance of the airport, has increased considerably.

The major improvement for the year was the seal-coating of one-half of our taxiways at a cost of \$3,300. Whereas this is considered local maintenance, the city had to bear the full cost. Fortunately, surplus funds were available from our 1963 Construction account, therefore we did not require a special appropriation.

In September, Northeast Airlines exercised its option to renew their lease for an additional five-year period. During the

year, our scheduled air carrier service showed an increase in enplaned passengers of 11.2% above that of the previous year along with a very good on-time percentage. Our scheduled air taxi service also showed a substantial increase of 23.2% over the past year in enplaned passengers. This is very encouraging and I feel certain that the years to come will bring further increases.

One of the most unfortunate incidents of the year was the loss of our Air Force Reserve Recovery Squadron along with many other airports throughout the country. Their volunteered assistance in the past was invaluable and we are sincerely sorry to see them go.

During the course of the year, Massachusetts Air Industries renewed their lease for office space in the airport administration building for an additional year. Also, our restaurant is now under new management and we all hope that it will be a successful operation.

Requests were made by Temple Sinai and Temple Ahavath Achim Synagogues to purchase airport property for cemetery use. Approval was given by the airport commissioners, as well as the Federal Aviation Agency and the Massachusetts Aeronautics Commission to sell this property. We anticipate the transfer of this property sometime in 1965.

An attempt was made by the commission to sell fill on airport controlled property located between Plainville Road and Turner's Pond. The main purposes being, first, to clear the approach to Runway 14; and secondly, to help offset the airport deficit from monies received from the sale. Although we advertised twice for bids, no bids were submitted, apparently due to the very stringent specifications. However, I do feel that in the not too distant future, demand for this fill will increase and we can accomplish our purpose.

Another step in the right direction was the elimination of all aircraft landing and parking fees. We have proved over the years that it was costing us more to collect them than what we received, plus the fact that good will is more important at this time than the few dollars collected. I hope that other airports,

especially in this area, will think along these lines because I am sure that this will help increase the general aviation activity.

A great deal of the credit for our efficient operation should go to our loyal civil employees. Their performance has been outstanding and in many cases they have gone beyond the call of duty.

My recommendations for the year 1965 are as follows:

1. Continue efforts to improve air carrier service.
2. Stress the fact that we are a regional airport serving over 300,000 people.
3. Do everything possible to promote our industrial air park.
4. Attempt to obtain a surplus foam crash truck.
5. Press for Federal and State aid for the 1966 capital improvement program.

My sincere thanks are extended to all who have contributed to making this a successful year, especially to our loyal and dedicated airport commissioners.

Respectfully submitted,

JASON G. TAYLOR
Airport Manager

SUPERINTENDENT AND INSPECTOR OF BUILDINGS

ANNUAL REPORT

1964

In accordance with Chapter 7, Section 158 of the City Code of the City of New Bedford, I hereby submit a report of the activities of the Superintendent of Buildings for the calendar year of 1964.

BUILDING DEPARTMENT

A total of Seven Hundred Ninety (790) permits were issued in 1964 amounting to Six million, two hundred ninety-six thousand, four hundred one dollars (\$6,296,401.00). This was forty-five (45) more permits than in 1963 and the total valuation was Nine hundred three thousand, seven hundred fifty-five dollars (\$903,755.00) more than in 1963.

Listed are some of the large permits issued in 1964:

Thaddeus A. Irzyk Ashley Blvd. Erect a restaurant	\$30,000.00
Dunkin' Donuts 5 Rockdale Ave. Erect a store	30,000.00
Dunkin' Donuts 5 Rockdale Ave. Erect a store	45,000.00
Charles E. Sharek 143 Ashley Blvd. Erect a drug store	40,000.00
M. Mendes and Sons, Inc. Industrial Park Erect a manufacturing plant	130,000.00
Bristol County House of Correction 226 Ash St. Addition for cafeteria	46,960.00

Taber Nursing Home 19 Taber St. Erect addition and elevator shaft	20,000.00
Ashley Ford Mt. Pleasant St. Erect auto sales and service bldg.	175,000.00
Lloyd's Investment Corp. Industrial Park Erect a factory bldg.	250,000.00

Plans and specifications were prepared and bids received by the Building Department for miscellaneous work for other departments, including demolitions, roofing, plumbing, painting, etc. The Glennon Roofing Company was awarded a contract to replace roofing on the Central Fire Station; Cranston Painting Company was the contractor for painting in the Center Library; the Board of Health moved their laboratory from the Municipal Building to the west wing of the former Isolation Hospital and extensive plumbing was performed by Perry and Almeida, plumbing contractors; demolition of a

dwelling at 907 County Street was performed by Gracia Brothers Inc., under a contract for \$1,200.00. At the request of the City Solicitor, bids were obtained for demolition of buildings at 188 North Water Street. The contract was given to Tavano Construction Co., for \$1,080.00.

Bids were received and a contract awarded to Guido Plate Glass Company (\$4,275.00) for removal of bronze doors and replacement with aluminum and glass doors at the Center Library. The bronze doors were sold to the highest bidder, Lassow and Cohen, who offered \$475.00 for the old doors.

Modifications to the Incinerator Plant started in July 1963 were substantially completed in May 1964 and were finally accepted on July 7, 1964.

Additional classrooms at the Keith Junior High School, started in August 1963 by the Limcar Construction Company, were occupied on February 10, 1964 and accepted by the School Department March 30, 1964.

Construction of a new Branch Library in the south end of the city, started in May 1963 by John J. Fellouris, Inc., was accepted as complete on July 15, 1964.

Bids were opened on March 12, 1964 for the Cafeteria Addition to the Normandin Junior High School. A contract for \$245,827.00 was signed by DeLoid and Gomes Construction Corp., April 6, 1964. The cafeteria was substantially completed and ready for occupancy December 31, 1964. Final acceptance is expected in March 1965.

Bids for construction of a 25 classroom elementary school and demolition of the Parker Street School were opened December 16, 1964. A contract for this work was signed by Westcott Construction Corp., North Attleboro, Mass., December 22, 1964, for \$930,635.00.

SUMMARY OF BUILDING PERMITS

1964

	Permits	Estimated Cost
*New Construction	345	\$5,171,288.00
**Alterations and Additions	331	1,102,358.00
Heating	27	22,755.00
Demolitions	87
	<hr/> 790	<hr/> \$6,296,401.00

***NEW CONSTRUCTION:**

Dwellings	232	\$2,172,900.00
Stores, Bus., Mfg.	39	1,341,403.00
Garages	67	101,235.00
Schools, Hospitals, Institutions	5	1,542,000.00
Filling Station and signs	2	13,750.00
	<hr/> 345	<hr/> \$5,171,288.00

****ALTERATIONS AND ADDITIONS:**

Dwellings	251	\$ 242,996.00
Bus., Mfg., etc.	70	321,825.00
Schools, Hospitals, Churches, Clubs	8	537,287.00
Miscellaneous	2	250.00
	<hr/> 331	<hr/> \$1,102,358.00

There were Two hundred thirty-two (232) new dwellings and twenty-eight (28) new apartments added by conversion.

Comparative Summary of Construction for the Last Five Years

Year	No. of Permits	Estimated Cost
1960	735	\$2,034,880.00
1961	634	3,652,721.05
1962	702	3,073,342.00
1963	745	5,392,646.00
1964	790	6,296,401.00

During the year 1964, the Department made 38 special investigations. Special investigations are made as a result of a complaint by a tenant or a neighbor relative to a violation of zoning or building code.

There were 36 sign applications during 1964 which were forwarded by the City Clerk to be approved by this Department as to construction, site of location and method of erection and maintenance.

The Massachusetts state law requires that a thorough yearly inspection be made of all elevators, and a report of their condition made to the State Department of Public Safety.

There were 297 freight and 81 passenger elevators inspected during 1964.

There were 5 new elevators installed.

There were 19 appeals from the ruling of the Inspector of Buildings during the year 1964 relative to the application of the zoning ordinances.

Granted	14
Denied	5
	<hr/>
	19

Appeals that are granted are reversals of the rulings of the Inspector of Buildings; while appeals that were denied upheld the Inspector's ruling.

Places of assembly must be carefully examined according to Chapter 143 of the General Laws, as amended, before a license for their use can be obtained. This includes every building or part thereof, used as a place of public assembly and capable of accommodating 50 or more people; where 10 or more people are employed; rooming houses and apartment houses having eight rooms or 10 people above the second floor.

The following places of assembly were checked and issued certificates during 1964.

	Renewal	New
Cafes, Clubs, etc.	80	2
Industrials	17	
Mercantile	2	
Office	2	

During the year 1964, 27 Rooming Houses having 634 rooms, were inspected. A report of each inspection was forwarded to the State Department of Public Safety.

Inspections were made on Boarding Homes and Convalescent Homes.

BUILDING MAINTENANCE

Employees of this division of the Building Department were kept busy with repairs and alterations on all city owned buildings other than schools. Repairs consisted of painting, carpentry, plumbing, steam-fitting and electrical work.

A good deal of miscellaneous jobbing was performed by this division, including setting up bandstands for various civic organizations.

Exterior painting of eaves, dormers, windows and doors at the Central Police Station was completed in the spring of 1964. This job required extensive scaffolding and rigging.

Moving of the Board of Health Laboratory from the Municipal Building to the former Isolation Hospital required extensive interior painting, erection of partitions, etc.

Respectfully submitted,

EVELYN HENDRICKS

Clerk of the Cemetery Board

BOARD OF CEMETERY COMMISSIONERS

To the Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

The Cemetery Board herewith presents its seventieth annual report.

An ordinance, providing for an increase in the membership of the Cemetery Board from three to five members, was received, and it was approved, December 31, 1963. In compliance with this ordinance, Mr. Lionel J. Souza and Mr. Manuel Teixeira were elected members of the Cemetery Board by the City Council, February 13, 1964, for the term to expire May 1, 1965 for Mr. Souza and for a term to expire May 1, 1966, for Mr. Teixeira.

Mr. James E. Connors, a gardener and laborer in our department, retired March 16, 1964, under the non-contributory retirement, as provided for under the provisions of Chapter 490 of the Acts of 1961 of the General Laws. His employment began May 6, 1929, and he had completed twenty years and ten months of service.

The annual care grass-cutting charges were increased, beginning January first of this year, as follows:

Lots are to be figured at the rate of six (6) cents per square foot up to three hundred (300) square feet, then two (2) cents per square foot for all over three hundred (300) square feet.

The minimum charge for grass-cutting of lots was raised to ten dollars (\$10.00), and the minimum charge for single graves to seven dollars (\$7.00).

Also, starting January first of this year, when lots are sold, seventy-five percent of the sale price is deposited in the perpetual care fund for the care of the lot, and the

balance of twenty-five percent is charged to the sale of lots fund.

Over one hundred evergreens were donated to our department by Mr. Ryder of Hillcrest Nursery. Most of them were planted in back of the greenhouse and several on Section 7, at Oak Grove Cemetery.

We entered a display in the Kiwanis Club's Eleventh Annual Flower Show which was held at the Lincoln Park Pavilion, from April 2 through April 5, 1964. This was the first time that the show was held at the Lincoln Park Pavilion.

In December, a ruling was made that the maximum size of stones on all two-grave lots must not exceed four feet in length, and all monumental dealers were notified.

A ruling was also made to close the Ashley Boulevard gate at the Pine Grove Cemetery, at the end of each working day, in order to protect the cemetery lots from unnecessary traffic that was going through the cemetery.

One of our retired employees, Mr. Manuel A. Medeiros, a laborer, passed away, December 18, 1964.

During the year, we purchased the following new equipment:

- One (1) 84" National Triplex Mower
- One (1) Ford Tractor Grave Digger
- One (1) Snow Plow
- Two (2) Generators
- Thirteen (13) Power Mowers

We had three generators overhauled at the Vocational High School.

A total of one hundred twenty-five certificates were issued for seventy-four lots and fifty-one graves. Twenty-eight transfers of lots and graves were transacted, and eighteen burial right assignments were made. Of these totals, twenty-nine lots and twenty-nine graves were sold at the Rural Cemetery; seven lots were sold at the Oak Grove Cemetery and thirty-eight lots and twenty-two graves were sold at the Pine Grove Cemetery. One hundred seventy-one dollars (\$171.00) was turned over to the City Clerk's office for the recording fees on these transactions.

We take this opportunity to express our gratitude and appreciation for the kindness, assistance and cooperation received from His Honor the Mayor, members of the City Council, Department Heads and our own department personnel.

Respectfully submitted,

RALPH E. SALTUS, Chairman
LIONEL J. SOUZA, Secretary
JOSEPH J. BEATTIE
J. TUNSTALL PARHAM
MANUEL TEIXEIRA

SUPERINTENDENT'S REPORT

To the Board of Cemetery Commissioners

Gentlemen:

I, herewith, submit the annual report of the work done under my supervision, during the year 1964, and recommendations for 1965.

RURAL CEMETERY

Because of increased vandalism, the Police Department, under the direction of Chief Thomas Cawley, saw fit to assign a patrolman from May first to October first. The result of this action shows that we had very little vandalism during 1964. We had to purchase a new hydraulic pump for our grave digger. Because of its age, we received a new Ford tractor with back hoe and front end loader. This piece of equipment has eliminated many of our problems. A blocked drain and a water pipe break in front of the tool-house was repaired by the crew from the Department of Public Works.

OAK GROVE CEMETERY

The office building was painted on the outside, and we hope to paint the inside in 1965. New gutters were replaced on the toolhouse, and about 1,500 square yards of roads were sand-sealed. I hope to be able to do more work on our roads each year. The palm house benches in our greenhouse were rebuilt, and a new toilet was installed by the men in the Building Department. The Liberty Street land which we own, is being slowly filled in, and we expect this project to be completed in 1965.

PINE GROVE CEMETERY

The office and toolhouse building was painted on the outside, and our men constructed a black-top sidewalk from the Marion Street entrance to the front of our office.

A new aluminum flag pole was erected on the World War No. 1 Veteran's Plot and has made a decided improvement in this section. A mausoleum of solid marble was built on Lot No. 2 and No. 3 on Section 12 for the late Bishop Charles M. Grace by the House of Prayer for all People. This is the first mausoleum erected in this cemetery. Because of the traffic going through the cemetery after working hours, we decided to lock the Ashley Boulevard gate, and this action has satisfied our lot owners, who can still use the Acushnet Avenue entrance to enter and leave the cemetery. A request was made by the City Council to take a portion of our land on the west side of Ashley Boulevard for the purpose of erecting a new North End police station. After much discussion, it was decided by the City Council to withdraw the request. We are having a lot of trouble with the 1946 Ford truck, and will request a new truck in our 1965 budget.

GENERAL

Our department took part in the Kiwanis Flower Show again, and received an award of a Blue Ribbon for our display. The Greenhouse men are to be congratulated for their fine work at the show.

Three tons of fertilizer were used at our cemeteries to improve the grass condition, and the department was given one hundred evergreen shrubs by the Hillcrest Nursery.

An air conditioner unit was installed in our main office at the Rural Cemetery and has made working conditions much better for our office help.

Lots in cemeteries under our care, namely:—Peckham West, Point Road, Friend's, Griffin Street, Saint John's, Saint Mary's, Sacred Heart, Tobey, Reynolds and Congregational Church Cemeteries, were kept in good condition through the year.

I express my thanks for the assistance I have received from your Honorable Board, His Honor, the Mayor, members of the City Council, Department Heads and their personnel, and to the employees of the Cemetery Department for their cooperation during the year 1964.

JOHN THORNHILL,
Superintendent of Cemeteries

**REPORT OF CARETAKER
of
SOLDIERS' AND SAILORS' GRAVES**

New Bedford, Mass.

January 1, 1965

To the Honorable City Council of the
City of New Bedford

Gentlemen:

I, hereby, submit the following report of the work done, during 1964, on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:—

	Care of Lots and Graves
Rural Cemetery	178
Oak Grove Cemetery	146
Pine Grove Cemetery	22
Peckham West Cemetery	24
Congregational Church Cemetery	2
Griffin Street Cemetery	9

	381

The amount appropriated for this work was \$2,500.00 and of this amount, \$1,936.50 was expended for cutting grass, and \$563.50 was expended for a new flag pole on the World War No. One Veterans' Plot at the Pine Grove Cemetery.

Respectfully submitted,

JOHN THORNHILL,

Caretaker of Soldiers'
and Sailors' Graves

ANNUAL REPORT

BOARD OF CEMETERY COMMISSIONERS

for the year ending December 31, 1964.

IN CITY COUNCIL,

October 14, 1965

Received, placed on file and ordered printed in the City Documents.

CHARLES W. DEASY,
City Clerk

Attest:

CHARLES W. DEASY,
City Clerk

ANNUAL REPORT

OF THE

CITY AUDITOR

OF THE

CITY OF NEW BEDFORD
MASSACHUSETTS

FOR THE YEAR 1964

BRADBURY-WARING, INC.

New Bedford, Mass.

1965

CITY OF NEW BEDFORD

Office of the City Auditor

To His Honor Edward F. Harrington, Mayor of New Bedford,
and the Honorable City Council:

Submitted herewith are the following statements and schedules showing the receipts and expenditures for the City of New Bedford for the calendar year ending December 31, 1964 and the financial conditions.

Exhibit A—Balance Sheet as of December 31, 1964.

Exhibit B—Statement of Receipts for the year ending December 31, 1964.

Exhibit C—Statement of Expenditures for the year ending December 31, 1964.

Exhibit D—Summary of Receipts and Expenditures for the year ending December 31, 1964.

Exhibit E—Report of Appropriations, Receipts and Expenditures for the calendar year January 1, 1964 to December 31, 1964.

Exhibit F—Schedule of Bonded Debts and Sinking Funds as of December 31, 1964.

Exhibit G—Schedule of Indebtedness Payable at the close of the calendar years 1941 through 1964.

Exhibit H—Summary of Bonded Debt and Sinking Funds as of December 31, 1964.

The City of New Bedford closed the calendar year 1964 with a balance of \$1,405,116.05 in the Excess and Deficiency Account.

I certify that in the course of the audit of the books and records of the City of New Bedford the cash on deposit and securities representing the investments of sinking funds of the City of New

Bedford and several trust funds in the custody of the commissioners, trustees and city treasurer were verified and found that the same were in agreement with reports and records rendered by said commissioners, trustees and city treasurer to the City Council.

Respectfully submitted,

ROGER G. DUBE,

City Auditor

CITY COUNCIL

The City Council organized on January 6, 1964 at which time Joseph P. Harrington was chosen President.

In addition to the regular meetings which are held on the second and fourth Thursdays of each month, the Council held 9 special meetings and sat in joint convention with the School Committee to fill the vacancy caused by the death of Milton S. Briggs. Attorney Paul J. McCawley was elected to fill the unexpired term.

The Budget for 1964 was adopted on April 3, 1964 in the sum of \$19,102,740.17. As originally submitted by the Mayor on February 20th, it was reduced \$59,900.00. All department heads had been interrogated at the three hearings held by the Council sitting as a quasi committee of the whole.

ORDINANCES

- April 23, 1964 — The salary of the Mayor established at \$15,000.00 per annum.
- April 23, 1964 — The salary of members of the City Council was established at \$1,500.00 each per annum.
- May 28, 1964 — Penal sum on bonds in connection with building movings, etc. increased.

ACCEPTANCE OF LEGISLATION

- February 3, 1964 — General Laws, Chapter 41, Section 81N, etc. (subdivision control) adopted.
- October 29, 1964 — Rules and regulations for subdivision control adopted.
- August 27, 1964 — Jaywalking law adopted — Chapter 409, Acts of 1962.

RECOMMENDATIONS

The vital statistic records, particularly births, should be recopied because their constant use has worn and torn pages. While we have patched with scotch tape, the result has been unsatisfactory and important data is likely to become lost. I feel that this work cannot be put off much longer.

The City Council records in our archives have been subjected to the extremely bad atmospheric conditions prevailing there, and the covers are virtually disintegrating. Some thought must be given to covering the same with canvas jackets. I realize that this will be expensive, but the project is most meritorious.

Our quarters are definitely too cramped for the increasing work of this office. It has reached the state where my private office has had to accommodate steel filing cabinets. If and when a new city hall is erected, the City Clerk should be consulted in the early planning stage. At the present time, heavy vital statistic records must be copied on our counter and a situation is created that has at times been fraught with embarrassment. I refer to cases of people scanning the book while the copy is being made and thus observing corrections which are not public property. A different physical setup should provide for large tables in the center of the office where the copying could be done.

CONCLUSION

This has been an exceptionally busy year; however, we have continued our good public image, thanks to the co-operation of the office force under the meticulous guidance of Ellen M. Gaughan, the Assistant City Clerk.

Respectfully,

CHARLES W. DEASY,
City Clerk

OFFICE OF THE CITY SOLICITOR
Room 203 Municipal Building
New Bedford, Massachusetts

July 22, 1965

To His Honor, the Mayor, and Members of the
City Government of the City of New Bedford:

I respectfully submit the Annual Report of the operations of the City Law Department for the year 1964.

48 written opinions were rendered to the City Council and Department Heads, and also many oral opinions.

284 industrial accident cases were reported to the Industrial Accident Board in Boston, which included filing of reports, investigations, and a number of hearings before the Board members.

176 claims for personal injuries and property damage were filed, the result of defects in the highway and accidents involving city-owned motor vehicles.

All contracts awarded by the Purchasing Department and School Department were examined and approved by the City Solicitor.

Deeds, leases, orders for street layouts, alterations and easements were drafted by the department.

Approximately 12 tax title foreclosures were entered in the Land Court, resulting in payment to the city of several large accounts which would perhaps have remained on the books as unpaid if action had not been started; also many decrees were received as the result of the foreclosure entries.

This office assisted in the collection of \$3,948.42 in accounts due the city for damage to city property, vehicles, tuition fees of school children, etc.

Contract for the reconstruction of the New Bedford Public Golf Links was prepared by the City Solicitor, part of the land of the old links being taken for Route 195, said contract signed January 7, 1964 with Suburban Excavators, Inc. of Wakefield, Mass. for \$157,000.

This office has also been involved with several matters for the School Committee, and has worked in cooperation with the Federal Community Action Program.

Numerous applications for governmental financial assistance, both state and federal, were prepared by this office.

Suits pending as of December 31, 1964 — 6 land damage suits for taking of land and easements in land by eminent domain; 15 personal injuries and property damage suits resulting from alleged defects in public ways; 7 suits in which the City is the plaintiff; and 10 miscellaneous cases against the City or City employees.

Respectfully submitted,

GEORGE JACOBS

City Solicitor

FIRE DEPARTMENT REPORT

Mayor of the City of New Bedford —

Dear Mr. Mayor:

I respectfully submit the Annual Report of the operations and functional status of the Fire Department for the year 1964, together with the recommendations that I consider necessary for the maintaining and increasing the efficiency of the Department.

The total of alarms received for "Fires" and "Non-Fires" for the year 1964 is 1,786.

SUMMARY OF ALARMS RECEIVED

Fires	962
Emergency Calls, other than fires	548
No Fire Found, Sprinkler Trouble, Etc.	135
False Box Alarms	105
False Telephone Alarms	28
Out of City Responses	8

TOTAL	1,786

Of the actual 962 fires, 692 originated as "Still Alarms" and in 217 cases were followed by "Box Alarms" for the same fire. Of the actual 962 fires, 268 originated as "Box Alarms" and in 9 cases, calls for additional apparatus were sent out by "Still Alarms" for the same fire.

Total "Still or Telephone Alarms" transmitted from Headquarters	977
Total "Box Alarms" transmitted from Headquarters	487

	1,464

Of the total alarms transmitted, there were 962 actual fires. There were four Second Alarms during the year.

The total fire loss for the year 1964 is \$372,798.01, of which the loss in buildings is \$187,453.00; the loss of contents of buildings is \$138,316.15; the loss on auto fires is \$40,478.36 and the loss on boats is \$8,088.00.

The fire loss this year was lowered by \$32,381.24. This reduction was, no doubt, brought about by the fact that we had only four second alarm fires in 1964 as against seven second alarms in 1963. The per capita fire loss of \$3.72 compares most favorable with the national average of \$7.97.

The Department responded to 548 emergency services which include resuscitator efforts, pumping out of flooded cellars and boats, removal of refrigerators that were leaking sulphur dioxide gas and numerous other types of services which this Department classes as emergency Public Service. May I state that the above calls were made as a part of the emergency service this Department provides the citizens of our City.

As authorized by Section 19 of Chapter 148, General Laws, I granted 6 Permits for Blasting.

The capable staff of Chief Officers who are responsible for administrative and firefighting efficiency in their respective Districts, in addition to a myriad of other duties related to the Fire Service, are to be congratulated for their unquestioned dedication and support to this office.

Deputy Chief Frank H. Cleveland, District Chiefs Charles J. Armanetti, Edward J. Jablonski, Daniel L. Piekut, Alphonse Piekut, James E. Harwood, Gordon W. Graham, Fred Osuch and Acting District Chief Edward W. Sylvia made approximately 431 inspections during the year to check out complaints and remedy hazardous fire conditions. They granted 915 Open Air Permits after visitation for assurance of fire-safe conditions.

The Home Fire Inspection Program was continued under direction of Deputy Chief Frank H. Cleveland. I wish to compliment our personnel in this phase of fire prevention. The diplomatic and efficient manner in which Company personnel conducted these inspections is highly commendable. A total of approximately 3,000 buildings and 4,224 occupancy inspections were made. In addition to the Home Inspections, schools, hospitals, theatres and convalescent homes were inspected quarterly. A continuing phase of this most important fire prevention measure also included every church in the City. If we may prevent the loss of just one life through the efforts of our Fire Prevention measures, then I would say the program is justifiable.

The Fire Alarm Division, our communications center, which services both telegraphic and radio transmission and reception continues to operate in a most efficient and progressive manner under the direction of Assistant Superintendent of Fire Alarms Clifford J. Snell.

Considerable work has been done on the relocation of underground cable and overhead aerial line in connection with the construction of two new highways through the City. In connection with these new highways approximately 7,000 feet of aerial line and 2,700 feet of underground cable was relocated.

Eight new private master fire alarm boxes were installed and approximately 7,000 feet of aerial line and associated equipment installed to service these boxes. Interior fire alarm equipment was installed and connected to a master box at the Greene School, Madison Street. Thirteen Public Schools now have direct connections with the Fire Department through master fire alarm boxes.

New mobile radios were installed in Engines 6 and 9 to replace old units, and in compliance with F. C. C. regulations frequency checks were taken on all units.

As in the past, assistance was given the Wire Department relative to the Christmas display at the Common Park.

Routine maintenance work was done by the fire alarm crew which included tree trimming, line inspection, change over to new poles, ground testing and painting outside equipment.

All fire alarm boxes were tested and inspected and the interior circuits from master boxes were tested.

At the close of 1964, the number of fire alarm boxes throughout the City totalled 458; of this total 200 are Public and 193 are Private, 136 of the latter being the master type connected to sprinklers, heat detectors, or auxiliary pull stations.

The Repair and Maintenance Division under Master Mechanic Kenneth M. Haddock is charged with the upkeep and repair of all mobile units, many of which are specialized requiring service uncommon to most motor vehicles. The Repair Shop also maintains, repairs, and many times fabricates the special equipment and accessories peculiar to fire fighting.

Care of the eleven (11) buildings under Fire Department jurisdiction, requires that our Repair Division perform carpenter, plumbing and heating repairs which otherwise would require the services of an outside contractor.

Fire Prevention Division is headed by Captain Ernest M. Torres assisted by three Lieutenants and two clerks. This division is responsible for administering one of the most important phases of Fire Department functions, namely Fire Prevention and Investigation.

Their duties embrace the entire field of Fire Prevention and Investigation including issuing of relative permits as required by law, inspection duties, fire prevention lectures to schools and public service organizations, and investigative work in relation to suspicious fires.

Permits issued by the Division are as follows:

Power Oil Burners	379
Range, Cabinet and Space Heaters	50
Garage and Filling Stations	28
Fuel Oil Storage	40
Liquefied Petroleum Gas Storage	64
Underground Tank Removals	10

TOTAL	571
-------	-----

The Drill and Training Program is directed by Captain Raymond G. Furness. Its function is to maintain efficiency in all phases of firefighting through classroom instruction and fire ground training at the Drill Tower and various other locations.

Captain Furness, through his attendance at the Massachusetts Institute of Fire Department Instructors monthly meetings, is able to keep astride of the most modern techniques of firefighting.

Annual Underwriter service tests for all pumping engines, first aid instruction and lectures to the military, Civil Defense, and Industrial fire brigades are all a part of the duties of our Drillmaster.

Refresher courses in radiological monitoring were given to all members of the department. The various instruments employed in detection of radioactivity are provided by the Civil Defense Agency and are kept operational and in readiness at all Fire Stations throughout the City.

The New Bedford Protecting Society Officers and Personnel constitute a most dedicated and capable body of citizens who, with a most modern equipped salvage vehicle provide invaluable assistance to the Public and Fire Department. Serving without remuneration, the members of the Society avail themselves at any hour, day or night, in their effort to help keep the City's fire losses low. The Public should be more aware of their excellent service.

APPARATUS IN COMMISSION

- 11—Motor Pumping Engines, 6-1,000 G. P. M. and 5-750 G. P. M. Engines, all with booster hose and water tanks. Four have built-in liquid foam tanks used for flammable liquid fires. Six carry large deluge guns for use on large fires.
- 4—Aerial Ladder Trucks, 2-85 Ft. tractor type and 2-75 Ft. non-tractor type, all equipped with ladder pipes.
- 1—City Service Ladder Truck.
- 1—Rescue and Fire Boat, on trailer — available on call.
- 1—Hose Wagon with Booster and Water Tank, equipped with forestry hose, wet-water device, flammable liquid fire fighting appliances — on call.
- 1—Automobile for the Chief.
- 1—Automobile for the Deputy Chief.
- 4—Automobiles for the District Chiefs.
- 1—Automobile for the Drillmaster.
- 3—Fire Alarm Trucks, one used only for pulling in cable.
- 3—Repair Division Cars — 1 truck and 2 sedans.
- 3—Automobiles for Fire Prevention Division.
- 1—Van for towing of Rescue SCUBA and Fire Boat.
- 1—N. B. Protecting Society Salvage Truck.

APPARATUS IN RESERVE

- 1—Motor Pumping Engine, 200 G. P. M. with power take-off pump and water tank.
- 1—Motor Pumping Engine, 500 G. P. M.
- 1—High Pressure Fog Truck with 435 Gallon Water Tank.

FIRE HOSE

818 feet of 3-inch hose
28,900 feet of 2½-inch hose

19,750 feet of 1½-inch hose
1,000 feet of 1-inch hose, high pressure
4,500 feet of ¾-inch hose
800 feet of ⅝-inch garden hose
130 Waterproof salvage covers carried on apparatus
10 Waterproof salvage covers carried on Protection Truck

NEW EQUIPMENT ACQUIRED DURING THE YEAR

One new American Lafrance 1,000 G. P. M. Pumping Engine.
3,000 feet of 2½-inch Fire Hose.
Four reconditioned Fire Alarm Boxes.
Fire Alarm Cable and Iron Wire and related equipment.
Two new Mobile Radio Units.
Repairs to Fire Station No. 2 roof.

My sincere thanks to the Mayor and City Council for the continuation of their excellent cooperation and good relationships with this Department.

Inter-Department cooperation is on the highest level. I extend my thanks to the Building, Wire, Water and Public Works Departments.

Our news media including the Standard-Times, and radio stations WNBH and WBSM are outstanding in the presentation of fire ground activity and various other newsworthy items related to the functions of the Fire Department. Without their fine support our Educational and Fire Prevention programs would be impossible to achieve their objective — namely, "reaching the people".

The Salvation Army, Volunteers of America and American Red Cross who faithfully dispense hot coffee and refreshments to our men at multiple alarm fires, deserve and receive our special thanks. May our fine relationship continue.

Many thanks to Civil Defense Director Mrs. Anne Fitch and her personnel, for invaluable assistance in the fields of traffic, lighting, and availability of their Rescue Truck at multiple alarm fires.

Special recognition and thanks are extended to the Company Officers and Firefighters who on many occasions have demonstrated their ability to fulfill their duties in the highest tradition of our service. Their participation in the many civic endeavors of our City is worthy of admiration.

RECOMMENDATIONS

ONE (1) NEW 1,000 G. P. M. PUMPING ENGINE: The efficiency of a fire department is, to a large degree, predicated on the dependability and capacity of its' pumping engines both active and reserve. Our pumping engine posture is rapidly becoming acute. Reserve status is for all practical purposes negative, which means if an active piece of apparatus breaks down and requires extensive repairs, there is no dependable replacement — some area of the City will be exposed to inadequate protection.

Engine No. 1, a 750 g. p. m. pumper, quartered in Station No. 2, is charged with the protection of the high value district, including the entire downtown area and surrounding manufacturing districts. This engine is nearly 15 years old and has seen considerable service, and should be placed in reserve status.

Our present active pumping engine age is as follows:

1947—one	1948—one
1950—one	1952—two
1953—one	1954—three
1955—one	1956—one

It is obvious from the above that a long range plan for gradual replacement should be instituted. I sincerely hope serious and forthright consideration be given to the above request.

REQUEST: \$26,000.00

TWO (2) NEW STATION WAGONS AND ONE (1) NEW FOUR DOOR AUTOMOBILE: Passenger type vehicles, of which we have eleven, are used by the Chief, Deputy Chief, District Chiefs, Fire Prevention Inspectors, Drillmaster and Master Mechanic.

The above vehicles are necessary in the performance of the day and night duties of the aforementioned. In the

move toward economy, the practice of this department is, through the "hand-down" process, get the most out of each vehicle. Three of the above vehicles, one of which is the Chief's car (1955 Pontiac) and two of the 1949 vintage should be replaced.

The two new station wagons, because of their versatility would replace two of the District Chiefs' cars (1956 Ford and 1957 Plymouth) which older cars would be handed down to replace the 1949 models.

REQUEST: \$10,500.00

TWO (2) NEW FIRE ALARM BOXES: With increased new construction in residential areas it becomes imperative that such areas be protected by adequate distribution of fire alarm boxes. Our citizens need and deserve such protection for the notification of fire.

REQUEST: \$300.00

FIRE ALARM IRON WIRE AND UNDERGROUND CABLE: Fire alarm iron wire and underground cable are integral units of our telegraphic Fire Alarm system. They serve as the carriers of a fire alarm signal from the various fire alarm boxes throughout the City to our Central Station at Headquarters. Much of the wire and cable has deteriorated through age and weather and must be replaced. Failure to replace such wire and cable could very likely result in serious consequences, for a breakdown would negate the receipt of a signal from a fire alarm box that was pulled on that particular circuit.

REQUEST: \$1,750.00

WIDENING OF APPARATUS DOOR AT STATION No. 7 AND INSTALLATION OF OVERHEAD DOOR: For the past twelve years, request has been made for the above installation. The present door opening designed during the horse-drawn days, presents a clearance of only 1¼ inches on each side for our present apparatus.

REQUEST: \$3,000.00

PORTABLE "WALKIE-TALKIE": The above device is a valuable and useful adjunct to efficient firefighting in forest areas, factories, schools, hospitals, hotels, mercantile establishments, and other areas where portable communication with Headquarters is desired. This device would also serve

to good advantage on water rescue and firefighting operations.

REQUEST: \$600.00

ONE TYPEWRITER: Considerable clerical work is processed in our main office and Fire Prevention Bureau. Due to age and constant use, I recommend a replacement for the typewriter in the Fire Prevention Bureau. The older unit would then be handed down for use in one of the stations that presently does not have one.

REQUEST: \$250.00

FIRE STATION REPAIRS AND PAINTING: We have tried with the aid of the Building Department, to effect certain minor repairs and painting of certain stations. However, major repairs are urgently needed at several stations. At Station No. 9, water enters through the porous bricks on the South wall of the station and runs down the brick and plaster inside of bedrooms, severely damaging walls on the second floor. This condition has persisted for several years and should be corrected.

We should begin a long range program of station repair to eliminate further damage to the interior of the stations.

REQUEST: \$2,000.00

TWO NEW RADIOS FOR APPARATUS: This department maintains and uses 28 mobile radio units which have been purchased over a span of 13 years. Increased service and repairs to many of the older units is indicative of their need for replacement. A plan should be instituted whereby two (2) units should be replaced yearly in order to maintain this most vital link of communications.

REQUEST: \$1,600.00

NEW 2½ INCH HOSE: Nearly half of our 2½" hose, which serves as the water carrier from pumping engine to the fire grounds, is over eleven (11) years old. Consequently, through fireground use, annual service tests, and age, our inventory is rapidly decreasing.

It is necessary that each pumping engine maintains a complete body change in reserve and a sufficient supply be available for multiple alarm fires. At the present rate of deficiency, I recommend the purchase of approximately sixty

lengths of 2½" hose in order to maintain our efficiency in that area.

REQUEST: \$3,000.00

FIVE SCOTT AIR PAKS: A program to replace the Chemox Masks with the contained air type will prove both beneficial and economical to the department. These masks will pay for themselves by eliminating the costs of cannisters needed for the Chemox Mask. We have the facilities to recharge the air cylinder, whereas should a Chemox cannister be used (even for a short period of time) the cannister must be discarded at the cost of \$7.50 per unit.

REQUEST: \$1,250.00

TWO ELECTRIC WATER COOLERS: Only our Station No. 5 is provided with an electric water cooler. When men return from a working fire, a cold drink of water would be appreciated. It is my hope that a program to equip the other ten (10) stations with water coolers could be started so that eventually all stations would be so equipped.

REQUEST: \$300.00

VOICE RECORDER: The National Board of Fire Underwriters requires that all telephone alarms received or transmitted be automatically recorded (P. 25 #2534). Such recorder permits a permanent record be kept of all telephone conversations received by Headquarters and permits an immediate playback, should there be any question as to what has been said.

REQUEST: \$1,200.00

RELOCATION OF FIRE ALARM EQUIPMENT DUE TO ROUTE 195: Relocate underground cable, pedestals, fire alarm boxes, overhead aerial lines and associated equipment for the construction of new Route 195; material \$5,165.15, labor \$2,050.00, less approximately \$240.00 for lead salvage.

The above to be reimbursed by the Commonwealth of Massachusetts.

REQUEST: \$6,975.15

Respectfully submitted,

RICHARD T. GAUGHAN,

RTG/arj

Chief

A FURTHER BREAKDOWN OF THE CLASSIFICATION OF THE FIRES
ON THE PREVIOUS PAGE IS LISTED BELOW

Residential	Includes—Dwellings, Tenements, Apartments, Hotels, Rooming and Lodging Houses.
Non-Residential Assembly	Includes—Office Buildings, Theatres, Churches, Hospitals, Institutions, Schools.
Mercantile	Includes—Retail & Wholesale Trade, Restaurants, Bars, Repair Shops, Filling Stations.
Manufacturing	Includes—Factories, Breweries, Canneries, Bakeries, Laundries, Printing & Other Manufacturing Processes.
Storage, Etc.	Includes—Warehouses, Piers, Wharves, Grain Elevators, and Storage.
Public Utilities	Includes—Power Plants, Pumping & Transformer Stations, Poles, Etc.
Miscellaneous	Includes— <i>a.</i> Detached Private Garages & Barns. <i>b.</i> All Other Buildings.
Grass & Brush	Includes—Grass and Brush Fires ONLY.
Motor Vehicles	Includes—Motor Vehicle Fires ONLY.
All Other Fires	Includes—Outdoor Fires, Such as Boats, Lumber Yards, and Machinery.
False Alarms	Includes—Mischievous and Maliciously False Alarms.
Accidental Alarms	Includes—Smoke Scares, Honest Mistakes, Wrong Locations, Sprinkler Troubles, and Accidental Alarms.
Emergency Calls	Includes—First-Aid, Accidents, Emergency Calls, Etc.
Out of the City	Includes—Out of the City Calls ONLY.
Deaths	Includes—Death among Firefighters and Civilians.

Anne D. Saunders, M.D.

*Leave of absence

REPORT OF DIRECTOR OF PUBLIC HEALTH

As of December 1, 1964 all of the laboratory facilities were moved to the new location, namely, the Board of Health Annex at 100 Brock Avenue which was formerly the west wing of the Isolation Hospital. This laboratory had remained for more than 45 years in the attic on the fourth floor of City Hall. The work there had been conducted under the most adverse conditions and it was with a great deal of pleasure that this facility was moved to quarters which had been renovated in excellent taste by workmen of the Building Department.

At the same time, all of the tuberculosis control work together with the personnel was removed to these quarters also, thus combining the chest x-ray, tuberculosis control program and the laboratory in one physical plant. In this way, it was possible to provide a clerk for these three branches.

Contrary to other communities throughout the United States there appeared to be no rise in venereal diseases in this community in 1964. In 1963 143 new cases were treated and in 1964 this number went to a low of 120. There was a rise, however, in old cases treated from 284 in 1963 to 350 in 1964. The total number of treatments given in 1963 was 951 as against 859 in 1964, a reduction of 92. The total number of visits for treatment and observation dropped from 765 to 704 so that it can truthfully be said that New Bedford is holding its own in regard to venereal disease while other communities are experiencing sharp increases in these diseases.

In our laboratory a new method of bacterial examination for water and milk was instituted. The Millipore Method of Examination which is now a Standard Method of procedure has considerably shortened the amount of time in which results may be obtained in the testing of water and milk and decreasing the amount of work necessary for these results.

Our vaccination clinics as well as our well child clinics are especially well patronized and continue to be overcrowded and chaotic in view of the lack of adequate plant facilities for prop-

erly conducting this service. It is a deplorable situation when both mothers and children are not able to be offered even seats to sit down while waiting for service. What the City of New Bedford proposes to do in this respect is problematic in view of the fact that the question of building a new public health center has not been revived.

The incinerator began as of May 1964 again burning refuse material but with a new chimney. This chimney which is now 175 feet high replaced two other stacks from the old plant which were only 100 feet high. Prior to this change the deterioration of our furnaces and secondary combustion chambers was incalculable. Since that time, however, very little maintenance has been necessary in spite of the fact that the furnace and chamber linings were not renewed at the time the new stack was built. Also, there has been an increase in burning capacity of almost 60% in view of the fact that increased draft resulted in lower burning temperatures and, consequently, less deterioration. This change in our plant facilities will, in the long run, save many thousand of dollars in maintenance costs for the city.

It is worthy of note that in 1955 there were 2013 cases of communicable diseases reported to the Board of Health whereas in 1964 there were only 571 cases. This speaks especially well not only from the point of view of good public health control of such diseases but also from the point of view of the medical attention which our population is receiving from the physicians in this community. There is, however, one disturbing factor in connection with communicable diseases and that is the ever-increasing number of dog-bites that are being reported. During the course of the year 1964 there were 345 dog-bites or, approximately, one a day. It should be noted that most of these dog-bites occur among children 15 years of age or less. How to protect these youngsters from being bitten is truly a public health problem and one to which we propose to give considerable attention in the coming months.

The Board of Health wishes to take this opportunity to thank the Building Department, the Police Department as well as other

departments upon whom we have called from time to time for assistance in carrying out our work as public health officials. It is most gratifying to feel the sense of cooperation which exists throughout the City of New Bedford with this department.

The Board of Health wishes to extend its thanks and appreciation to the loyal workers of the department who have worked incessantly and sometimes at considerable danger to themselves and their families.

ALPHEGE LANDREVILLE,

Director of Public Health

Annual Report

New Bedford, Massachusetts

June 17, 1965

To the City Council of the City of New Bedford:

Gentlemen:

I respectfully submit the annual reports for the departments of Inspector of Wires, Police Signal System and Street Lights for the year 1964.

The following are some of the larger electrical installations that were inspected during the year:

- St. Luke's Hospital additions
- Canada Dry Plant
- New Union Hospital
- Ashley Ford
- St. Mary's School
- Normandin Junior High School Cafeteria
- Keith Junior High School addition
- Rodney Metals addition
- Hancock Industries
- Eastern Sportswear
- Saltmarsh's new location
- Norwegian Fish Plant

During the year, 6,293 inspections were made throughout the City. The number of requests for inspections were 3,369. Inspections after fires totalled 206, which is an increase of 43 over 1963. The installation of appliances such as air conditioners, washing machines, dryers and electric heaters, show an increase over 1963.

I investigated and reported to the City Council on 101 petitions of the New Bedford Gas & Edison Light Company and the New England Telephone & Telegraph Company.

Inspections after fires numbered 206, an increase of 43 over 1963. Defective wiring, oversized fuses and the misuse of cords are the causes of a great number of fires. Many of our homes are still served by electrical services that were installed over 25 years ago and are too small for the present day needs. The number of appliance outlets were never increased with the result that cords are being used as extensions from the original outlets. High wattage appliances create an electrical over-load on inadequate services and circuits which contribute to possible fire hazards.

The Christmas Display was set up on the Common and was viewed by thousands of people. The New Bedford Gas & Edison Light Company contributed the electricity which amounted to 95,770 watts. The students from the Electrical, Art and Carpentry Departments of Vocational High School contributed to the success of the display and I extend my sincere appreciation for their efforts. Also, to Director Z. Walter Janiak and his capable department heads and personnel from Public Works, Fire, Police, Civil Defense, Water, Building and Police Signal Departments. Police Signal Electricians Robert F. MacMillen, Eugene Lorenzo and Malcolm E. Tripp, are to be commended for their excellent work.

The following is a breakdown of the work completed this year:

2W receptacles	4,739
3W receptacles	422
New buildings	128
110V motors	116
220V motors	165
440V motors	61
550V motors	26
Sockets	825
Switches	2,689
Meterloops	3
Intercom Systems	2

Traffic Lights	2
New services	116
Underground services	2
Service breakdowns	33
Services reconnected	27
Service changeovers	188
Service changeovers for houses relocated	6
Oil burners	235
Oil pumps	16
Circulators	195
Oil tanks	11
Gas burners	164
Gas pumps	2
Incinerators	1

Re-inspections	171
Advisory	149
Requests for inspections	3,369
Permits to electricians	1,810
Permits to owners	44
Reports of defective wiring	1,851
Yellow tags	606
Green tags	126
Blue tags	206
Red tags	37
Permits issued to N. B. Gas & Edison Light Co.	1,621

Forty-four applications for the moving of buildings were investigated and approved.

The operating expenses for the year were:

General Expenses	\$ 1,205.95
Salaries and Wages	28,726.14
Pension	2,123.24
New Equipment
Christmas Decorations	4,933.25
TOTALS	<hr/> \$ 36,988.58

Mr. Aurele Cournoyer resigned his position as Assistant Inspector of Wires on September 4th and Mr. Joseph Theodore, Jr. was appointed provisionally on October 19, 1964.

POLICE SIGNAL SYSTEM

New Underground cable was installed on Kempton Street from Cedar Street to Brownell Avenue, a distance of over 6,000 feet. Two new pedestals were also installed, one at Cornell Street and Kempton Street and one at Brownell Avenue and Kempton Street. New underground cable was also installed on Hathaway Road where the new Route 140 bridge was erected. The underground cable installation on Kempton Street, from Cornell Street to Brownell Avenue, was made necessary by the new Route 140. The City will be reimbursed by the Commonwealth for the Kempton Street and the Hathaway Road work in the amount of \$827.00. A similar project on Summer Street, due to Route 195 causing Police Signal underground cables to be relocated, will be completed in early 1965. The City will also be reimbursed in the amount of \$640.00 for this work.

New underground cable was installed on Purchase Street, between Middle Street and High Street, to replace an old, defective cable. Old cable was replaced on Pleasant Street, from William Street to the First Safe Deposit National Bank burglar alarm system. This circuit is connected directly from the Police Signal Desk and the bank burglar alarm system.

Overhead lines in the north end were lowered on 20 occasions due to the moving of buildings. Forty-four applications for the moving of buildings were approved. The new Route 195 was responsible for the majority of building moving applications.

Traffic lights equipment at 12 intersections were painted. A new set of traffic lights were put into operation at the

junction of Ashley Blvd. and Acushnet Avenue. This work was done by Municipal Signal and Supply Company for a contract price of \$5,151.00.

Police Signal electricians installed decorative and flood lighting for the July 4th celebration at Sargent Field and for the Summer Festivals at Pier 3. Electric wiring was provided for band concerts in different sections of the City. Floodlights were installed at Brooklawn Park in the area of the Recreation House Polling Precinct for the benefit of the public.

Trees were trimmed in all sections of the City where Police Signal overhead wires were involved.

The following is a breakdown of the work done by the Police Signal Electricians:

Police Box repairs	110
New Police Boxes installed	6
Station No. 1 inspections	250
Switchboard repairs, Station No. 1	23
Station No. 5 inspections	110
Switchboard repairs, Station No. 5	52
Traffic light repairs	128
Overhead wire repairs	36
Underground cable repairs	47

Other work done by the department this year, included:

Painting traffic signal equipment at several intersections and dismantling Christmas Display at the Common. Overhauling and repainting police boxes.

Constant maintenance of all traffic light systems and police boxes.

Wiring for symphony and band concerts night lighting.

Installing wiring and lights for July 4th celebration at Sargent Field.

During the year, the City Solicitor's Office has collected \$461.29 in damages to traffic signals and police boxes as the result of automobile accidents.

The cost of Hit-and-Run accidents, \$126.60 (uncollectable).

The operating expenses for the year were:

General Expenses	\$ 16,627.00
Salaries and Wages	15,074.07
	<hr/>
TOTAL	\$ 31,701.07

STREET LIGHTS

At the end of the year, there were 5,785 street lights in operation in the City of New Bedford as follows:

1,616	100 C.P. overhead	@	14.40 per year
883	250 C.P. overhead	@	23.88 per year
29	250 C.P. underground	@	23.88 per year
957	250 C.P. underground	@	31.20 per year
27	400 C.P. overhead	@	35.28 per year
127	400 C.P. underground	@	42.72 per year
8	600 C.P. overhead	@	47.04 per year
56	600 C.P. underground	@	54.36 per year
274	1,000 lumens overhead	@	28.80 per year
4	1,000 lumens overhead	@	38.80 per year
739	2,500 lumens overhead	@	36.00 per year
285	2,500 lumens overhead	@	37.80 per year
8	2,500 lumens overhead	@	46.00 per year
3	2,500 lumens overhead	@	47.80 per year

9	2,500 lumens under-ground overhead	@ 81.00 per year
1	2,500 lumens under-ground overhead	@ 116.00 per year
31	2,500 lumens under-ground	@ 82.80 per year
4	2,500 lumens under-ground	@ 117.80 per year
48	4,000 lumens overhead	@ 45.00 per year
38	4,000 lumens under-ground	@ 90.00 per year
19	4,000 lumens under-ground	@ 125.00 per year
86	6,000 lumens overhead	@ 54.00 per year
4	6,000 lumens overhead	@ 64.00 per year
16	6,000 lumens under-ground	@ 99.00 per year
21	6,000 lumens under-ground	@ 134.00 per year
9	10,000 lumens overhead	@ 72.00 per year
1	10,000 lumens under-ground	@ 117.00 per year
157	17,000 lumens mercury overhead	@ 88.20 per year
32	17,000 lumens mercury overhead	@ 98.20 per year
54	17,000 lumens mercury underground	@ 133.20 per year
36	17,000 lumens mercury underground	@ 168.20 per year
7	20,000 lumens mercury underground	@ 129.60 per year

2	20,000 lumens mercury underground	@ 164.60 per year
3	21,000 lumens fluorescent overhead	@ 112.80 per year
183	21,000 lumens fluorescent underground	@ 157.80 per year
8	21,000 lumens fluorescent underground	@ 192.80 per year

Numerous new lights were installed in the residential sections throughout the City and numerous surveys were made but no large street lighting projects were ordered. Many street light fixtures were found to be in the way of new telephone cables and had to be removed. New fixtures were installed at higher elevations on the poles. In each case, the new street light rate was applied.

During the year, 60 new street lights were installed in different sections of the City.

Due to outages, \$233.30 was credited during the year by the New Bedford Gas & Edison Light Company.

The expenses for the year were:

General Expenses	\$ 213,050.79
------------------	---------------

Respectfully submitted,

WALTER E. MONT,

Inspector of Wires,
Supt. of Street Lights,

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

December 31, 1964

To the Honorable City Council:

Gentlemen:

The Seventy-first Annual Report of the Board of Park Commissioners on Parks, together with reports on Bath Houses, Playgrounds and Militia under the control of this Board, is herewith presented in accordance with provisions of law, for the fiscal year ending December 31, 1964.

The Board held ten regular meetings and three special meetings during the year and voted to dispense with meetings during the months of July and August.

The Board organized in May for the ensuing year, elected Manuel P. S. Macedo as chairman and Carl R. Anderson, secretary. William Smith was reappointed a member of the Park Commission for the term expiring May, 1968. Harrie W. Johnston, a former Board member, was appointed for the term expiring May, 1969.

As of April 14 the control of recreation and programming for Youth Activities, Retarded and Handicapped Children, Playgrounds, Senior Citizens and Bath Houses passed from the Park Department to the Committee on Recreation. The ordinance setting up the Recreation Commission for the City of New Bedford was adopted and signed June 17, 1963.

Stanley A. Brown d/b/a New Bedford Public Links was granted extension of time to July 1, 1965, to pay rental because of land takings September 8, 1964, by the Commonwealth of Massachusetts and the fact that the course would not be restored to its original 18 holes before July 1, 1965.

The Board voted that proceedings be instituted to take by eminent domain land situated on the east side of Rodney French Boulevard for a public recreational center which would be used for a boat ramp to replace the one that was lost.

Land taken by eminent domain for a public playground or recreation center (re: Sylvan Grove Park) was deeded back to Peter J. Duff, L.L., Peter J. Duff, Jr., Remainderman, and Anna Marie Duff, Remainder, now of 1126 Pequot Street.

The concession at Brooklawn Park was awarded to John W. Clauretje of 546 County Street for his bid of \$300.00 for a one (1) year term beginning May 1, 1963 and ending April 30, 1964. The only other bidder was Grace M. Barton with a bid of \$205.00.

Stanley A. Brown d/b/a New Bedford Public Links was granted permission to demolish a garage and erect a 40' x 40' building of cinder blocks or wood to be used as a storage and pro shop.

The New Bedford Exchange Club was granted use of Marine Park for the period August 3rd through the 10th, 1964, to sponsor their Annual Scallop Festival on 7-8-9 August 1964.

The Whalers Drum and Bugle Corps was granted use of Marine Park Tuesday, Wednesday and Thursday nights for rehearsals.

The Polish-American World War Veterans Association was granted use of Brooklawn Park to hold services on Memorial Day at their war memorial.

The Charity Brotherhood of the Holy Ghost was granted permission to use Brooklawn Park for their fiesta June 20-21.

The Feast of the Blessed Sacrament Committee was granted use of the Clarence W. Arey Memorial Bandshell July 30, 31 and August 1 and 2 and use of Riverside Playground for display of fireworks July 30 and August 1.

The first organizational meeting of the Conservation Commission was held June 1. The Commission comprises five members of the Park Board and two appointed members, Jack A. Carvalho and Flora B. Peirce.

Board members went on record as recommending to the Grievance Board that all Park Keepers be put on a 40-hour week at the same annual salary as they are now.

The New Bedford Summer Festival, Inc. was granted use of the site in front of the warming house at Buttonwood Park to sponsor performances August 3 by the Boston Children's Theatre in conjunction with its 3rd Annual Summer Festival.

The corner of Brownell Avenue and Kempton Street was designated to be known as Kelley's Corner for the late Percy A. Kelley, who for many years manned the information booth at that location before his death last December.

The Council of Polish United Organizations of Greater New Bedford was granted permission to rename Sylvan Grove Park the General Casimir Pulaski Park after the Revolutionary hero. The new name would pertain only to the area designated for park purposes and would not include the land tract to be used as a site for a new city school or library.

The Board granted the New Bedford Little Baseball League, Inc., permission to erect a one-story building on land leased to them and known as the Robert J. Lawler Field for use as a combination canteen-garage and restrooms.

Glider-type swings will be replaced in city parks. The Junior Chamber of Commerce have agreed to build the swings, using the Vocational High School facilities.

Requests were received from Athletic Clubs for diamonds during the baseball season in response to a letter asking that all clubs submit their schedules previous to the March Board meeting. This proved to be a most satisfactory procedure, allowing assignments to be made in advance of practice and play.

New Bedford Lodge No. 73 of the Benevolent and Protective Order of Elks of the United States of America was allowed the right to occupy and use the land situated on Van Buren Street known as the Mt. Pleasant No. 4 diamond for the purpose of Pony League Baseball, in consideration of one dollar and other valuable considerations, for the term of five years, from the first day of August 1964.

The Board of Park Commissioners thanks the Mayor and the City Council for their interest and encouragement and also thanks the heads of city departments who contributed in any way to make the work of the Park Department a success.

Respectfully submitted,

MANUEL P. S. MACEDO, Chairman
CARL R. ANDERSON, Secretary
FRANK VIEIRA
WILLIAM SMITH
HARRIE W. JOHNSTON

December 31, 1964

To the Honorable Board of Park Commissioners:

Gentlemen:

I herewith submit my Annual Report of the activities and improvements carried out throughout the entire park system, which includes parks, bath houses, playgrounds and militia.

The work of the department during the past year has been wholly of a maintenance nature. In addition to regular maintenance, marked and urgently needed improvements were made in various parks in the city.

With the support of Mayor Edward F. Harrington and endorsement of the City Council, the Recreation Commission took over the major responsibility of programming and directing recreation personnel, a duty formerly assigned to the Park Department. Ordinance creating the commission was adopted in 1963. The commission acquired jurisdiction in April 1964. Under the separation the Commission will direct the city's recreation programs in the Bath Houses, Playgrounds, Retarded and Handicapped Children, Youth Activities, and Senior Citizens.

In addition to the yearly and seasonal employees, a force of ten men from the House of Correction were used to clear the northwest corner of Brooklawn Park of underbrush. Upon completion of this project, the men transferred to the General Casimir Pulaski Park for a similar clearing program.

The parks have been as well kept as our appropriations would permit, and the flower display at the Common and Buttonwood Park received much favorable comment not only from our citizens, but from visitors to the city. Landscaping and lawns were rehabilitated. Parking lots and ballfields were regraded.

The workshop, and locker rooms and storage building were repaired and painted at Buttonwood Park. A new 1000-gallon gasoline tank was installed at the park. Parking signs were repainted and replaced on new steel posts which were anchored into eighteen inches of concrete. An old animal shed was demolished and the area resurfaced to allow the parking

of the Clarence W. Arey Memorial Bandshell. Catch basins were dug deeper to correct proper overflow. Shrubbery around the Alvin T. Fuller Memorial Parkway facing Brownell Avenue was removed for better road visibility for the motorist.

The No. 1 Hazelwood Bowling Green was rebuilt, and all sod was removed, cultivated, rebuilt, and limed. New sod was installed, rolled and top-dressed. Work on the No. 2 Bowling Green was started; however, only one-third has been completed. Plans and specifications were prepared by Samuel S. Mitchell, golf course architect, with Thomas A. Mason, contractor, d/b/a Mason Farms performing the construction.

A concrete foundation was laid at Hazelwood Recreation House, porches were rebuilt and wrought-iron railings installed. A chain link fence, 80 lin-feet long, was installed from the north gate to the Recreation House. A wooden fence, 839 feet long bordering Hazelwood Park, was installed and painted, replacing the one running north and south along Brock Avenue.

The Victory Park Warming House roof was repaired, steps and porch rebuilt, and the interior painted. Windows were boarded up due to continual vandalism.

Members of the New Bedford Garden Club applied a new coat of paint on the Shanty near the Ricketson House in Brooklawn Park. Landscaping and renovating of the Shanty and adjoining grounds were carried out by Park Department personnel with money raised during a home tour, part of the Dartmouth Tercentenary celebration.

One International half-ton pick-up truck, six mowers, 2 Kohler Lo-Blo Airbrooms, and 6 lawn mowers were added to our equipment.

A three-day pow-wow featuring Indian dances by the Tsunganes of Staurts Draft, Virginia was held at Marine Park.

Under the direction of Walter E. Mont, city wire inspector, hundreds of colored lights were strung at the Common illuminating the Christmas display.

The department participated in the Ninth Annual Spring Flower Show of the Kiwanis Club of Greater New Bedford at Lincoln Park. As with all other exhibitors, a \$50.00 allowance was extended by the Kiwanis Club to help defray costs.

Concerts, sponsored jointly by the City of New Bedford and the Music Performance Trust Fund through the co-operation of Local 214, American Federation of Musicians, were given every week during the summer on week-days and on Sunday afternoons in various parks throughout the city.

Again this year, the New Bedford Vocational High School Automotive Department did the overhauling and repair work on our trucks and tractors, the only expense to the Park Department being for parts.

Attention was paid to the care and comfort of the skaters this winter with competent help in the skating house and officers patrolling the pond.

Although appropriations for maintenance were inadequate for the needs of the department, the most necessary work was accomplished. There are a number of improvements that could be suggested to add to the attractions at the parks but which would necessitate a large financial outlay. I would, however, earnestly recommend these improvements be made when the finances of the department allow it.

In conclusion, I wish to express my appreciation to the Commissioners for the support and co-operation accorded me in the administration of the parks during the past year. To all the staff and employees, I extend thanks for their interest and loyalty at all times.

Respectfully submitted,

EDWARD W. BARRETT,

Superintendent

RIFLE RANGE

Rifle Range usage was once again at a maximum this year. Scheduled organized classes for familiarization and qualification were conducted by the H.Q., 1st Howitzer Battalion, 211th Artillery, Massachusetts Army National Guard.

Classes were held from April through October on the week-ends. In addition to their classes, National Guard Rifle and Pistol teams made ready their small arms for scheduled Mass. State Rifle and Pistol Matches on two occasions. Boy Scout troops with qualified instructors, held their marksmanship classes. A local rifle and pistol club held their annual NRA qualification for marksmanship at the range.

Police Combat Pistol Courses were conducted by this Range Officer on various occasions for Police Officers.

On a two-year basis, 192 permits were issued for civilian usage of the Rifle Range throughout the year.

Considerable improvement to the National Guard truck parking area was accomplished by black-topping 1/2 of the area. Upon completion of the other 1/2, all ruts made by the trucks in the parking area will be eliminated thus ending the washout of the dirt.

At the end of this year, the Rifle Range house experienced two (2) cases of vandalism, the first two incidents since 1956.

The co-operation and interest shown by you and your Department employees in the maintenance of the Rifle Range is very much appreciated by this Range Officer.

Respectfully submitted,

ARTHUR LEE, SMC, USN, Retired
Range Control Officer

Fortieth Annual Report

OF THE

PLANNING BOARD

NEW BEDFORD, MASSACHUSETTS

For the Year 1964

BRADBURY-WARING, INC.

New Bedford, Mass.

1965

PLANNING BOARD REPORT

City of New Bedford

January 1, 1965

To the City Council of the City of New Bedford.

Gentlemen:

The Planning Board submits its Annual Report for the year ending December 31, 1964.

Seven meetings were held during the past year for the purpose of holding hearings on changes on the zoning map. Fifteen petitions for proposed zoning changes were received for consideration by the Planning Board.

A summary of the cases with the action of the Board therein is set forth in the following table.

PETITIONS FOR ZONING CHANGES — 1964

<i>Location</i>	<i>From</i>	<i>To</i>	<i>Recommendation by Board</i>	<i>Date of Meeting</i>
1. East side of Mt. Pleasant Street beginning distant southerly therein eight hundred twenty-eight and 32/100 (828.32) feet, more or less from the southeasterly line of Kings Highway, thence easterly approximately 500 feet more or less, thence southerly approximately 1300 feet more or less, then westerly approximately 570 feet more or less, thence northerly approximately 809.37 feet more or less, being Plot 123, Lot 80 on 1963 New Bedford Assessors Plans.	Business and Residence B	Industrial A	Granted	January 27, 1964
2. Plot 33 of the Plans of Assessors of the City of New Bedford, Lots 9, 10, 11, 12, 13 and 29.	Residence B	Residence A	Tabled Granted	January 27, 1964 June 22, 1964
3. Beginning at a point in the easterly line of Mt. Pleasant Street, distant southerly therein five hundred four and 37/100 (504.37) feet more or less from the southeasterly line of Kings Highway; thence easterly a distance of two hundred (200) feet to a point;	Business and Residence B	Industrial A	Granted	April 27, 1964

thence southerly a distance of two hundred four (204) feet more or less to a point; thence westerly a distance of two hundred thirty-five (235) feet to a point in the easterly line of Mt. Pleasant St.; thence northerly in said easterly line of Mt. Pleasant St., a distance of one hundred ninety-eight feet more or less to the point of beginning, containing 167.91 square rods more or less;

4. Property on the southeast corner of Grape and Field Streets, Plot 35, Lot 301.	Residence A	Business	Granted with Restriction	April 27, 1964
5. An ordinance providing for certain Professional Groups to maintain offices in Residential Areas.			Granted with Restrictions	June 22, 1964
6. Land described on Assessors Plot 105 as Lots 98, 99 and 100.	Residence C	Business	Tabled	June 22, 1964
7. Plot 33 of the Plans of Assessors of the City of New Bedford, Lots 9, 10, 11, 12, 13 and 29.	Residence B	Residence A	Granted	June 22, 1964
8. Lot 156 on Plan of Stackhouse lots, beginning at a point in the north line of Rockdale Avenue easterly therein 54.93 feet from its intersection with the easterly line of Stackhouse Street;	Residence B	Business	Granted	September 28, 1964

PETITIONS FOR ZONING CHANGES — 1964

<i>Location</i>	<i>From</i>	<i>To</i>	<i>Recommendation by Board</i>	<i>Date of Meeting</i>
thence northerly in an easterly line of Lot 157 on said plan, 91.52 feet to a point in the southerly line of Lot 152 on said plan; thence easterly 45 feet to the northwesterly corner of Lot 153 on said plan; southerly 123.06 feet in the westerly line of said Lot 153 and Lot 155 on said plan to the said northerly line of Rockdale Avenue, 54.93 feet to the point of beginning, containing 17.73 square rods.				
9. Ordinance creating new zoning classifications:			Tabled	October 26, 1964
Residence AA, a single family district which is more restricted than the existing Residence A district.				
Residence CC, a multi-family residence district designed for Garden Apartments.				
Community Business District, with requirements for set-backs and off-street parking.				

Special Business District, intended to protect the waterfront Historic Area.

10.	Plot 88, Lot 2 and Plot 89, Lot 257 and that portion of Plot 89, Lot 1 presently zoned Residence B.	Residence B	Residence CC	Denied	November 23, 1964
11.	South side of Hathaway Road, from contemplated Wrentham Street westerly to Rowe Street and southerly to Route 195.	Residence B	Business	Granted	November 23, 1964
12.	Lot 5 on Plot 94. Property abutting Sullivan's Ledge.	Residence B	Business	Granted	November 23, 1964
13.	Both sides of Holly Tree Lane from Phillips Road easterly to 100' west of Hillcrest Road for the depth of lots on both sides of the street, also all of Lot 3 on Plot 134D.	Business and Residence B	Residence A	Granted	November 23, 1964
14.	East side of Rodney French Boulevard (East) from the Hurricane Dike southerly to the East Beach.	Industrial A	Residence A	Denied	December 21, 1964
15.	Southwest corner of Mott Street and Rodney French Boulevard (East).	Business and Residence C	Residence B	Denied	December 21, 1964

Thirty-ninth Annual Report

OF THE

BOARD OF APPEALS

NEW BEDFORD, MASSACHUSETTS

For the Year 1964

BOARD OF APPEALS

City of New Bedford

January 1, 1965

To the City Council of the City of New Bedford.

Gentlemen:

The Board of Appeals submits its Annual Report for the year ending December 31, 1964.

Meetings were held on the first and third Wednesdays of each month except when there were no appeals.

Nineteen appeals, under the Zoning Ordinance were received for consideration during the year. Five of these appeals were granted, five were denied, and nine were granted conditionally.

A summary of the cases, with the action of the Board is set forth in the following table.

** Granted Conditionally*

<i>No.</i>	<i>Nature</i>	<i>Location</i>	<i>District</i>	<i>Date of Hearing</i>	<i>Action</i>
1648	To alter a large dwelling so as to provide nine apartments	180 Walnut St.	Residence C	January 22, 1964	Granted*
1649	To alter a thirteen room, one family dwelling to provide six apartments	4 Orchard St.	Residence A	March 18, 1964 April 1, 1964	Tabled Granted*
1650	To alter a large one family dwelling to provide another apartment	132 School St.	Residence A	April 1, 1964	Granted
1651	To build an addition to the Savoy Convalescent Home — to be larger than that which was granted August 7, 1963 — Case No. 1639	670 County St.	Residence A	April 15, 1964 May 6, 1964	Tabled Granted*
1652	To alter a garage for use as a doctor's office	100 Spring St.	Residence C	May 6, 1964	Granted
1653	To add to an existing 11' x 20' garage to provide a 16' x 42' kitchen for catering purposes	rear of 678 Cottage St.	Residence B	May 6, 1964	Granted
1654	To alter a dwelling to provide for four apartments	135 Cottage St.	Residence A	June 3, 1964 June 17, 1964	Tabled Granted
1655	To use a non-conforming store building as an office and conference room for salesmen	263 Reed St.	Residence A	June 17, 1964	Denied
1656	To erect an addition to a nursing and convalescent home. The addition would consist of adding one more floor to an existing building	9 Pope St.	Residence B	August 19, 1964	Denied

<i>No.</i>	<i>Nature</i>	<i>Location</i>	<i>District</i>	<i>Date of Hearing</i>	<i>Action</i>
1657	To increase the size of an off-street parking lot	106 Spring St.	Residence C	August 19, 1964	Granted
1658	To demolish the upper floors of a large one family residence, utilize the foundation walls, cellar and first floor and build a professional office building to accommodate six dentists	731 County St.	Residence A	September 16, 1964 September 30, 1964	Tabled Granted*
1659	To alter a building recently used as a garage and a doctor's office, for use as a one family dwelling	175 Cottage St.	Residence A	October 7, 1964	Granted*
1660	To make alterations to a two family house to provide three additional apartments	74 North St.	Residence B	October 21, 1964	Denied

REMARKS AND RECOMMENDATIONS

In the year of 1964, four (4) officers retired, eight (8) died — two active and six retired officers, and nine (9) patrolmen were appointed to the Department.

The work of painting and replacing deteriorated wood-work on the exterior of Police Headquarters was completed. Remaining to be done is pointing up brick work.

Asphalt tile flooring was laid by Vocational High School students in the corridor on the second floor, in the Juvenile Division Room, and in the Special Investigating Unit Room. These areas had no covering except the hard pine flooring installed when the building was erected.

Fifty 'No Parking' signs were acquired. This acquisition alleviated an extreme shortage of such signs thereby minimizing the traffic hazards of our motorists and pedestrians.

Eight new patrol cars were obtained. They replaced eight older motor vehicles each of which had traveled approximately 200,000 miles. Some of these cars were operating on their third replacement motor.

This is the first time that the Department has bought Police Special vehicles. Previously the regular automobile, which is available to the general public, was used. I believe that the superior performance of the Police Special will more than justify the slightly higher cost involved.

Our Department has leased a Xerox Photo Copy machine this year. The precise work performed by this machine is of better quality and a marked improvement over that of the previously owned machine. Favorable comment from Attorneys, Insurance Agents, etc., testify to this.

RECOMMENDATIONS FOR 1965

It is respectfully requested that the following equipment be acquired for the maintenance and improvement of Police Services:

An Oil Burner and Boiler. To replace a coal burning furnace which is approximately forty (40) years old and in constant need of repair. This oil burner would supplement another oil burner now being operated in conjunction with the coal burning furnace and which is greatly overtaxed.

Three station wagons. To replace the three station wagons now in use. Each one of these vehicles has a speedometer reading of better than 100,000 miles and each one is functioning by means of a rebuilt replacement motor.

Safety helmets. During 1964, mob violence was prevalent in many areas where it was deemed unlikely to occur. As a precautionary measure in order to be prepared for any such eventuality, it is recommended that one hundred (100) be provided.

Mobile Radios. In order that the Police Department be equipped to provide 100% radio service, it is recommended that our four (4) motorcycles be furnished with radio apparatus.

Aluminum Railings. On the Spring Street side and on the South Second Street side of Police Headquarters, there are outside stairways leading to the first floor of the building. It is recommended that aluminum railings be installed as a safety measure for the protection of the public.

Filing Cabinets. There is a need for three (3) filing cabinets.

Typewriters. Many of our manual operated typewriters are fifteen (15) to twenty (20) years old. It is recommended that two (2) be replaced with new manual operated typewriters.

Wax Buffer. In order to lessen the work of our custodians and expedite a time consuming chore, a request is made for the acquisition of a rotary buffer.

I take this opportunity to extend my sincere appreciation to His Honor, Mayor Edward F. Harrington, and

the City Council. They have been most cooperative in the matters which concern the Police Department and the City. As in the past, the heads of all our city departments have been of tremendous help to us. Without the assistance of them and their co-workers, the cost of maintenance of the Police Building would increase noticeably. We are thankful for the pleasant relations we enjoy with newspaper, radios and television personnel. The reporters who cover police news are cognizant of and understand the problems that continually beset police and we appreciate their respect of our confidence, when necessary.

There has been a transition of Police Practice and Procedure in law enforcement that has been taking place throughout the country during the past several years. Realization that the public is aware of this and that it is also acquainted with the ramifications attached thereto has spurred police to greater efforts in combatting crime and its attendant circumstances.

The New Bedford Police Department is continually striving to improve and further services which can only result in better protection and safety for the lives and property of our citizens.

THOMAS F. CAWLEY,

Chief of Police

Joseph A. Sciuto, M.D.
Victor Rebello, Jr.
Board Members

Leo S. Harrington
Director of Public Assistance

To His Honor, the Mayor, and to Members of the City Council of the City of New Bedford:

Gentlemen:

The Board of Public Welfare respectfully submits its annual report for the year 1964:

Gross expenditures for all public assistance programs administered by the New Bedford Board of Public Welfare amounted to \$7,238,104.67. With gross receipts from all sources amounting to \$6,201,044.94, this resulted in a net cost to the City of \$1,217,059.73 which was an increase of \$768,309.47 over the expenditures for 1963.

Vendor payments for medical care totaled \$2,333,153.66 which represented an increase of \$192,609.25 over the 1963 expenditures for these services.

Whereas Old Age Assistance and General Relief showed case load decreases of 155 and 19 respectively, these were more than offset by increases of 186 in the Medical Assistance for the Aged, 122 in Aid to Families with Dependent Children and 52 in the Disability Assistance categories, a net increase of 186 cases.

As of January 1, 1964, new increased hospital rates were put into effect, and during the year, rates for certain nursing homes were increased. Visiting Nurses' Association rates were also increased on October 1, 1964.

Of interest to note is the fact that after a public hearing, the Medical Care Plan of the State Department of Public Welfare was legally adopted on February 10, 1964. This is the medical care plan under which all local Boards of Public Welfare have been operating since July 1, 1954. Local Boards had been informed that failure to comply with the State Department Medical Care Plan would result in a loss of reimbursement.

One forward step taken by the State Department of Public Welfare in eliminating paper work and unnecessary handling of case records was the instruction that as of June 1, 1964, the fuel item allowance in the recipient's budget was to be placed on a year round basis. Prior to this, recipients' budgets had to be adjusted twice yearly to effect the seasonal fuel change which caused unnecessary concern and distress for the recipient and added work for the social and fiscal staff.

Choice of the recipient in selecting his own pharmacy was extended as of July 9, 1964, by enactment of Chapter 273 to recipients of Old Age Assistance in nursing and rest homes. This in no way affected recipients of aid from this Department, as it has been the policy of the Board of Public Welfare to allow this for recipients of aid in all categories.

As a follow-up of the abolishment of settlements in General Relief, the legislature enacted Chapter 339 of the Acts of 1964 which removed from the Department and the Board of Public Welfare the responsibility for determination of legal settlement as well as for the cost of care of persons infected by diseases dangerous to the public health.

By an amendment to the Old Age Assistance Law, effective as of September 1, 1964, leisure time activities for recipients was increased by \$1.00 monthly per person.

Burial costs were increased as of September 7, 1964, by the adoption of Chapter 479 of the Acts of 1964 to provide for an increased ceiling of \$400.00 for Old Age Assistance burials, and for the application of a resource to this maximum cost.

Chapter 515 of the Acts of 1964 effective as of September 10, 1964, extended responsibility of the Boards of Public Welfare for expense of hospitalization of needy persons for a period not exceeding 30 days prior to the date of request for such assistance.

In September the exemptions of married children of Old Age Assistance and Medical Assistance for the Aged recipients was increased from \$4,750.00 to \$6,000.00 annually, and the exemption for the married child's dependent child was increased from \$600.00 to \$1,200.00 annually. This action served to wipe out liability for support for most of the married children of parents aided through these categories.

The Medical Assistance for the Aged law was amended to provide that the combined monthly income exemption of \$225.00 for married persons applies regardless of which spouse is the applicant. Previously a differentiation was made if the man was the applicant and the wife was not applying, and vice versa.

On November 10, 1964, the rule relating to transfer of real estate for a Medical Assistance for the Aged applicant was suspended until further notice. Prior to this time, the State Department of Public Welfare had ruled that a transfer of real estate within one year of application was a factor affecting eligibility.

The State Department of Public Welfare revised the policy for evaluating resources in the Disability Assistance category so that only resources which are actually being received by a recipient may be deducted. This corrects an inequity that had existed in this category, whereby, formerly if it was determined that there was a resource, this had to be applied to a recipient's budgetary needs whether or not the resource was actually available to the recipient.

One of the most dramatic changes in federal law which will have unpredicted lasting changes on the public welfare programs in the United States came about with the signing by President Johnson on August 20, 1964, of the Economic Opportunity Act of 1964. This "Anti-Poverty" program is designed to seek out and determine the causes of poverty, and to take immediate remedial and corrective action to alleviate and eliminate it. This law, to be administered through various government

agencies, consists of Youth Programs, Urban and Rural Community Action Programs, a Special Program to Combat Poverty in Rural Areas, Employment and Investment Incentives and Work Experience Programs.

It is to be hoped that the end result will be a breaking of the poverty cycle and the uplifting of the mode and standard of living of persons deprived because of their circumstances due to mental and physical handicaps, inadequate educational background, geographical location in under-developed and under-employment areas, and all other factors which have kept them in the poverty spectrum. This end accomplishment will not be had within a period of one, two or any specified number of years, but this law is a ray of hope, and the seeds to abolish poverty have been sown, and every effort and encouragement should be given by each and every person in this country to attain a successful fruition of the desires and aims of the Anti-Poverty Program.

The need for added space to effectively administer the programs of the Welfare Department is critical. It is to be hoped that in the future some means will be found to furnish this Department with adequate working facilities which will reflect to the credit of the community. Inadequate floor space, poor lighting and heating, over-crowded desk space, and the use of a corridor for office functions does not make for ideal working conditions for employees who are administering programs of such magnitude.

Over the years the programs grow in scope and services, and as they do, additional personnel and necessary furniture and equipment are required. Our need for additional office space is acute with our present force — to think of additional personnel, furniture and equipment without an expansion or addition of office facilities would be asking the impossible. Other than ideal working conditions does not foster efficiency or improve the morale of employees.

We wish to extend our sincere appreciation to the Honorable Mayor and Members of the City Council, Heads of other City Departments, Mr. James A. Donnelly, District Director of the Massachusetts Department of Public Welfare and his staff, to the many public and private agencies and businesses who have generously cooperated with this department, and to the members of our own staff, all of whom have contributed greatly in the successful administration of the many faceted welfare programs.

Respectfully submitted,

LEO S. HARRINGTON,

Director of Public Assistance

Annual Report

OF THE

**CITY PURCHASING
DEPARTMENT**

**CITY OF NEW BEDFORD
MASSACHUSETTS**

For the Year 1964

BRADBURY-WARING, INC.
Printers
1965

December 31, 1964

The Honorable Mayor and City Council
City of New Bedford
New Bedford, Massachusetts

Gentlemen:

We have the pleasure of submitting to you our report for year 1964.

We have continued to work closely with all of the City departments in an effort to effect for them every saving possible and we are grateful for your cooperation in our endeavors in this direction.

Your continued confidence in this Department has provided the incentive for what has been accomplished.

Respectfully submitted,

FERNANDO P. CRUZ

Purchasing Agent

CITY OF NEW BEDFORD, MASSACHUSETTS PURCHASING DEPARTMENT

REPORT OF THE PURCHASING DEPARTMENT — 1964

The work load of the Purchasing Department during 1964, the eighth full year of its operation, is summarized in the schedules of Requisitions, Purchase Orders and Contracts listed on the following pages.

The City Ordinance provides that the Purchasing Department is responsible for procurement of all supplies and contractual services required by any department which derives its support wholly or in part from City funds, with the exception of professional expert consultant or similar contractual services. The Department is also responsible for the disposal of all surplus scrap and unusable materials.

The operating expense for 1964 follows:

Salaries and Wages	\$ 13,773.50
General Expenses	1,941.03
	<hr/>
	\$ 15,714.53

Purchases of miscellaneous small items, usually required immediately, are made promptly after prices have been checked. On items involving less than \$200.00 competitive bids are invited by telephone, on items over \$200.00 by mail and on special equipment bids are advertised. Contracts are issued on purchases involving \$500.00 or more.

All advertised bids are received sealed by the Purchasing Department, and are opened and read in public and a summary of the bids prepared and posted on the Bulletin Board. When inviting bids on contract purchases and on purchases under \$500.00 efforts have been made to include all known concerns in New Bedford who are in a position to submit bids, and many contracts and purchase orders have been awarded to New Bedford business companies.

The trend of commodity prices has continued to increase. Notwithstanding this trend, there have been many purchases for the City at prices lower than had been paid for the same items during the previous year.

It has been the practice of the Purchasing Department to arrange for cash discounts whenever possible and there is a record of over 400 Sellers who regularly allow discounts on purchases made by the City.

Procurement has been handled by the Purchasing Department in accordance with the provisions of the Ordinances of the City, thus protecting the City from such irregularities as deliveries being made without written orders, orders written from invoices, purchases divided to avoid preparing contracts, and accounts encumbered after commitments had been made.

The City is exempted by law from payment of Federal Excise Taxes and it has been the policy of the Purchasing Department to provide exemption certificates to cover such taxes where taxes may have been paid previously. Purchases of motor passenger cars, motor trucks, batteries and other automotive equipment are covered by exemption certificates.

CONTRACTS

Formal Contracts are required to authorize purchases of \$500.00 or more and 176 such contracts were written during 1964. Contracts are drawn up by the individual departments and mailed out for Contractor's signature after which they are returned to the Purchasing Department and processed.

No work is permitted until contract and bond have been approved by the City Solicitor and signed by the Mayor.

Many contracts were issued for future delivery on an established price basis for supplies used by various departments, resulting in uniform quality and minimum cost. Such contracts are based on total requirements with no guarantee of quantity.

Much progress has been made during 1964 in expediting processing of contract documents but the interval from award to execution approximates seven days and efforts will continue to reduce this interval.

SAVINGS:

There appears to be no yardstick by which over-all savings through centralized purchasing can be accurately determined. Certain definite savings over prices previously paid under similar market conditions, or prices known to be under the prevailing market, have been recorded and details are available from the Purchasing Department files. Because of the varied types of work covered by construction contracts, there is no definite basis for comparison of costs, but the wide circulation given to Invitation to Bid has undoubtedly resulted in substantial savings to the City.

RECREATION COMMISSION OFFICE

Room 201

Municipal Building

December 31, 1964

To the Honorable City Council:

Gentlemen:

The FIRST Annual Report of the Recreation Commission is herewith presented for the year ending December 31, 1964.

The Recreation Commission comprised of nine members, having been established by ordinance on May 27, 1963 became a separate entity when budgetary power was assigned by the City Council on April 6, 1964.

All personnel formerly connected with the recreational program division of the Park department was transferred to the Recreation Commission and the Commission was assigned office space in room 201 — City Hall.

The Recreation department was set up this year as a start toward fulfilling the concept of recreation as the “constructive” and wholesome use of leisure time for all citizens of all ages of our city on a year around basis.

As an initial step, the department was organized with five (5) specific areas of responsibilities designated to specific responsible members of the staff, who in turn were responsible to the Director of Recreation.

DIRECTOR OF RECREATION

- | | |
|-----------------------------|--------------------|
| 1. Water Activities | 3. Youth and Teens |
| 2. Playgrounds | 4. Senior Citizens |
| 5. Retarded and Handicapped | |

RECREATION COMMISSION

This new approach created a stimulating atmosphere so that many new programs were evolved within the limited budget.

We believe that the **KEY** to a successful program is the trained and qualified leadership which the city **can** and **must** avail itself. With the cooperation of the Park Department in maintaining and improving the physical facilities and the cooperation of other departments, our recreational program will grow so that **SOME DAY** every neighborhood will have "Tot Lots" for small children with properly scaled equipment and with seating facilities for their mothers.

We look forward to the time when sufficient ball fields (including soccer fields) will be made available to boys and girls and adults; and the increased use of municipal buildings which will allow more comprehensive winter recreational programs.

Recreation also encompasses passive activity so necessary for senior citizens and the handicapped. The addition of benches throughout our city would be a welcome step in this direction.

With cooperation between personnel of all departments, increased training of all staff, and the support of the public, our city shall become a healthier and happier community for all our citizens of all ages.

RECREATION DIRECTOR'S REPORT

To the Board of Recreation Commissioners:

Dear Members:

Herewith is submitted the report of the activities of the Recreation department for the year ending 1964.

1. WATER ACTIVITIES — Mr. Herbert Rego, Head Supervisor

Beaches:

The swimming season opened Sunday, June 14, 1964 with twenty-four lifeguards to cover the East and West Beaches.

For the first time, all guards were required to take a pre-season training course before they were hired from the Civil Service list. The clinic consisted of two training sessions which were held on Saturdays June 6th and 13th from 10 A.M. — 12 noon and 1 P.M. — 4 P.M. and Monday evening June 15th from 7 — 9 P.M. The course consisted of instruction in First Aid, Artificial respiration, Life saving, Practice use of Surfboards, and discussions on Lifeguard Rules and Regulations, beach personnel organizational set-up etc. Instructors for the course were Mr. Roy Taylor, Executive Director New Bedford Chapter Red Cross, Mr. Albert Sylvia, Physical Director of the Y.M.C.A., Mrs. Mary Dean, School department swimming instructor, Mrs. Genevieve Townley, Recreation Commission swimming instructor, Edward J. Lowney and myself. The Clinic proved most helpful and very informative.

A most welcome improvement in Guard supervision was made this season by the assignment of three Guard Captains who also were made Special Police Officers. This meant that all lifeguards were directly supervised in all areas and the Guard Captain could deal more adequately with unforeseen emergencies with the public.

Free swimming instructions for New Bedford residents ranging from Novice thru Senior Life-saving were held under the supervision of Mrs. Genevieve Townley, who was assisted by leaders Barbara Bourbeau and Kathleen Marr. The classes were held six days a week from June 29th thru August 28th. The program ended with the Annual Water Show on August 28th.

Competitive swimming lessons and sailing instruction were introduced this season under the guidance of Mrs. Beatrice Whalen and Mr. George Crook. Each course had lessons twice weekly.

The West Beach was closed to bathers from June 22nd to July 3rd, due to raw sewerage being pumped accidentally into Clark's Cove. Army officials were very cooperative in permitting the use of Ft. Rodman bathing facilities until the pollution was cleared.

There were 43 water mishaps which could have been fatal except for the alert, qualified and competent personnel on duty. There was a total of 248 First Aid cases, 156 at the East Beach and 92 at the West Beach. I would like to commend the New Bedford Police department for their courteous and efficient handling of all cases that needed professional care.

On July 20th, a tent to be used as a "temporary" First Aid station on East Beach was erected and a qualified attendant assigned for duty. Although this proved serviceable, it would be more prudent to build a permanent structure.

The Annual "two mile swim" was held Sunday, August 9th. Officials of the ever popular and successful event were Fairhaven Selectman James Lanagan — Starter, Mr. Irving Davids and Mrs. Beatrice "Trixie" Whalen — Judges. Mr. Lowney and Mr. Raymond Thomas, Commander Post I American Legion presented the awards to the first five who finished. Messrs. John Brown, John Pavao, and Manuel Sylvia donated their boats and services during the race.

The Annual "Swim Carnival" was held Sunday, August 16th. Mr. Albert Sylvia served as Starter with Irving Davids, George Crook and Beatrice Whalen as Judges. A total of thirty-two trophies were presented to the winners in the various events by Councillor Ralph J. Saulnier.

Rafts were brought in September 10th and the beaches were officially closed on Saturday, September 12, 1964.

Respectfully submitted,

HERBERT REGO,

Head Lifeguard and
Bath House Maintenance Man

Swimming (General) — Genevieve Townley, Supervisor

Enrollment of students for swimming instruction began June 22nd and terminated June 30th with a total enrollment of 326.

Swimming instruction began July 2nd and concluded August 28th.

The extremely cold weather and pollution scare hindered the attendance this season. These were the two factors for the high number of drop-outs. However, the number of students who persevered and successfully completed the course was very commendable.

Total enrollment	326
Never Came	29
	<hr/>
	297
Qualified for Red Cross Certificates	141
Failed due to Fear or Lack of confidence	41
Received instruction — learned to swim fairly well but dropped out before completion of course	115

Of the 115 — various reasons were offered such as — illness, water too cold, went to camp, went on family vacations, lack of transportation.

Age group of greatest number served — 9, 10, 11 and 12.

Swimming (Competitive)

— Beatrice "Trixie" Whalen, Instructor

Date commenced — 6/30/64 Completed 8/18/64

Number registered — 23 Completed course — 17

Average class attendance — 11

Age group most served — 13, 14 and 15

Hours conducted — Tuesday and Thursday from 10 to 12 A.M.

It is my opinion that this course has been a productive one, in so far as possible, considering the nature of the weather, short planning period, limited facilities, etc. Those however who did attend regularly showed interest, willingness and hardiness needed for competitive swimming and progressed reasonably well under the adverse conditions.

Instructions could be improved immeasurably by establishing a 50 meter (55 yd.) course with removable lanes with a starting platform at one end and a turning surface at the opposite point.

Swimming (Indoor Pool) — Mr. Herbert Rego, Supervisor

This program which was initiated this year by the rental of the pool and facilities of the Y.W.C.A. and the use of our permanent staff members, Mr. Rego as instructor and Norman Fletcher as Guard and assistant, was enthusiastically received by the youngsters both boys and girls in the age group of 12 - 16. Classes twice weekly from 4 P.M. to 6 P.M. were conducted for a period of 10 weeks. Many youngsters were reached and taught the important fundamentals of swimming and water safety who for various reasons had never had the opportunity of joining seasonal beach instruction classes.

The "Carry-over" value of such a program has certainly justified its continuance.

Number of students who received their Red Cross Certificates in the Beginners, Advanced Beginners and Intermediates totaled 77 and number of students altogether receiving instruction was 150.

**2. PLAYGROUNDS — Rosemary Moore and George Pires,
Recreation Supervisors**

The 1964 summer playground season consisted of a nine-week program with fourteen playgrounds in full operation and thirty-six persons employed. Ottiwell playground was closed this year due to a lack of attendance and the proximity of Riverside, only two blocks away. The pond at Brooklawn Park was also supervised by assigned leaders during the regular playground hours.

A varied and well planned arts and crafts schedule, both entertaining and educational was incorporated into the nine-week program. Two arts and crafts specialists were assigned to visit each playground regularly. Linda Zawalski, supervisor was assisted by Mrs. Iris Shaw, advisor and consultant. The finished products were exhibited in the large display window of the Star Store.

The H. P. Hood & Sons Milk Company offered the New Bedford Recreation Commission its full cooperation in conducting a Physical Fitness program and also donated trophies to winners in all events.

Once again Librarian James S. Healey and Mrs. Catherine Bell made it possible for the Bookmobile to make regularly scheduled visits to the playgrounds. Also, on August 10th, 12th and 14th, a children's program was offered at the branch libraries to children ages four to eight years which consisted of story telling and folk songs by Mrs. Charles S. Heyman.

City-wide contests were held each Friday morning on the respective playgrounds. On Friday afternoon, thru the co-operation of the Park department personnel, the individual winners were transported to the centrally located Common Park, to participate in the final judging and awarding of prizes. The following competitions were offered: costume parade, pet show, bicycle parade, doll carriage parade, quick draw, doll contest and bubble gum contest.

Leagues were formed in baseball and basketball for boys and the three divisional champions met at Buttonwood Park in a playoff to determine the City Champs. All-star teams competed against Ted Williams camp and Tabor Academy. Monte, Middle and Ashley Playgrounds represented the New Bedford playgrounds in a softball tournament held in Dartmouth. A city-wide horseshoe tourney was held at the Common Park to determine winners in both singles and doubles events. Trophies were awarded to winners in both classes.

For the FIRST time the girls of the city had an opportunity to participate in organized volleyball and softball leagues as well as informal competition in horseshoes, basketball and social games. The girl playground leaders acted as coaches. The volleyball finals were held at Buttonwood Park during the last week of the season with this result: 1st place – Monte, 2nd place – Brooklawn, and 3rd place – Campbell. Monte was also the 1st place winner in the softball competition.

The annual Lincoln Park outing was held on August 13th and proved to be a great success. One thousand boys and girls were transported to and from Lincoln Park by bus and were served refreshments by the Recreation Commission and thru the courtesy of local merchants.

Many innovations were added this season by the Commission:

A two-day training clinic was conducted to orientate the newly appointed leaders. Purpose of this program was to acquaint the leaders with the aims and policies of the Commission. The supervisory staff acquainted them with what they would be expected to do in the areas of first aid, athletic, recreational and social activities and arts and crafts.

A staff meeting was held each Monday morning from 9 to 10 A.M., at which time leaders and supervisors discussed objectively any problems they had encountered and discussed coming events and activities.

An official uniform was established for the leaders which consisted of a white blouse with a Commission emblem and navy blue bermuda shorts for the girls and white T-shirt with Commission emblem and chino slacks for the boys.

Art classes (sketching) at the three major parks was initiated jointly with the cooperation of Jack Ward of the Y.M.C.A. Free lessons under qualified art teachers were enthusiastically received and attendance was very good.

Each playground held an extremely successful Carnival Day which consisted of displays of talent, competitive games with inexpensive prizes distributed and with refreshments served.

Under the guidance of each girl playground leader, a selected group of interested youngsters composed an original song and created a display from materials supplied by their arts and crafts classes which symbolized their individual playground and then competed with other playgrounds at a "Sing-a-long" held at Buttonwood Park at which time the children brought their lunches and were provided with soda. Entries were judged on the basis of originality and craftsmanship.

Further improvements and innovations will be of prime consideration for next season.

3. YOUTH and TEENS

Tennis — Manuel Sumares, Supervisor

A Spring-time Tennis instruction program was set up to reach youngsters in the three areas of the city and to teach them the fundamentals. Saturday classes were held at various

times at Hazelwood Park, Harrington playground and Brooklawn Park. At the conclusion of the course certificates were given to all students and trophies were awarded to winners in the novice tournament singles and doubles. Mr. Manuel Sumares, well known area tennis star, was ably assisted by Miss Jan Aillery.

**School Gyms — Jack Nobrega, John Pina, Marcia Foucart,
and Jeanne Levesque, Supervisors**

Through the cooperation of the School Committee, the Commission was able to utilize the three Junior High gymnasiums on a five night a week basis and this season made showers available to the players. In an effort to serve all age groups, new programs were offered to adults both men and women under the qualified leadership of local coaches and teachers. This was in addition to the regular programs for teen age boys and girls.

Following every effort publicity-wise, it became apparent that female teens and adults did not have sufficient interest in the classes and so, following a mid-season evaluation, this particular segment was dropped and replaced with additional basketball programs for teen age boys.

In addition to its own regularly scheduled programs, the Commission cooperated with the following leagues by permitting them use of the facilities.

New Bedford Super Market Basketball League
North End Youth Athletic League
Bay State Little League
South End Youth Athletic League
Jewish Community Center

Fishing — James T. Bicker, Supervisor

The Junior Fishing Derby was again held for a period of twelve Saturdays at Buttonwood Park Pond. A total of 387 fish were caught by the 160 youngsters who had obtained permits to fish. The largest fish of the season was a 2-lb. Bass while the smallest weighed in at 1/64 oz.

This season, weekly prizes were eliminated and a weekly point system was set up. August 22nd was Derby Day and at this time, the prizes were awarded to the highest point

scorers. Top Fisherman title was earned by Brian Lamontagne, age 11, who scored the most points and caught a total of 56 fish in addition to the honor of having caught the largest one. In addition to prizes donated by the City of New Bedford, the following local merchants were donors: Charlie's Sports, Fairhaven Lumber Co., Hobby Town, Standard-Times, Smith's Sports and Traver's Sports.

On May 24th, under the auspices of the Commission, a Fishing Clinic was held from 2:30 — 5:30 P.M. Max Augustine, President of the New Bedford Stream and Lakers Club, instructed the children in the selection and proper use of fishing paraphernalia.

4. SENIOR CITIZENS — James T. Bicker, Supervisor
Miriam I. Shaw,
Arts and Crafts Instructor

Beginning as a single session at our Y.W.C.A. Center, the arts and crafts program was enlarged to alleviate transportation expense and classes were extended to the North and South End branch libraries with the cooperation of Librarian James S. Healey. Mrs. Iris Shaw has found an increased interest and attendance at the classes with many and varied articles being completed. Current project is the assembling of useful kits to be distributed to Nursing Home patients.

The "Drop-in Center" on Pleasant Street continues to attract many residents who enjoy the various recreational and social activities available there.

A total of 12 Bus trips to places of interest were sponsored by the Commission and by working closely with area Golden Age Groups who assisted greatly with the organizing and planning, many interesting visits were enjoyed at a low cost such as: Fenway Park Ball Game, Brockton Fair, Springfield Fair, Nantasket Beach, Whalon and Capron Parks and Quabbin reservoir. The season ended on a happy note with a Christmas party at Gaudette's Pavilion which we hope will be an Annual affair.

Mr. Gilbert C. Tousignant, Commission member, was instrumental in obtaining the interest of the New Bedford Area Retired Worker's Council of the United Auto Workers, and because of their interest, the council made generous financial gifts to provide arts and crafts materials, prizes for game parties and to reduce Bus trip expense.

I sincerely feel that the Recreation Commission has, since its inception April 6, 1964, proven that trained persons, whose prime concern is recreation, have begun to accomplish many of the things for which the Commission was incorporated.

It has been a distinct pleasure to work under a Commission who is so desirous of improving the overall Recreation picture in New Bedford.

All personnel have been extremely cooperative in expediting new programs and improving old programs. This cooperation and understanding will surely continue to bear fruit in future endeavors.

Respectfully submitted,

EDWARD J. LOWNEY,
Director of Recreation

5. RETARDED and HANDICAPPED

— Mrs. Gladys M. Boyd, Director

The fourth season of the Summer Recreation program for Retarded children was held at the Center for Retarded children, at 247 Smith Street. The eight-week program was held from June 29 through August 21, from 10 A.M. to 3 P.M. daily. Taxi service was provided for the children.

Fifty-nine children were in daily attendance. The number increases each summer as more parents learn of the services offered for their children. The term "children" refers to their mental age. Chronologically, the ages ranged from under four to forty.

Registrations are carefully screened, as no child is accepted if his needs can be met in any other program. All facilities, equipment and programs are specially planned for the severely retarded.

The daily program is planned to follow as closely as possible that of any day camp for normal children. It includes physical education, sports, games, arts, crafts, music and special events. There is, however, one essential difference. Careful case histories are compiled for each child. His strengths, weaknesses and special needs are carefully studied, and plans

made and carried out to meet the individual requirements of each. At the end of the season, these records are re-evaluated and submitted to the Division of Special Education. The staff of professionally qualified counselors is carefully selected.

In addition to the regular staff, volunteer workers from Keith Junior High School, and others, help us to carry out the daily plans. Without their help, it would not be possible to give the children the individual help they require. No regular lunch hour is possible for the staff, but every effort is made to give each member a ten minute break during the children's rest period.

In addition to the hours with the children, each staff member works an average of fifteen hours each week in planning, preparation and constant evaluation of the needs of each child.

Special events during the summer included a "Safety Town" program in which every child participated. A day's outing at Blueberry Hill, in South Dartmouth, included hay rides and a wiener roast. The children were taken to Buttonwood Park to feed the animals. Various friends and organizations entertained with music and dancing. Peanut hunts, field days and special parties were held.

At the end of the summer, placid over-weight children had lost some weight and become more active. Brain damaged hyper-active children had learned to take part in quiet activities. Every child made some progress. In many cases, the progress was outstanding.

The Winter program consisted of thirteen older children. This program was established primarily for young people who are over-age for public school trainable classes, and are not capable of employment. This group meets every afternoon of the school year. The summer Recreation Director is also the counselor for this class.

The emphasis is upon sports, games, character training, the training of the hands through arts and crafts and simple domestic skills.

Plans are in progress to expand this program in 1965 to include children too severely retarded to attend public school classes.

Respectfully submitted,

GLADYS M. BOYD,
Director

Assistant Superintendent
Elementary Education

Mr. Philip Bronsiegel
Assistant Superintendent
Secondary Education

Office of
Superintendent of Schools
New Bedford, Mass.

December 28, 1964

Honorable School Committee
New Bedford, Massachusetts

Mrs. Ferreira and Gentlemen:

In accordance with the laws of the Commonwealth and the adopted policies of the New Bedford School Committee, I have the honor of submitting my fourth annual report as Superintendent and the one hundred and fourth annual report of the New Bedford Public Schools.

To combine the desirable with the possible in the proper proportion to insure the continued educational growth of the children of New Bedford has been our aim during the past year and will continue to be the goal for the coming year. How much of the desirable has been made possible is realized especially at this time of the year when the annual reports of the two assistant superintendents, principal of the high school and the directors are studied. The administration of the fifth largest school system in Massachusetts enrolling 15,000 students and operating with a budget of over five and one half million dollars must necessarily depend upon the cooperative efforts of many persons. An atmosphere of understanding and cooperation on the part of the School Committee, intelligent, inspired teaching, prudent planning, long hours of unselfish work on the part of the staff, are all committed to one purpose, namely, to help a child grow. That so many are truly committed to this one purpose constitutes the chief asset of this school system and a major asset in the City of New Bedford.

Although detailed in other reports, the record should show that these desirables were made possible this past year:

1. Construction of a one-story cafeteria at the Normandin Junior High School was initiated when the general contract bids were opened on March 12, 1964. Target date for occupancy is January 4, 1965. The addition will not only allow more classroom space in the original building, but, because of the modern design, one large and two smaller teaching areas will be available when the space is not being used for lunch periods.

2. A 5-room addition to the Keith Junior High School was occupied on February 10, 1964. This relieved extremely crowded classroom conditions. The provision of movable partitions allows teachers to utilize large group teaching methods and then organize into smaller groups with relative ease.

3. The New Bedford High School Auditorium was completely refurnished by November 1, 1964 with not only 1172 new seats, but new stage curtains, floor tiling, plastering and painting. A small fire of suspicious origin in April proved the worth and efficiency of the fire detection system previously installed.

4. On December 22, 1964, the general contract was awarded for a 25-room elementary school to replace three smaller schools, each over 100 years of age. This school will contain large, medium and small teaching areas specifically built in to provide flexibility in teaching methods in the years to come.

5. A teacher of the emotionally disturbed was provided this year marking not only a first in New Bedford but in many area systems. It is important to provide opportunity for all children to grow. If we mean "all", we mean those children whose handicap may not be as visible as a broken leg, but children who are so emotionally disturbed that unless there is provided a deep sympathy and warm understanding, their education for life will be permanently scarred and stunted. These children cannot adjust to regular classroom procedures. We have had diagnostic testing services, elementary school adjustment counselors to provide supportive therapy and now this year, a specialized classroom teacher is added to the team to keep the educational growth continuing.

6. A letter dated March 2, 1964 was received from the Commissioner of Education requesting that a census

of whites and non-whites be taken in the public schools. It was the voted opinion of the School Committee on March 13, 1964 that no action be taken on this request. While the problem of compliance has not been resolved, it is pertinent to note that in New Bedford well over a year ago a concern was felt for the disadvantaged of all races. The superintendent organized a Gray Area Study Committee whose recommendations in great part were incorporated into another study by the City Planner resulting in New Bedford being among the first in the country to receive specific help under the Economic Opportunity Act. The effects of the program will be felt during the year 1965 but the concerns and the plans are a part of the 1964 record.

7. The installation of an electronic data processing center at the New Bedford High School is another most desirable feature made possible this year. The effect of this installation is now noticeable in the manner of reporting student grades, student attendance records and programs. During the coming year we look to the accessibility of this data for educational purposes not previously feasible, for occupational training of students in modern data collection techniques, and for further extensions into the areas of staff inventory, payroll and accounting procedures. These last two items will require careful planning by a person well trained both in the theory and practice of accounting and business management procedures. His qualifications and the care with which he is selected will have a great influence upon many aspects of not only the physical plant and personnel but the curriculum as well.

8. In September, 1964 the School Committee authorized the bi-weekly payment of the teaching staff and also offered all employees the opportunity to participate in a tax-sheltered annuity plan on a voluntary basis. The previous 52-payment plan adopted during the 1930's precluded the addition of any further fringe benefits because of the limitations of staff and equipment.

9. In December of this year we were notified that for the first time our claim under Public Law 874 was honored and a check was received for \$5,016.00. This was sent on the basis that 14 children living on the

federal property known as Fort Rodman are not residents of the City of New Bedford nor of the Commonwealth of Massachusetts and hence may be considered in the same category as tuition pupils. This money was deposited with the City Treasurer and by law it is stipulated that a separate account must be kept with expenditures made only by vote of the School Committee.

10. Over 500 adults from New Bedford and surrounding areas enrolled in an evening extension program leading to an accredited high school diploma. This program started in the fall of 1963 produced its first graduating class in June 1964. This program coupled with a summer school enrolling over 1000 students offers to the dropout and the potential dropout direct and concrete help.

As we review what has been made possible during the past year it is only logical to look forward and question what desirable features should become actualities during 1965. In the long range plan developed for the junior high schools, the rehabilitation of the Roosevelt Junior High School has next priority. Much has been accomplished, such as new doors, tiling, painting, equipment but major renovation of the cafeteria and installation of new window sash are the next features to become realities. The permanent appointment of a maintenance foreman in May, 1964 and the provision for three additional mechanics in the 1965 budget will make possible a higher level of maintenance efficiency.

The shift in population to the north of the city has posed problems of transportation and over-crowding in the Campbell School district. Building of an elementary school in the Sassaquin area may be necessary in the not too distant future. Construction of Route 195 instead of decreasing the school population in the Clifford School district has increased it. The year 1965 should show whether this is a temporary loading due to temporary housing of displaced families or a permanent trend.

The number one problem of the school system for several years is still under study. The New England Association of Colleges and Secondary Schools, the Marshall Report, the reports from this superintendent, former superintendents, assistants and principals have all

agreed and, in fact, the School Committee agreed that the senior high school should become a comprehensive high school. Further, all have agreed that space at New Bedford High School is limiting the curriculum. The lack of agreement centers around question of the one large high school concept versus the two smaller high schools concept.

The fact that there are values in both concepts is the reason why disagreement still persists. However, considering the modern day occupational needs of youth, the size of the dropout rate in the senior high school, the low educational age of the general population of the city, the low median family income, just how long can we say to those who do not wish to go to college or to Vocational High School, or enter the fields of accounting or secretarial work: "We must study the problem longer before we can offer you any occupational training other than academic!"

With sadness, this report must include notice of the passing of Professor Milton S. Briggs, member of the New Bedford School Committee who died on May 16, 1964. Professor Briggs was first appointed to fill the vacancy caused by the resignation of Mr. W. Edward Metcalf and then won election in 1963 to a 2-year term which he was serving. Prior to his appointment to the faculty of the New Bedford Institute of Technology where he organized the Business Administration Curriculum, he served as teacher, Assistant Principal, Principal and Assistant Superintendent in the New Bedford Public Schools. His loss was deeply felt in both educational and community circles in the City of New Bedford.

On September 25, 1964, meeting in joint session the School Committee and the City Council elected Attorney Paul J. McCawley to fill the unexpired term of Professor Briggs.

As the urgency of the moment, be it national or local, brings emphasis to one area of education and then to another, so the need for considered judgments becomes invaluable. While inadequacies at all levels are recognized and while the coming year will undoubtedly result in many reports giving many solutions we must proportion our efforts with the entire curriculum in mind. Federal monies and state monies must be sought

to solve many local problems but there is no substitute for the time and effort of concerned citizens, working with concerned local professional educators intelligently participating in their democratic institutions. Lacking this participation, we will soon experience not a state but a federal school system with little or no local control. To insure an intelligent, participating, well educated group of citizens in New Bedford, we need a comprehensive curriculum from kindergarten through Grade 12. Let us again hope but more actively strive during 1965 to make this very desirable and urgent goal a reality.

Respectfully submitted,

JAMES R. HAYDEN

Superintendent of Schools

Following in pictorial explanation are some of the valued personnel who bring the tools of learning to the teacher and enhance the environmental conditions of the classroom. Without their sincere and devoted hours and hours of service we would be extremely limited in our striving to provide the children of New Bedford with rich educational experiences for the purpose of developing intellectual growth and responsible citizenship.

Head Clerk and Secretary to the Superintendent, Mrs. Martha D. Hayden, has the responsibility of supervising all office procedures and clerical personnel.

In addition to attending and transcribing the minutes of all School Committee meetings, preparation of annual reports, annual budget and personnel records are some of the major tasks.

Book orders, teacher contracts, library supplies, instructional material, and purchase orders are processed here.

Communication —
— by means of —
the weekly bulletin
advertising for bids,
typing specifications,
purchase orders —

— the PBX Switchboard handles not only local
and long distant calls — but also

— the “word” is duplicated and dis-
tributed to 32 schools and to the
citizens.

is an information center for all schools.

All bills are promptly paid — if the head bookkeeper approves — checking receipts, computations, signatures, allocation to proper account — are some of the details —

The payroll must be met — and proper deductions made — as over \$4 million is "distributed" each year.

When illness strikes — — call for a substitute teacher is received at 7 A.M. — records are checked and the call goes out to find the proper person.

Cafeteria accounts must balance — audits by the city and the state check the thousands of dollars handled each month.

School records mean more than report cards — census information, work permits, boundary lines, permits to use school facilities.

— plus records of special areas —
physical education, music, health, adult
education, special education.

Deliveries are checked in—and out—

Some 10,000 different items are
ordered —

— Stockpiling —

— Inventory —

Custodians perform these many duties.

Mr. Frank J. Bliss
Supervisor of Custodians
checks methods and men who keep
32 buildings clean and healthy —

— thousands of square feet, furniture,
proper heating and ventilating proce-
dures — all are part of a day in
school.

Mr. Henry Teixeira
Maintenance Foreman
inspects and plans the work necessary
to repair and maintain the school
plant —

— Important are the skilled hands
of the
skilled craftsman.

— the heating plant needs constant checking to insure both efficient operation and safety.

— from an electrical circuit in a ventilating unit to installation of new motors — our school electrician.

—“stages” of painting an auditorium—
— one of many inside maintenance
jobs plus many outside jobs constantly
taking place —

— Plumbing fixtures
must be repaired,
modified to meet changing
curriculum needs. —

— Central maintenance shops
build doors, cabinets, bookcases

— using machines
and
men who
"know how"

ANNUAL REPORT

DEPARTMENT OF SECONDARY EDUCATION

The ultimate values of the public school are human and individual. The administration of schools, the function of teaching, and the services performed by the different agencies of the school are intended for the benefit of the pupil. In order to provide the optimum opportunity for intellectual growth, it is particularly important that every phase of the instructional program be concerned with continual growth.

Growth concerns more than number and size; it refers to quality also. That our secondary schools are a growing enterprise in a growing community must be apparent from the following review of a year of growth. This report attempts to focus attention on some of the more significant features which were developed, and a preview of proposals for the immediate future.

PROFESSIONAL PERSONNEL

The teacher supply is a crucial factor in the continuance of first-class education. There is equally no doubt that professionally qualified teachers are hard to find. We have been perhaps more successful than we had a right to be in attracting good new teachers in the system in view of our existing salary schedule.

Appointment of 34 teachers and the transfer of 5 others became effective with the beginning of the school year. New teacher qualification is a fitting complement to our professional staff; of those newly elected, 24 were certificated and 9 others are awaiting certification. One additional teacher each was assigned to New Bedford High School and Roosevelt Junior High School. Since the start of school, 3 teachers have been appointed to fill unexpected vacancies.

By the adoption of the following programs, we feel that we have added strength to the advancement of our professional staff, both experienced and inexperienced: Close supervision, written teacher progress reports, summer workshop, publication of curriculum guides, in-

service courses for regular teachers and substitutes. It is proposed that more effective orientation at the start of the school year can be accomplished by holding several monthly meetings.

BUILDING PROGRAM

Construction of 5 additional classrooms at Keith Junior High School begun in September, 1963, was completed and the rooms were occupied on February 10, 1964.

Work was begun on a new cafeteria at Normandin Junior High School on April 16, 1964. Construction is rapidly being completed and it is fully expected that occupancy will occur in January, 1965. This one story structure has been designed so that it may be used for instructional programs, study halls, extra curricular activities and social functions as well as cafeteria. It will have 2 dining areas, seating 1250 pupils in 3 shifts, and a centrally located kitchen and service area which can be closed off.

Planning is under way for the remodeling of the old cafeteria into 6 science classrooms at Normandin Junior High School. It is hoped that this will be completed by September, 1965.

INSTRUCTIONAL PROGRAM

In planning a curriculum, the prime objective must be to develop the highest values. If this can be achieved in education, it will be reflected in society which it serves.

Both current and future problems are under constant study as they apply to the local situation. The program of instruction, always in a process of evolution, has in store changes and additions which promise continued improvement. Efforts are made to anticipate future needs and to lay groundwork for them now. These are indicated in the following brief summaries.

English

Students from Grades 7-12 were involved in a summer reading program on a "volunteer" basis. Some

changes are planned for next summer to increase the 25% who fulfilled the reading requirements. Invaluable assistance was given by the Free Public Library.

A summer workshop produced a curriculum guide for Grades 10-12. The contents of the guide is to be tested this year before formal adoption.

Book Fairs in all secondary schools proved very popular with the students (and teachers) and will continue to be held annually.

Grade 9 pupils are being tested to evaluate the 2 year developmental reading program in the junior high schools.

Need to improve the teaching of writing on the secondary level involves in-service courses for teachers, lessening teacher load, use of lay readers to grade and correct composition papers.

Mathematics

Modern math is being taught in all grades this fall.

Algebra is now being taught in the 8th grade to some mathematically talented students and calculus, traditionally a college subject, is being offered to advanced 12th graders.

Additional 7th grade classes in each junior high school are studying the modern mathematics and it is anticipated that such instruction will be extended to an even greater number of pupils next year.

Of particular importance if the program is to be extended, is to arrange another in-service course in the new approach to teaching math especially since we have a number of recently appointed teachers who are unfamiliar with this new approach in math.

Workshop in modern math is to be given by a consultant and is scheduled for January, 1965.

Many pupils enter the 7th grade with a deficiency in math. The question arises whether a condition for their promotion should be attendance in a summer course in remedial arithmetic.

Social Studies

Twenty-three junior and senior high school teachers completed a 20 session in-service course on City Planning.

A teacher-committee developed unit outlines on city planning for Grade 8 Social Studies and Problems of Democracy.

A study will be made of the value of continuing to offer Ancient History in Grade 9 or to replace it with a course in World History with stress on Rome and Greece.

Adoption of textbooks especially geared to the various reading levels of the Grade 7 and 8 Social Studies program should be explored. At present one textbook is used for all levels.

Science

The untimely death on October 5, 1964 of Walker B. Trafton, Department Head, was a sad loss. His many years of faithful and inspiring service, his progressive leadership in this department were exemplary and deserve a special expression of appreciation from us all.

Summer workshop is to propose a science curriculum guide for Grades 7-9.

581 student projects were displayed in the secondary school science fairs which were attended by approximately 2600 curious minded spectators.

To meet the requirements of Chapter 51 of the Acts of 1964, 750 pairs of safety goggles were purchased for the science classes.

Foreign Languages

Expansion of language laboratory in the high school to 30 student stations will be made next year. Present 15 stations make restricted use of laboratory facilities unavoidable.

Tapes suited to a variety of aims in teaching all languages have been accomplished to be co-ordinated to the textbooks in use.

Homogeneous grouping should be attempted in French classes, Grades 10-12, to improve level of instruction.

Staff members would like to see a third hour offering in French in Grade 8. Scheduling difficulties must be overcome.

The possibility of establishing a 3 year sequence in German is being studied.

There are 15 Portuguese classes this year, the highest number this department has ever had. Perhaps an introduction of the language in Grades 7 and 8 can be attempted on a voluntary basis with classes offered after school hours.

Student interest in electing Russian has steadily waned since its introduction into the curriculum in 1959. Continued decrease in enrollment will necessitate dropping this offering.

On June 19, 1964, Mrs. Mary I. Fogarty retired as Latin Department Head of the secondary schools. Her scholarly contributions and influence on her students will long be remembered. No new appointment to this position has been made. Three new teacher appointments were made in this department. Fortunately, we were able to obtain the services of new teachers who were all certificated.

Business Education

For 1965, a one-semester course in data processing operations will be offered as an elective. "Hands-on" training with the equipment in the Data Processing Center will permit students to develop skills and proficiency for job opportunities.

Modern methods of record keeping and payroll work on a new accounting machine have been introduced in the business machines course.

Industrial Arts

The electronics course was strengthened by a more practical approach — the actual building of power supplies, amplifiers, radio receiving sets and other circuits.

The long-range program of replacing old equipment in all shops has been continued.

How to make greater use of our specialized unit shops for boys in the general course is under consideration.

Household Arts

Some improvement of equipment has been made in the Family Living Room at Normandin Junior High School with replacement of worn furniture.

In Clothing rooms, at all junior high schools, some new models of sewing machines have been installed to provide pupils the opportunity to learn modern methods of clothing construction. Replacement of heavy work and cutting tables is desirable.

PROGRESS REPORTS

Libraries

Reports decrying the lack of school libraries and reference to 84% of all schools lacking librarians give us reason to feel proud that each of our secondary schools has had a library and resident librarian for many years. An increase has been given each school's library in its allotment for books and periodicals as a small step toward the standard set by the American Library Association, viz., \$4.00 to \$6.00 per student.

But facilities at the high school need improving! Space is our greatest need. The library aims to support the curriculum and provide enrichment material for all courses. To do so effectively, space must be adequate to make such materials readily accessible to students.

The school year 1963-64 saw little progress toward modernization of the high school library or toward the execution of the recommendation made by the visiting Evaluating Committee in the fall of 1961.

Data Processing

This school system's center for data processing operations opened on April 1, 1964 with installation of equipment at New Bedford High School. Appointed director of the center was Melver C. Felton who has submitted a more detailed review of activities for the year.

Briefly, successful services which made it possible to reduce repetitive and routine clerical tasks for teachers and facilitating rapid information-retrieval for students are:

- Daily student attendance records and monthly attendance reports.

- Programming of student schedules on rented computer time.

- Printing student schedules and teacher class lists.

Processing and printing of report cards.

A staff survey and department payroll processing are planned for 1965.

Summer School

The summer of 1964 saw further growth on New Bedford's Summer School program. Its growth is an indication of its desirability and worth, offering as it does, use of school facilities during traditionally idle months.

Total enrollment in the summer school was 1188 pupils, an increase of more than 11% over 1963. In the secondary summer school, 30 subjects were offered on a fee basis for "make-up" credit, enrichment and review. Of the 830 secondary pupils, 55% enrolled because they wanted to, not because they had to make up grades. Approximately 10% of our own regular junior to senior high school pupils enrolled in the summer session.

As a result of their success, 14 (an increase of 10 over last year) subsequently received their New Bedford High School diploma, and junior high school diplomas were awarded to 31 pupils (an increase of 13 over the previous year.) Hopefully this continued trend should contribute to reducing the drop-out rate of those who have fallen behind in their studies.

Credit for efficient operation of the secondary summer school is due Principal William J. Winsper.

CONTINUING PROBLEMS

The biggest "space challenge" in the secondary schools lies squarely in the situation in New Bedford High School.

Growth of our educational program over the years and the increased number of students have placed a premium on space at the High School. Additional educational services have claimed some of the existing space, an inevitable consequence of growth. Old concepts of classroom space requirements, gymnasium and auditorium utilizations, even administrative space are vastly changed. A school built 5 or 6 years ago may already require basic changes in terms of its ability to accommo-

date increasing enrollment and new teaching concepts. Flexible, adaptable space means flexibility of curriculum in the future. We must move with increasing speed to obtain a physical plant that will match the quality of its faculty and student body.

The problem of drop-outs has seen a substantial number of well-meaning solutions, but the key to the problem appears to be an intensive individualized counseling program together with course offerings more closely geared to the needs and abilities of these students. Such course offerings must be carefully chosen to avoid stigma associations. It is proposed to add a high school guidance teacher for improved counseling to extend the years of school opportunity for the drop-out.

Consideration should be given Distributive Education to offer classroom instruction and on-the-job training for high school students during the junior and senior years. Local retailing, wholesaling, and service-selling businesses would serve as training stations for Distributive Education trainees. The training sponsor and the high school co-ordinator would formulate the two-year training program for the individual student. Implementation in the practical manner necessarily involves physical space and once again we are stymied until a solution to this is resolved.

Under the pressure of new emphases, the knowledge explosion, concentration of preparation for college, summer school effects, (all realistic evidence of growth), the school day can become too crowded. Hours must be budgeted to give more time to those subjects that are most important for each student. Flexibility in scheduling periods of varying length of time should be studied.

The basic aims of our secondary schools remain the same:

- Growth of educational standards providing more learning opportunities for all students
 - in junior high school, a general education with opportunities for exploration: in senior high school, a basic education for citizenship, for work, for college.

Success of this program cannot be possible without the support of citizens, financially and otherwise.

ANNUAL REPORT

DEPARTMENT OF ELEMENTARY EDUCATION

Today, as never before, the spotlight is on our schools and on the education we are providing for our children. The foundation of a good college education depends on the adequate preparation of pupils in our elementary schools. It is with these thoughts foremost that we conscientiously undertake the opening of each school year. We are confident that the citizens of New Bedford want even better schools in this city though education has been steadily improving for many consecutive years.

Commencing with our Kindergarten children, there must be a greater variety of experiences and greater challenges provided than ever before offered. Youngsters today enter many of our kindergartens with a fantastic amount of factual information already in their hands. They have different knowledges and skills than the children of even a few years ago and they need a different educational pattern.

CLASSROOM TEXTS

In the Spring of 1964, therefore, we distributed to all kindergarten classes a Phonics Readiness book published by Dr. Mahon which was utilized by all teachers of such groups of children. Many sounds of letters were learned by use of auditory, visual and memory perception. In September 1964 a number of our first grade teachers stated they were impressed and pleased with the growth in reading readiness that the pupils possessed over earlier classes.

This year also saw the adoption of a new Social Studies series for all elementary grades. James S. Sheerin, Principal of the Sarah D. Ottiwell School, was the outstanding Chairman of the Committee of teachers which devoted months of careful study in the selection of these books. In October, Dr. Robert D. Gabler, author of one of the series, accepted our invitation and traveled one thousand miles to talk to all teachers in Grades Four through Six about the Teaching of Elementary Social

Studies. He proved to be a dynamic speaker and the teachers felt greatly enriched by his coming.

Curriculum is never made — it is always in process. Therefore, current changes are taking place in elementary school mathematics, and at the present time an Arithmetic Committee has already been formed, and in the coming months ahead plans an intensive study of the programs and material available in this field. We feel that the experimentation period in the contents of mathematics textbooks has finally become somewhat stabilized and that it is now necessary for the elementary grades to develop a sure base for the more demanding mathematics now being taught in the secondary school. Before September 1965, an introduction to the modern mathematics will be recommended and we hope adopted. All teachers will have the opportunity to learn about the teaching of modern methods in mathematics as we will have a series of lessons given by the arithmetic consultants from whatever publishing firm our books are purchased.

IN-SERVICE COURSE

One of the most fruitful approaches that can be made to add quality to any school program is through the professional growth of its teachers. At the present time, eighty-four elementary teachers and principals are enrolled in a ten week In-Service Course in Penmanship. This apparent desire on the part of the teachers to improve their classroom instruction displays a most professional attitude, and the children in our schools are certain to benefit by this particular type of In-Service Course. There is no substitute for a teacher who writes well as an incentive to good handwriting in the classroom.

LIBRARY BOOKS

With the co-operation of the New Bedford Public Library, seven elementary schools were selected this year for the experimental housing of five hundred library books within each building. Next year, plans call for seven additional schools to become participants in

this program designed to provide children with plenty of reading material close at hand.

As one of the weakest links in the elementary program for years has been the woefully inadequate supply of library books, we are most enthusiastic over this subject and feel that it will be a tremendous success.

COURSE FOR SUBSTITUTES

One highlight of the year was the formation of a training Course for both Elementary and Secondary Substitutes. Meetings commenced in January and were held for twelve weeks, during which demonstration lessons and observation days were scheduled. All participants were assigned for a week of Practice Teaching in schools throughout the city. Various principals, directors and experienced classroom teachers were instructors for the Course. More than forty interested citizens enrolled and great enthusiasm was evident throughout all the meetings. The schools profited by securing the services of substitute teachers far more qualified and more aware of the classroom objectives than ever before.

SUMMER SCHOOL

Summer programs of public schools everywhere throughout the country are beginning to enlarge and expand. More school systems each year seem to be moving in this direction. Our Elementary Summer School Program held in New Bedford for the second year was most successful. Three buildings were opened in various sections of the city with three hundred fifty-eight youngsters enrolled. The bright and average students, as well as the slow learners, are enjoying the opportunity to attend classes. A similar program will be planned for the summer of 1965.

PRINCIPALS

Elementary principals are certain to appreciate the newly revised Requisition Forms for ordering Classroom Supplies which were distributed to all schools this fall.

The Committee of principals who undertook this tremendous task has provided a much improved schedule that should simplify an arduous yearly chore.

The selection and approval of new basal and supplementary textbooks, which must of necessity be constant, makes the revision of the Approved Book List for Elementary Grades obligatory every four or five years. We are now in the process of updating our current edition which was last revised in 1960.

Elementary principals were divided into three groups this fall and each held sectional meetings. Discussions were held on in-service training, school supplies, and numerous suggestions were discussed for the over-all improvement of the everyday functions of the elementary department. These sessions started in 1963 and have proved most valuable in that they provide opportunities for principals to share their problems and ideas with their peers and with the administration.

CLASS FOR EMOTIONALLY DISTURBED

In October 1964 our first class for Emotionally Disturbed children was organized at the James B. Congdon School. Enrollment in this group must necessarily be very small, and there is presently a large number of children on our waiting list.

CULTURALLY DISADVANTAGED

All school departments in the nation this year have become very conscious of the term "culturally disadvantaged children". Many communities like New Bedford have initiated special projects and programs in their schools in an attempt to help such youngsters. We have already started to fill in the gaps for these disadvantaged children by making it possible for them to have many first-hand experiences, to increase the number of field trips, and to enlarge the amount of equipment and supplies for academic instruction.

RECOMMENDATIONS

1. The over-age non-learners in our upper elementary schools who are of normal intelligence but

rebellling against the type of academic program forced upon them, are desperately in need of assistance. Our curriculum simply does not meet their needs and as a result they thoroughly dislike school.

Establishing Intensive Teaching Classes in each of our large elementary schools, where such pupils, placed in a small group, could concentrate on major subjects only, for a half session and then participate in some form of manual arts for the rest of the day would, I believe, do much toward changing such a child's attitude toward learning. Shops for Manual Training already existing in several elementary buildings and those located in the three junior high schools could be considered in the planning .

2. Teachers NEED to attend meetings on curriculum information, need to watch fine demonstration lessons, and need to hear educational talks. With the numerous commitments that teachers often have following their daily classroom work, they find it difficult to attend such meetings if they are scheduled after working hours. By closing the schools one afternoon each month, it would then be possible to schedule many more teachers' meetings on important issues of curriculum and have all teachers engaged in professional improvement which should in turn be reflected in classroom teaching.

ANNUAL REPORT

NEW BEDFORD HIGH SCHOOL

The increase in enrollment at New Bedford High School constant since 1955 with the exception of 1960, for the second time in a decade dropped from the high of September 1963 of 2654 to 2613 pupils this year. The decrease was due to the largest graduating class in the history of the school this past June. The still larger graduating class in June of 1965 would indicate that our numbers will again drop and that we will be approaching the projected stabilized enrollment of about 2500 pupils.

This stabilized enrollment means that we will continue to be overcrowded, and that we must continue our present academic program and extra curricular activities with but minor changes and allowing many sound recommendations to remain in the offing.

The Evaluation Committee Report of 1961 showed that approximately 85% of its recommendations for improvements were due to our lack of space and facilities. This past year our required two year progress report to the New England Association showed we had been able to meet about 30% of its recommendations. A five year progress report is due in 1966. Again it is our fervent hope that that report will show that the space has been provided to carry out the rest of its recommendations to make our "good" school a still "better" one.

The physical condition of the school continues to be a credit to our school system and to its maintenance department. Our auditorium has not only been completely rehabilitated as had been planned, but also our stage refurbished with new curtains due to the fire of last April. With its new but lower seating capacity of 1172, it is without doubt the largest and most beautiful auditorium in the area. Also completed this year has been the installation of fire doors in the wells of all staircases in our East building. Also worthy of note was the installation of 150 new lockers in the boys' section of the East basement corridor. Another 350 new lockers will complete the replacement of lockers that have probably seen fifty years of service. The one major project

needing attention in the near future is the installation of a modern electric bell system to replace the present bell system dating back to 1912.

School opened in September of 1964 with all pupils scheduled by data processing through our new Data Processing Center. This was truly a "revolutionary" change. For more than a generation pupils at our high school had made out their own programs (subject to guidance) and selected their own teachers. This now discarded method in itself was also unique particularly in the pupil selection of teachers. The new system of program making will increase the school year by about one week and save the time of teachers and pupils. However, the master schedule must still be made by the principal, the only difference being the means by which his information is gathered. The many other gains and benefits of data processing are not subject to this report at this time.

DEPARTMENT SUMMARIES

Our department heads pressed for time and lack of space continue to move forward in their preparation for the future. Brief reviews of the activities of the various departments follow.

ENGLISH

During the year the department continued perfecting the established program of studies and experimenting with the new. Among the highlights of the year were the following:

1. *Summer Reading Program*

The program was carried out on a voluntary basis with about 50% of the students participating and with 25% completing the reading requirements satisfactorily and receiving a certificate of achievement.

2. *Summer Workshop — Curriculum Guide*

An organized, detailed Curriculum Guide was compiled and produced during this second summer workshop. The Guide has been designated as "tentative" for at least one year.

3. *Book Fair*

Two Fairs were held during the year and were very popular with both students and teachers. Indications are the Fairs increased student interest in reading — the basic reason for their inception.

4. *Supplementary Reading — Censorship Program*

Following a study made of the direction in which this reading should follow, many new titles have been added and controversial titles have been deleted. A system has been established to deal fairly with situations in which controversial study materials are questioned by outside sources.

5. *Field Trips*

A larger number of trips were taken to literary shrines and performances — a step in the right direction.

OBJECTIVES AND RECOMMENDATIONS

Since all learning takes the direction of making students better readers, writers, speakers, listeners and thinkers, the following are some of the recommendations made towards meeting these objectives:

1. In-service courses (compulsory) in the teaching of English composition.
2. Smaller and fewer classes of English per teacher.
3. Aid in the correcting and grading of composition papers.
4. Continuation of the volunteer summer reading program.
5. Creation of a 10th grade "Honors" class.
6. Appointment of a Speech and Drama instructor.

SOCIAL STUDIES

During the year a group of our teachers completed a twenty session course, "City Planning: Its Applications to our Community". The result has been the development of a proposed unit in city planning in our classes of Problems of Democracy and Economics and Current Events.

The department cooperated with two State Department of Education projects: The Annual Student Government Exchange Program and the Spring Massachusetts Youth Citizenship Conference for Secondary Schools.

The department was one of ten high schools in the state to be invited to send a representative to the November Meeting of the Planning Committee for the Conference of High School Teachers which was held in April of 1964 at the University of Massachusetts. The History Department of the College of Arts and Sciences undertook a mutual investigation with teachers of history in the high schools to consider areas of most effective co-operation.

OBJECTIVES AND RECOMMENDATIONS

1. A continuous, varied updating program for all levels.
2. A two year course in United States History and Modern Problems. (Three semesters of United States History and one semester of Modern Problems).
3. An elective course in Economics for Senior College Curriculum students.

MATHEMATICS

This year the accelerated mathematics program moved into the senior year culminating the plans to have this track in operation for grades seven through twelve. The course of study in the senior year emphasizes topics from the calculus and introductory probability.

OBJECTIVES AND RECOMMENDATIONS

1. Algebra and plane geometry be required in the Business Education Curriculum for those pupils intending to pursue higher education at the college level.
2. A course in slide rule for the non-college bound students since this is a very useful skill in many occupations today.
3. Increase the number of teachers to reduce the size of classes in the department.

SCIENCE

The department suffered the loss of its Head of the last fifteen years on the death of Walker B. Trafton on October 5, 1964. The entire faculty was saddened by the passing of one of its most dedicated members. The department will continue to be one of the most progressive in the school under the new leadership of Theodore J. Calnan who served as acting head for the last nine months.

Science Fair

The Third Annual New Bedford High School Science Fair was held on February 28, 1964. The well organized fair displayed 92 projects and drew four hundred serious minded spectators. The projects showed a noted improvement in originality, imagination, and scientific investigation.

Safety Goggles

Chapter 51 of the Acts of 1964 required that pupils and teachers are to wear safety eye protection devices while attending certain classes in public schools. One hundred eighty-six pairs were purchased for our science classes.

National Defense Act

Five thousand dollars of new science equipment was purchased under the provisions of the National Defense Act, Title III. The purchase of the equipment has helped to continue to modernize the teaching of science in our secondary schools.

Health and Senior Science

A much needed evaluation and revision of the courses of study in Health and Senior Science are now in progress.

LATIN

The department under the leadership of Mrs. Mary I. Fogarty for the past three years was characterized by its revitalization and its subsequent growth. Her retirement last June was a great loss to her students and to the faculty. While the department is now operating without a nominal head, it is felt that her enthusiasm will be felt for some years to come.

FRENCH

The basic aim of the department has been to adapt itself to the changing methods and materials available in the modern foreign language field. There is an increased amount of audio-visual materials available, and the latest Standardized Tests have been acquired. Vertical articulation with elementary and junior high classes has been improved by the attendance of these teachers at all department meetings. A beginning has been made toward the acquisition of a classroom library through NDEA funds permitting purchase of single volumes. Finally, the expansion of the Language Lab next year will make it possible to meet class size needs. Worthy of note is the variety of contact of department members with other systems and teachers such as attendance at Summer Institutes, membership on Evaluation Committees, the State Advisory Committee for Foreign Language Instruction, and various professional organizations.

RECOMMENDATIONS:

1. Need for homogeneous grouping to work our better pupils at all levels in preparation for higher achievement in College Boards.
2. The need of an added classroom for audio-visual instruction.
3. Correlation with the school library for a collection of classical and modern works in the foreign languages.
4. A re-evaluation of offering both German and Russian for two years.

PORTUGUESE

The number of classes in the department this year increased from twelve to fifteen.

New books have been adopted. Audio-visual materials, including several excellent films on Brazil and Portugal loaned by their respective Embassies in Washington, were shown to all classes. Limited use of the Language Lab was unavoidable due to the insufficient facilities and difficulties in scheduling. A series of new

books prepared for the modern approach of Foreign Language teaching and supplemented by magnetic tapes are now available.

The department continues to feel that it is still in the pioneering stage as far as national need is concerned, and that the importance of Portuguese is as permanent as the nations that are governed and motivated by this language. It cannot be minimized nor neglected any more than some international events effecting our own national security such as the revolution in Rio de Janeiro last April. Students of Portuguese are still evaluating "The Country That Saved Itself" from communistic liquidation.

Our offering of four years of Portuguese marks a great deal of progress in New Bedford, but much more is needed. The next step should be the introduction of the language in grades 7 and 8 since both books and teachers are available.

BUSINESS EDUCATION

The Business Education Department is in the process of preparing the members of its graduating class to be fitted for their place in the ever-changing picture of the world today and its trend to process data by automatic media.

With the installing of the Data Processing Department in the High School, these graduates now have an opportunity to learn realistically on the automated equipment widely used in so many offices today, and become acquainted with the terminology and sequence of handling such data.

Thus we are meeting the demand for graduates versed in the skills and techniques in the field of automation. As training accommodations are limited, only a small segment of these students can become adept and proficient in the functions and procedures of automation, but plans are now being formulated to increase this number.

In another, but related sphere, the Business Machines room has acquired a new Accounting Machine, which is also capable of figuring Payroll Work in all its complexities, and incorporates the latest methods of record keeping into our course.

CONCLUSION

The housing situation of the High School to provide for a comprehensive program is still to be resolved. It is still my humble belief that a program of studies should first be agreed on before definite action is taken. Too much is at stake to do otherwise. Drop-outs we have always had and drop-outs we will always continue to have. The increasing of the compulsory school attendance age years ago has produced hundreds of pupils who simply are not equipped to cope with a high school education. It is for pupils in this area that a program should be created to give them the best training of which they are capable in a building apart *but* under the control of the principal of the high school. Possibly, a "task force" could consider this problem with all its ramifications.

Report of the School Committee

STATISTICS

POPULATION AND VALUATION

The population of the city (census of 1964)	100,058
Valuation of taxable property was	\$131,214,175.00
Schoolhouses and lots	10,439,675.00
Other school property (furnishings, etc.)	1,354,076.92

APPROPRIATIONS

Rate of taxation (per \$1,000.00)	\$82.00
Account for general school purposes, not including new buildings	\$5,449,650.09

SCHOOL CENSUS

Number of children between five and sixteen years of age, and illiterates (not having completed Grade 6) between sixteen and eighteen years of age, reported by the Attendance Department in accordance with the census taken October 1, 1964:

Between 5 and 7 years	3,450
Between 7 and 16 years	15,342
Between 16 and 18 years	48

SCHOOL ORGANIZATIONS, SEPTEMBER 1, 1964

High School	1

EMPLOYEES IN SERVICE

January 1, 1965

Teaching Corps:

Headquarters:	Superintendent	1
	Asst. Supt.	2
	Directors	8
	Assistants	15
High School:	Principal	1
	Asst. Principals	2
	Dean	1
	Dept. Heads	7
	Teachers	88
Junior High Schools:	Principals	3
	Asst. Principals	3
	Dept. Heads	2
	Teachers	151
Elementary Schools:	Principals	25
	Asst. Principals	16
	Teachers, Grade 1-6	279
	Special Teachers	43
	Kindergartens	29
Adult Education:	Director	1
	Teachers	2
High School Guidance and Placement:	Director	1
	Counselors	4
Pupil Personnel Services:	Director	1
	Asst. Psychometrist	1
	JHS Guidance	6
	Elementary School Ad- justment Coun- selors	2
	Special Teachers	7
		<hr/>
TOTAL		700

Civil Service Corps:

Clerks	26
Physician	1
Nurses	12
Attendance Supervisors	4
Building Maintenance Foreman	1
Mechanics	12
Supervisor of Custodians	1
Senior Building Custodians	20
Junior Building Custodians	45
Janitresses	19
Cafeteria Supervisor	1
Managers	6
Cooks	4
Helpers	35 (5*)
Cashiers	7*
	<hr/>
	194 (12*)

Miscellaneous Employees:

Accompanist	1*
ROTC Sergeant	1*
TOTAL NUMBER EMPLOYEES	896 (14*)

* Part time only

TUITION RATES

Rates of tuition for non-resident pupils for school year beginning September 1, 1964, payable in advance are:

High School	Year	\$375.00
Junior High)		
Sight Saving)	Year	325.00
Special Class)		
Work Shop)		
Elementary	Year	250.00
Kindergarten	Year	125.00
Evening School	Night	.50
Evening High Extension Program	(per class)	18.00

PER CAPITA COSTS

The cost of instruction per scholar for Day Schools is based on the average number belonging and the total amount expended from taxation money, not including expenditures from the Sylvia Ann Howland, Paisler, Bourne Prize, Etta Abbott Smead, Brooks, Campbell or Beatrice Mosgrove Funds:

	Gross Cost	Net Cost (after state reimbursement)
High School	376.06	307.47
Junior High School	389.49	339.82
Elementary Schools	351.57	291.94
Average for Day Schools	364.01	305.15

The average cost per pupil in the Day School, for text books and supplies, has been as follows:

High School	\$9.74
Junior High Schools	9.45
Elementary Schools	8.84
Average for Day Schools	9.12

ANNUAL REPORT

of the

COMMISSIONER

of

PUBLIC WORKS

of the

CITY OF NEW BEDFORD, MASS.

to the

CITY COUNCIL

1964

THE BAKER MANUFACTURING COMPANY
• PRINTERS •
NEW BEDFORD, MASSACHUSETTS
1964

COMMISSIONER'S REPORT

February 24, 1965

Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

In compliance with Chapter 3, Section 58 of the City Code, I herewith submit the annual report of the Department of Public Works for the year ending December 31, 1964.

Appropriations and expenditures are shown in the various tables, together with a chart indicating the comparative Highway expenditures for the period from 1921 through 1964.

NEW EQUIPMENT — Additional expenditures were made to the extent of \$9,346.00 from the 1962 Highway New Equipment Loan account. These expenditures are listed in detail elsewhere in this report. Additional purchases are contemplated in 1965.

CHAPTER 90 — Construction was started on the second section of Braley Road, north of Phillips Road, by the contractor, Gracia Bros., Fairhaven, Mass.

Under Chapter 782, Acts of 1962, additional streets were improved to the extent of \$15,119.40.

Under Chapter 822, Acts of 1963, the City of New Bedford received from the Commonwealth the sum of \$164,441.00. Various streets were resurfaced, as listed elsewhere, to the extent of \$57,628.96.

I wish to express my appreciation for the cooper-

ation that I have received from His Honor, Mayor Edward F. Harrington, the members of the City Council, the various department heads, and my own capable assistants in carrying on the work of the department.

Respectfully submitted,

EDMUND J. TOOMEY

Acting Commissioner

ENGINEERING DIVISION — 1964

AIRPORT COMMISSION — Plans were drawn and surveys made in connection with airport boundaries and leases.

ASSESSORS — Real Estate transactions and transfers were filed at the Registry of Deeds. Such transfers were changed on city plots and indexed. Two sets of 173 plots are kept up to date and blueprints made of same.

BOARD OF APPEALS — Eighteen surveys and plans were drawn and records kept.

BUILDING DEPARTMENT — Lines and grades were given for 392 new buildings. The buildings were numbered and records kept.

CITY SOLICITOR — Plans and blueprints were made and descriptions were written on request of City Solicitor for the sale of City owned land and acquisition by Eminent Domain.

CURBING — Lines and grades were given for setting 6,488 lineal feet of curbing. Inspection and measurement was made of the same.

HOUSE DRAINS — One hundred and eighty-nine (6,942 feet) new house drains and seven relays were laid connecting house sewer and surface pipes with the main sewer. Locations of these drains were measured, records were made of the same and drawn on drain plots.

INDUSTRIAL PARK — The Engineering Division did surveys, etc., relative to drainage of the Industrial Park roadway.

PLANNING BOARD — (Zoning) Fourteen plans for zoning changes were made and lists of abutters made and reported.

PARKING METERS — Eleven surveys and plans were drawn for new meters and removal of meters. Surveys were made for No Parking signs and laying out stalls for No Parking areas.

PARK BOARD — Plans were made for Sylvan Grove Park and also of land taken for public playground and recreational purposes.

SEWERS — Surveys, plans, lists of abutters, assessments, and specifications were made for six new sewers and four new surface drains. Construction costs, inspection, lines and grades, were given for 3,385.65 feet of sewers and 2,537.55 feet of surface drains. Records of construction, final plans, and final assessment were made and reported.

SIDEWALKS — Surveys, plans, and estimates were made for fourteen projects under the Betterment Act. Measurements, records, final plans, and assessments were made and reported. Plans and estimates were made for 187 projects laid by bonded private contractors for property owners.

STREETS — Surveys were made and plans drawn for the acceptance of 4 new streets. Lines and grades were given for all street construction and public utilities construction. Surveys were made and points set for the installation of new street bounds.

TRAFFIC COMMISSION — Surveys were made and plans drawn. Traffic counts were made at 39 intersections.

ROUTE 195 — The Engineering Division cooperated with State and Federal District Engineers, private En-

gineers, and also with private contractors on the proposed projects.

HURRICANE BARRIER — The Engineering Division cooperated with the Corps of Engineers and private engineers on the proposed projects.

WATER BOARD — Lines, grades, engineering and survey information as required were given for all water main extensions.

MISCELLANEOUS --- Lines and grades were given for fences, street lines, and sidewalks. Thirty-eight accident or damage sites were surveyed. Plans were drawn to prepare for possible court action. Numerous plans were drawn and descriptions prepared for study by the City Council Committees and the City Solicitor.

Weather records were kept daily on rainfall, snowfall, wind velocity, temperature, and tides. This weather information was reported to State and Federal agencies and was made available to the public. Records were kept of street sweeping and ash collections. The area of cuts in pavements and walks were measured and recorded. City maps and plans were kept up to date, blueprinted, and indexed.

GENERAL STATISTICS

January 1, 1965

Set off from Dartmouth	1787
Incorporated as a City	1847
Length of City	10.78 miles
Breadth of City (Maximum)	3.10 miles
Highest point	1250 feet north of Rockdale Ave. and Hathaway Road. Elevation 181.50 feet.
City Datum	Based on 0.85 feet above mean high water
State Datum	Based on mean sea level 2.55 feet below City Datum
Geometrical Center of City	Nash Road and Mt. Pleasant Street
Area - Land.....	12,241 acres
Ponds.....	193 acres
Land - Ponds.....	12,434 acres - 19.42 sq. miles
Tidal Water.....	8,451 acres - 13.21 sq. miles
Length of frontage on tidal waters	10.13 miles
Depth of main channel	30 ft. at low water
Average rise and fall of tide	3.60 ft.
Population - Registrar of Voters estimate	100,076
Assessed valuation	\$155,747,950
Assessed valuation per capita	\$1,556.30
Accepted streets - Area	1,429.227 acres ... 242.349 miles
Bridges (3)	0.796 miles in New Bedford
Sewers	260.658 miles
Length of Interception Sewer:	
Outfall	0.626 miles
Intercepting	9.188 miles
16 Public Parks	288.80 acres
14 Public Playgrounds	31.72 acres
1 Rifle Range	230.35 acres
7 Parking Lots	5.81 acres
32 School Buildings - Area of Grounds	116.60 acres
1 Airport - Area of Ground	829.93 acres
Area of Easement	118.67 acres
5 Wharves - and other waterfront land (Harbor Development Comm.)	72.00 acres

WATER BOARD REPORT

March 31, 1965

To the Mayor and City Council
of the City of New Bedford

Gentlemen:

In accordance with the provisions of Chapter 23, Section 3-2312 of the City Code of New Bedford, the Water Board herewith respectfully presents this, its ninety-fifth annual report, covering its operations for the calendar year 1964, and including the reports of the superintendent and water registrar.

Mr. William J. Kruger was re-appointed as member of the Water Board for term to expire in June, 1967.

Mr. George H. Brightman, who had been acting superintendent since the resignation of Mr. Nathan S. Ellis in May of 1963, was appointed to this position permanently on July 19, 1964.

Mr. Edward V. Peters was appointed general foreman in December, to fill vacancy caused by promotion of Mr. Brightman.

On December 7, 1964, Mr. Frederick W. Anthony, assistant superintendent, died suddenly while at work. He had been originally appointed as an employee in the department in April, 1919, and had worked continuously since that date. The members of the Water Board take this opportunity to express to Mr. Anthony's family their sympathy and to further extend their appreciation for his long years of faithful service in the department.

The average daily consumption for the year was 19,164,714 gallons, a slight increase over 1963.

The ordinary receipts amounted to \$900,021.69, an increase of approximately \$132,000.00 over 1963. The overall expenditures of the department, including bond payments and interest on bonds, amounted to \$818,683.10, showing an increase over expenditures of \$81,339.59.

The water debt as of December 31, 1964, is \$1,906,000.00.

Bonds in the amount of \$100,000, Water Loan No. 1 of 1964, were sold, the proceeds being made available for the purchase of main pipe, castings, fittings, and new equipment.

Water rates were increased, effective as of the annual billing May first, June first and July first. The rates were increased in

order to defray expenses to be incurred for the much-needed work of relining cast iron mains, installation of new gate valves, as required, and installation of a soda ash plant at Quittacas Station. All monies received in excess of overall expenditures of the department, including bond payments and interest on bonds, will be returned to the department in order to finance this program.

Later in the year, in order to expedite billing, it was voted to change the annual billings as of March first, May first and July first.

Plans were submitted by Owen F. Hackett, Associates, for new Water Works Shop and Pipe Yard to be located on Shawmut Avenue. Mr. Hackett was authorized, with the assistance of Mr. Robert Stewart, assistant City Planner, to present these preliminary plans, in the amount of \$468,797.00, to Community Facilities Administration, New York, for approval.

Camp, Dresser and McKee, engineers, were hired for engineering services in connection with installation of valves in the 48 inch transmission main and installation of chemical feed and control system at Quittacas Pumping Station. Bids were received for installation of these valves, but were rejected.

In 1961, the Cemetery Department turned over to this department, land on the west side of Liberty Street, south of Durfee Street, for location of new repair shop. Since that time, the Board has chosen location on Shawmut Avenue, north of Hathaway Road, for site of new shop and yard. Therefore, by Vote of the Board, the Mayor was notified that this land on Liberty Street was of no further use to this department, and he was requested to advise the City Council so they in turn could turn it over to the City Property Committee for disposition.

Camp, Dresser and McKee were authorized to advertise for bids for installation of Soda Ash Plant at Quittacas, the opening of the bids to be held in January, 1965.

Mayor Harrington retained Camp, Dresser and McKee for appraisal of replacement value of Coggeshall Street Reservoir which is to be taken by the State Department of Public Works in connection with Route 140.

The following abstract from the water registrar's report shows in condensed form the financial operations of this department during the year. Full details will be found in his report, which accompanies this.

FIRST, BASED ON THE BUDGET SYSTEM IN ACCORDANCE WITH CITY AUDITOR'S ACCOUNT

	Salaries and Wages	Labor	General Expense	Pensions	Total
1964 Budget.....	\$163,610.00	\$173,743.15	\$131,926.84	\$33,117.17	\$502,397.16

REPORT OF THE SUPERINTENDENT

March 27, 1965

To the New Bedford Water Board

Gentlemen:

The annual report of the superintendent on operations of the department for the year 1964 and on the general condition of the works is respectfully submitted.

The financial report of the water registrar, rainfall records, and the usual tables showing in detail the work of the department, are incorporated as part of this report.

RAINFALL

Total rainfall for the calendar year 1964 was recorded at Quittacas Pumping Station as 44.77 inches, 2.7% lower than the average for the past seventy years.

POND LEVELS

The water levels in the Lakeville Ponds reached the following elevations during 1964:

	High Level	Low Level
Pocksha Pond	52.21 April 22	49.66 November 25
Great Quittacas Pond	52.22 April 22	49.32 November 25
Little Quittacas Pond	48.59 January 29	47.04 September 9

WATER TREATMENT

All water pumped during the year at the Quittacas Pumping Station was sterilized through the addition of liquid chlorine at the pump wells.

All water coming into the City of New Bedford through the 2-36 inch outlets at High Hill Reservoir is again treated with chlorine as it passes through the High Hill chlorine plant.

In August of 1965, the New Bedford Water Department expects to treat its water with soda ash. Doctor Culver from the engineering firm of Camp, Dresser and McKee of Boston, informed the Water Board that this was their recommendation after a complete analysis of the water and its effects on the lead and copper services and also

its effects on the cast iron pipe within the system. The Water Board authorized the engineers of Camp, Dresser and McKee to go ahead with writing of specifications for a New Chemical Feeding Facility for Quittacas Pumping Station for the purpose of furnishing soda ash and installation of soda ash feeding equipment and appurtenances.

On February 13, 1964, the City of New Bedford entered into a contract with Fischer and Porter Company of Needham, Massachusetts, for a Chlorine Residual Recorder and Telemetering System. It was to be a residual chlorine analyzer with a two function synchro-scan system and recording time pulse receiver complete.

It makes continuous amperometric determinations of the free chlorine residual existing in each of the two 36 inch water mains after a ten minute contact period following chlorination. It transmits this information over an existing pair of No. 9 copper wires owned by the department to a recording instrument at the Quittacas Pumping Station which has high and low limit switches for actuating an alarm to signify malfunction of the chlorination equipment at the High Hill Chlorination Station.

Fischer and Porter did have a trial and error period due to the fact we insisted that the signals being sent over the No. 9 bare copper wires shall not interfere with the Audio signal or water level signal now being transmitted on this same pair of wires.

I am happy to say the system is now working perfectly.

STORAGE YARD AND BUILDING

In 1963, the New Bedford Board of Health transferred a plot of land on Shawmut Avenue to the Water Department to relocate the maintenance building and storage yard.

A Federal Planning Grant was received this year and the firm of Owen Hackett, Jr., Associates, was paid \$20,848.06 for Architectural services, borings and survey plans for the new shop and yard.

1964 — IN THE BLACK

The financial report of the New Bedford Water Department for the year 1964 is shown in detail in the various sections of the water registrar's report contained herein. It will be noted that the department operated with a balance reverting to General Funds of \$81,333.59, with collections remaining about the same as 1963 with approximately

less than 4 hundredths of one percent (.04%) considered as possibly uncollectible out of a total commitment of over \$900,000.00.

Not only should praise be given to the water registrar and his fine efficient staff, but also to Mrs. Helen Taylor and Mrs. Lourdes Bryan for their fine workmanship and wonderful devotion to duty in the expediting and processing of all work reports and charges which have been multiplying the past few years.

METER PITS

It was voted by the Water Board on November 24 to accept the recommendation of the superintendent that all future installations of meter pits by any person, firm or corporation, be constructed of cement or blocks and the ring and cover shall weigh no less than 80 pounds and no heavier than 100 pounds, and the ring opening will be from 24 in. to 30 in. in diameter.

TWO-WAY RADIOS

Two-way radios became a reality in the water department with the approval of the mayor and water board and a limited amount of funds. The superintendent was assisted by Mr. Standish Smith, an electronic expert, from East Fairhaven, whose untiring efforts and many friends proved the turning point in securing a license and installation.

The antenna was installed on top of the water tower at Hathaway Road and Rockdale Avenue. The construction permit and license require us to operate on frequency 155.145 — Local Government — 30 mobile units.

The department has spent approximately \$3,500 for five two-way radios — two remote control base units and desk microphones and a base station. The Fall River Water Department and our own Department of Public Works have spent better than \$8,000 each for a similar set-up. It is now possible for the superintendent from his office to contact any radio car on any part of the watershed. It has saved many man hours of useless running around and gets the help to any emergency promptly.

PROJECT PROPOSED WAR AGAINST POVERTY — NEIGHBORHOOD YOUTH CORPS

At a meeting held by the mayor, the superintendents of all departments were requested to forward to his office project proposals

in connection with this project. The superintendent submitted the following projects:

- a. Check, clean and paint 2,200 fire hydrants.
- b. Locate and remeasure gate and service boxes.
- c. Take hydrant pressures for new hydrant book.
- d. Trim tree limbs on fire lanes and the 8½ miles of private way for transmission mains.
- e. Clean out brooks and shores of ponds.
- f. Paint and repair two houses owned by the department.
- g. Check and replace packing in large gate valves and assist in relocating some large waste gates.

INTERSTATE HIGHWAY ROUTES 140 - 195 — CHAPTER 90

The office staff of the department has been kept very busy throughout the year working with State and Federal engineers on project plans in connection with the Interstate Highway. Part of the projects includes the following:

CHAPTER 90 PROJECT — BRALEY ROAD

A meeting was held in Taunton, by the Massachusetts Department of Public Works with all utilities and the contractor, Mr. Gracia of Gracia Brothers of Fairhaven, relating to the work proposed for Braley Road from Quanapoag Road to the City Line. The contractor was made aware of the crossing of the two 48 inch transmission mains.

CHAPTER 90 PROJECT — NASH ROAD AND TARKILN HILL ROAD

The mayor was informed by the Taunton office of the Massachusetts Department of Public Works that they would not reconstruct the roadway beyond the limits of the 16 inch water main in Tarkiln Hill Road. Therefore it will be necessary for the department personnel to remove the existing 10 inch water main and replace it with approximately 700 feet of 16 inch cast iron pipe; to replace lead services with copper tubing; relocate hydrants and install main pipe studs to each street line that enters Tarkiln Hill Road in the improvement area.

INTERSTATE HIGHWAY

Work was completed in the installation of a 10 inch mechanical joint pipe across the overpass on Rockdale Avenue just north of Potter Street. Two gates were installed, one at each end of the bridge and the pipe was insulated with a felt wrapping. Some services were disconnected and relocated in this area.

Bullock Street was connected by running a 6 inch cast iron pipe through a five foot easement on south edge of highway taking, to DeWolf Street.

Kenney Street water main was relocated just north of the Shawmut Avenue overpass for approximately 200 feet easterly from Shawmut Avenue main.

Portions of the water mains in Harvard, Potter, DeWolf, Myrtle, Reynolds, Summer, Bullock and Highland Streets were abandoned in place.

The 42 inch main in Rowe Street was shut off on December first, so that approximately 700 feet could be relocated and replaced with Lock Joint pipe.

Abbott Engineering, designing the second phase of Route 195 from County Street to the Coggeshall Street bridge and Cedar Grove Street to Logan Street, informed the department of the following:

Coggeshall Street Reservoir to be filled in.

Approximately 250 water services will be abandoned.

Relocation of 1000 feet 30 inch distribution main from Cornell Place to Logan Street.

Howard Street main to be abandoned — 295' 4" — 170' 6".

Kenyon Street main to be abandoned — 820' 6".

Cedar Grove Street main to be abandoned — 720' 6" — 260' 12" — 480' 24".

Blackburn Street main to be abandoned — 250' 4".

Acushnet Avenue main to be abandoned — 980' 8".

Weld Street main to be abandoned — 740' 8".

Marvin Street main to be abandoned — 385' 4".

Cornell Place main to be abandoned — 230' 6".

FLUSHING

The system was given a flushing and gates up to 12 inch in size were worked and each and every hydrant was operated during this period. All faulty gates and hydrants were promptly repaired.

COGGESHALL STREET RESERVOIR

A hearing was held on December 17, at 100 Nashua Street, Boston, by the Massachusetts Department of Public Works Appeal Board with reference to the value of the Coggeshall Street Reservoir. No agreement could be reached as to its true value. There was such a vast difference in opinion that the mayor was instructed to hire a Water Consultant to appraise the replacement value of the reservoir.

UNDERGROUND INSTALLATIONS

On November 5 the superintendent held an informal meeting to discuss underground ducts and gas mains. Those present were Mr. Henry Gatonska and Mr. Healy of New Bedford Gas and Edison Light Company, Mr. McFarlane and Mr. Butler of New England Telephone and Telegraph Company, Walter Mont, City Wire Inspector, and Edmund Toomey, acting commissioner of the City Department of Public Works.

It was discovered that no one was really familiar with the problems of the other departments. Mr. Mont stated that in the future, upon receipt of an application he would notify the Water Department. Mr. Toomey stated that he would instruct his office to issue street opening permits only after the Water Department had approved them.

WATER RATES

By a vote of the Water Board, a new set of water rates was established and it was voted that the increased revenue will be used for improvements and for new construction in the system.

DISTRIBUTION SYSTEM

The demands for extensions of new water mains and household services continued at a high rate throughout the year.

A serious break occurred in our 48 inch cast iron force main under Route 140. The pipe is resting on piling and it is believed that the weight load of the highway plus the heavy traffic using

this highway was the cause of this rupture. The pipe was cracked from end to end. Due to lack of maintenance in past years because of the shortage of help, we were unable to shut the large valves down completely and the check valves would not hold and only two of the air valves are working. The Water Department employees made the necessary repairs themselves but in doing so it was necessary to leave a 12 inch waste gate wide open. Due to the leaky check valves and the leaving of the 12 inch waste gate open, millions of gallons of water was lost. The water level at High Hill Reservoir dropped five feet the first day of the leak.

A meeting was arranged by Mayor Harrington at the State Department of Public Works, 100 Nashua Street, Boston, with the Commissioner, area representatives and the superintendent, and an agreement was reached whereby the State would construct a concrete culvert to protect the pipe, at the expense of the State. The type of construction was approved by the department, but to no avail. The culvert is 6 feet high and 10 feet wide. A culvert 6 feet high and 12 feet wide is necessary to get a pipe in and out.

Camp, Dresser and McKee were hired to make a survey of the two transmission mains and they asked for bids to install 8 butterfly valves, air vacuum valves and 2 new check valves. The bids were opened September 8 and Zoppo Construction Company was low bidder at \$117,000. No contract was awarded due to a discussion in which Mr. William Mahoney, assistant City auditor, joined in and brought out the fact that anticipated receipts for the year were not coming up to expectations. The Water Board voted to reject all bids at this time.

The poor pressure complaints seem to exist in the Wood Street area, Kempton and Cornell Streets, Harbor Street, Brock Avenue area and in the area of Hatch Street.

It was necessary to shut down the 36 inch water main in Ashley Boulevard north of Tarkiln Hill Road twice due to cracked mains at Dutton Street. It was also necessary to shut down the 20 inch main in Cedar Street due to a cracked pipe, and the 20 inch main at Ash and Kempton Streets was also shut down due to deterioration of a 4 inch wooden plug.

These were only a few of the many problems that confronted the maintenance department with its limited number of employees.

Fifty-two hydrants have been damaged as a result of traffic accidents. The total cost of repairs was \$6,421.50 of which \$3,902.94 has been collected.

LEAKS

There have been nineteen leaks on main pipe during the year, as herewith shown.

Date	Size	Location	Cause	Cost
Jan. 13 thru 15	6"	Armsby St., 220.0' E x E line Pine Grove St.	Cracked main	\$ 134.79
Feb. 2 and 3	6"	Lawrence St., 144.0' S x S line Holyoke St.	Broken main	290.51*
Feb. 6	8"	Padanaram Ave., 576.3' S x S line Cove Rd.	Cracked main	82.86*
Mar. 3 thru 7	8"	Submarine main—Acushnet River near New Bedford-Fairhaven Drawbridge	Main leak	2,539.71
Mar. 12	6"	Armsby St., 305.0' E x E line Pine Grove St.	Cracked main	78.74
Mar. 30	8"	Borden St., 32.0' W x W line Dartmouth St.	Joint leak	41.38*
Apr. 15 thru 20	48"	Force Main — south main — underneath Route 140, north x Braley Rd.	Cracked main	4,360.96
Apr. 29	16"	Industrial Park Drive, 730.0' S x S line Braley Road.	Joint leak	106.21
May 11	16"	Industrial Park Drive, 730.0' S x S line Braley Road.	Joint leak	128.38
June 1 and 2	4"	Kempton St., Intersection of Ash St.	Joint leak	203.03*
Aug. 12	6"	Seymour St., 32.7' E x E line Brock Ave.	Cracked main	45.73
Aug. 12	1"	Weaver St., 32.5' W x W line Field St.	Broken main	16.94
Aug. 14	8"	Lucy St., 261.2' E x Bartlett St.	Cracked main	95.46
Sept. 28	8"	Ridgewood Rd., 5.0' S x S line Greenbrier Drive.	Joint leak	44.63*
Oct. 26 and 27	42"	Force Main, 39.0' S x Plainville Rd.	Joint leak	205.74
Nov. 19 and 20	12"	So. Water St., Corner Cove St.	Joint leak	171.50*
Nov. 25	4"	Negus Way, 179.5' E x Hydrant 100.0' E x Middleboro Road.	Cracked main	85.85
Dec. 7 and 8	6"	Dutton St., at Ashley Blvd.	Cracked main	358.27*
Dec. 13	6"	Richmond St., on North line Austin St.	Cracked main	198.51*

*No actual payment made for cost of street repairs

8,653 feet of distribution pipe, in sizes from 4 inch to 12 inch, were added to the system during the year and 3,599 feet removed.

356 feet of distribution pipe less than 4 inches have been laid and 86 feet removed. The total length now in use is 11,899 feet.

Fifty-six stop gates have been set and twelve of those previously set have been removed. The total number now in use is 3,743.

The total number of small size gates now in use is 95.

The total number of waste gates now in use is 228.

The total number of air taps now in use is 228.

Thirty private gates have been set and three of those previously set have been removed.

Twenty-six new hydrants have been set and seventeen of those previously set have been removed. The total number now in use is 2,172.

The total number of water cart hydrants now in use is 21.

The total number of sprinkler cart hydrants now in use is 8.

Three hundred three service pipes have been laid and one hundred four of those previously laid have been removed. The total number now in place is 23,658. Of this number, three hundred sixty-eight are unmetered fire services, nineteen thousand eight hundred fifty-five are metered, and the balance, three thousand four hundred thirty-five are not in use.

Four hundred ninety-seven service leaks have been repaired.

Four hundred nineteen taps have been cleaned as follows:

Rust 371; trouble inside 48.

One thousand four hundred ninety-two meters have been removed for repairs, and one thousand one hundred eighty-five have been reset. Also two hundred eighty-four new meters have been set for the year, making the total number in use 19,855.

WATER REPORT

33 y

CONSUMPTION OF WATER

The consumption of water for the year has been as follows:

Month 1964	Monthly Consumption				Daily Average Consumption Gallons
	New Bedford	Dartmouth	Acushnet	Total	
	Gallons	Gallons	Gallons	Gallons	
January	555,979,600	540,000	8,917,500	565,437,100	18,239,906
February	517,444,050	459,000	3,462,750	521,365,800	17,978,131
March	551,770,750	469,500	5,466,750	557,707,000	17,999,548
April	552,828,300	600,750	6,450,750	559,879,800	18,662,660
May	590,414,550	1,277,750	5,508,000	597,200,300	19,264,526
June	604,842,600	8,698,500	7,266,000	620,807,100	20,609,370
July	586,661,300	5,862,400	8,562,000	601,085,700	19,389,861
August	646,030,000	5,364,800	8,059,500	659,454,300	21,272,719
September	601,768,100	5,805,650	14,367,750	621,941,500	20,731,383
October	579,081,100	565,950	5,264,250	584,911,300	18,868,106
November	554,111,200	501,850	5,256,750	559,869,800	18,662,327
December	557,603,650	620,250	6,402,000	564,625,900	18,213,739
Totals	6,898,535,200	30,766,400	84,984,000	7,014,285,600	
Averages					19,164,714

Maximum daily consumption — (24 hrs.) — September 9.....26,247,000

Minimum daily consumption — (24 hrs.) — April 19.....11,528,700

Average daily consumption — 6 a.m. to 6 p.m.11,156,938

Average night consumption — 6 p.m. to 6 a.m. 8,007,776

Amount of water consumed shown on above table includes the supplying of about 126.66 miles of distribution pipes located in the adjoining towns of Dartmouth and Acushnet. Dartmouth supplies 13,662 consumers through 4,554 taps. Acushnet supplies 5,500 consumers through 1376 taps.

WATER REPORT

COMPARISON OF THE CONSUMPTION OF THE YEAR 1964 WITH THE
RECORD OF THE 83 PREVIOUS YEARS

Year	Estimated Population	Estimated number of consumers	Number of taps	Total number of gallons consumed	Average daily consumption	Gallons per day to each inhabitant	Number of meters to each consumer	Gallons per day to each tap	Gallons per day
1882	28,500	20,424	4,203	859,119,622	2,326,352	82	114	553	41

*Includes population supplied in towns of Dartmouth and Acushnet 5,930 taps, 19,162 consumers.

†This consumption is for eleven months.

‡This consumption is for thirteen months.

WATER REPORT

CONSUMPTION

The average daily consumption, 19,164,714 gallons, shows a slight increase over 1963.

The following table shows the number of accounts, registration and income in the several steps of the sliding scale of rates:

DATA ON METERED CONSUMPTION AND REVENUE
July 1, 1963 through June 30, 1964

No. of Accounts	Number of gallons			Receipts for metered water		
	Total Gallons	Per Account	Per day per Acct.	Total Receipts	Per Account	Per M Gals.
*Using less than minimum rate viz; 30,000 gallons per year	77,710,500	20,668	57	36,962.38	9.83	.475
Using over minimum rate but less than 75,000 gallons per quarter	1,335,063,750	84,247	231	299,343.62	18.88	.224
Using between 75,000 and 750,000 gallons per quarter	336,154,500	737,181	2,020	59,687.11	130.89	.177
Using between 750,000 and 7,500,000 gallons per quarter	690,707,250	6,705,895	18,372	100,378.01	974.54	.145
Using between 7,500,000 and 15,000,000 gallons per quarter	164,580,750	41,145,187	112,726	18,886.54	4,721.63	.114
Using over 15,000,000 gallons per quarter	3,480,849,750	248,632,125	681,183	131,771.28	9,412.23	.037
Totals and averages	6,085,066,500	301,479	825	647,028.94	32.05	.106
Town of Dartmouth Venturi Meter	46,847,700		128,349	5,093.88		.109
Town of Acushnet — special rate	60,189,750		164,903	7,130.98		.118
**City of New Bedford Departments Metered Water Department Use	49,155,750					
	21,490,500					
Grand Totals	6,262,750,200			\$659,253.80		

*Includes special assessment accounts

**Not charged to City of N. B. Depts.

As superintendent, I wish to express my appreciation for the help received from the Mayor, the Water Board, the members of the City Government, and particularly to the employees of the Water Department for their continued and wholehearted support.

Respectfully submitted,

George H. Brightman,

Superintendent

TABLE P
STATEMENT OF WORK DONE BY THE SERVICE DEPARTMENT
FOR THE YEAR ENDING
DECEMBER 31, 1964

Kind and Size	Services	Length on City and Taker
Copper tubing, 4 inch	1	136½
Copper tubing, 3 inch	6	376
Copper tubing, 2 inch	8	338
Copper tubing, 1½ inch	4	129
Copper tubing, 1 inch	213	10,100
Copper tubing, ¾ inch	59	2,341½
Cast Iron, 8 inch	4	84
Cast Iron, 6 inch	4	92
Cast Iron, 4 inch	4	145
Galvanized, 4 inch	—	749
(connection to a service)		
Totals	303	14,491

One 1 inch heavy lead service has been removed and replaced with ¾ inch copper service.

One 1 inch light lead service has been removed and replaced with 1 inch copper service.

Seven ½ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Twenty-four ⅝ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Forty-three ⅝ inch light lead services have been removed and replaced with ¾ inch copper services.

One ⅝ inch tin-lined service has been removed and replaced with ¾ inch copper service.

Three ¾ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Twenty-one light lead services have been removed and replaced with ¾ inch copper services.

Two 6 inch cast iron services, one 1 inch heavy lead service, seven ½ inch heavy lead services, eight ⅝ inch heavy lead services, one 1¼ inch light lead service, twelve ⅝ inch light lead services, sixty-four ¾ inch light lead services, one 2 inch copper service, three 1 inch copper services, and five ¾ inch copper services have been removed.

Two connections have been made to services.

The following extensions were made to services by takers:

78 ft. 3 inch copper tubing, 70 ft. 1½ inch copper tubing, 196 ft. 1 inch copper tubing, and 10 ft. ¾ inch copper tubing.

Length of service pipe laid during the year	11,217½ ft.

SUMMARY OF STATISTICS
FOR THE YEAR ENDING DECEMBER 31, 1964
IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION

NEW BEDFORD WATER WORKS

NEW BEDFORD
BRISTOL COUNTY, MASS.

GENERAL STATISTICS

Population by census of 1963 — 100,076.

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1899 inclusive.

By whom owned, City of New Bedford.

Source of supply. — Water was first introduced on Nov. 26, 1869. From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take $11\frac{1}{2}$ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply. — Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, $5\frac{6}{10}$ miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distance, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch force mains $8\frac{1}{4}$ miles long to a distributing reservoir (capacity 67 million gallons, grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir, it flows into the city's distribution system by gravitation through two 36 inch cast iron pipes averaging $4\frac{1}{17}$ miles in length and one 42 inch pre-cast concrete pipe following a different course and approximately the same length. The concrete transmission line was put into operation in 1958.

It is also possible to pump directly to the city through a 48" and 36" main using the reservoir as a balance. This latter connection was completed in 1922.

The first named system is not now in use.

PUMPING STATISTICS

LITTLE QUITTACAS STATION

1. Builders of Pumping Machinery.

Electric Units

- No. 1 10 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, driven electrically by 400 H. P. 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.
- No. 2 Duplicate of No. 1.
- No. 3 15 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, electrically driven by 600 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

The three foregoing pumps are controlled by switches and automatic starting equipment in a switchboard manufactured by the Electric Machinery Company.

- No. 4 30 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, directly driven by 950 H. P. Baldwin locomotive type 6 cylinder supercharged Diesel engine, 600 R.P.M., manufactured by the Baldwin Locomotive Company.

Electric current purchased off New Bedford Gas and Edison Light Company.

Total installed capacity, 65 million gallons per day.

LITTLE QUITTACAS STATION — Pump 4 "Diesel"

2. Description of fuel used.

- a. No. 2 Diesel oil.
- b. Brand of oil — various.
- c. Price of oil per gallon — delivered to Little Quittacas Station 09.79 cents.

- 3. Oil consumed for the year — 19,150 gals.
- 4. Total pumpage for the year — 388,190,000 gallons by Venturi meter.
- 5. Average static head against which pumps work — 171.0.
- 6. Average dynamic head against which pumps work — 195.0.
- 7. Number of gallons pumped per gallon of fuel oil — 20,271 gals.
- 8. Number of gallons raised 100 feet per gallons of fuel oil — 39,528 gals.
- 9a. Cost per million gallons raised into High Hill Reservoir — \$12.42.
- 9b. Cost per million gallons raised into High Hill Reservoir — diesel fuel only — \$4.83.

LITTLE QUITTACAS STATION — Pumps 1, 2, 3.

CITY ORDINANCES

AND AMENDMENTS

PASSED BY THE CITY COUNCIL

of the

CITY OF NEW BEDFORD

From January 1, 1965 to December 31, 1965

REYNOLDS-DEWALT PRINTING, INC.

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-four

AN ORDINANCE

DESIGNATING THE CITY PLANNER AS CONSULTANT
TO THE BOARD OF SURVEY AND OTHER DEPART-
MENTS IN SUBDIVISION CONTROL MATTERS.

Be it ordained by the City Council of the City of New Bedford
as follows:—

SECTION 1. The Code of the City of New Bedford is hereby
amended by adding a new paragraph at the end of Sec. 3-1704 which
shall read as follows:

“He shall act as consultant to the Board of Survey in all
matters connected with or pertinent to the exercise of its powers
of subdivision control and he or one of his assistants shall attend
all meetings of said Board in an advisory capacity. He shall
also whenever requested advise the Board of Health and other
municipal departments on matters related to land subdivision
coming within their jurisdiction.”

SECTION 2. This ordinance shall take effect in accordance
with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

IN CITY COUNCIL, December 10, 1964

Referred to the Committee on Ordinances.

AN ORDINANCE

ESTABLISHING THE COMMITTEE FOR PRESERVATION
OF OBJECTS OF HISTORICAL VALUE.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. The list of standing committees as contained in Section 2-108 of the Code of the City of New Bedford is hereby amended by adding at the end thereof "The Committee for Preservation of Objects of Historical Value."

SECTION 2. A new section shall be inserted in said Code, which shall read as follows:—

**Sec. 2-119A Duties of The Committee for Preservation of
Objects of Historical Value**

Said committee shall compile and maintain an inventory of all objects of historical value owned by or in the custody of the city or any department thereof and shall keep the City Council fully informed. It shall be the custodian of all papers, documents, antiques, works of art and other memorabilia of historical value hereafter acquired by the City of New Bedford by gift, purchase, grant, devise or agreement pertaining to personal property and shall manage the same.

The committee may consult with any civic group, public agency or interested citizens to formulate programs and methods for the preservation and advantageous display thereof subject to City Council approval of its recommendations.

It shall keep accurate records of its meetings and actions and the Clerk of Committees shall serve as its clerk.

SECTION 3. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

AMENDING AN ORDINANCE WHICH ESTABLISHED A
COMMISSION ON RECREATION

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. The provisions of the City Code as contained in Section 3-2501 are hereby amended by deleting the fourth sentence of said section which reads, as follows: "At least two of the nine members shall be of the female sex; one of the nine members shall have had prior experience as a teacher or as a coach of athletics; one of the nine members shall be a member of the Board of Park Commissioners; and one of the nine members shall be a member of the New Bedford School Committee," so that Section 3-2501, as amended, shall read as follows:

Sec. 3-2501 Membership; term.

There is hereby created a Commission on Recreation to be comprised of nine members, to serve without pay, appointed by the Mayor and confirmed by the City Council. Of the nine members originally appointed hereunder, three shall serve for terms ending December 31, 1963; three for terms ending December 31, 1964; and three for terms ending December 31, 1965; and thereafter, as the terms of the original appointees expire, their successors shall be appointed for three year terms. Of the nine members one shall be a member of the Board of Park Commissioners; and one shall be a member of the New Bedford School Committee. All of the members of the Commission shall be residents of the City of New Bedford. The Commission shall elect one of its members to act as Chairman for the Commission for the period of one year commencing January first of each year.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

REGULATING THE PRESENCE OF MINORS UPON PREMISES LICENSED FOR THE SALE OF ALCOHOLIC BEVERAGES.

WHEREAS, the deferred operation of this ordinance would tend in part to defeat its purpose, it is hereby declared to be an emergency ordinance in accordance with the provisions of Section 20 of Chapter 43 of the General Laws (Ter. Ed.) and necessary for the preservation of the public's safety, necessity and convenience.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. The Code of the City of New Bedford is hereby amended by adding two (2) new sections, to be designated Section 14-158 and Section 14-159, which shall read, as follows:

Sec. 14-158. Minors — exclusion from liquor establishments during entertainment.

No Person under twenty-one (21) years of age shall be present or go upon premises licensed for the sale of alcoholic beverages, if the said premises are, or should be, licensed for entertainment, while entertainment is being offered thereon.

Sec. 14-159. Minors — Exceptions to exclusion from liquor establishments during entertainment.

The provisions of the above Section 14-158 shall not apply to a minor when accompanied by his or her parent or legal guardian, or by a spouse over twenty-one (21) years of age, while performing as a bona-fide professional or amateur entertainer, while calling for a "take-out" order and without loitering on the premises, or while at a wedding.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-five

AN ORDINANCE

AMENDING THE ELECTRICAL CODE AND ESTABLISHING RULES AND REGULATIONS PERTAINING TO CONVALESCENT AND NURSING HOMES AND REST HOMES FOR THE AGED.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 2 of Title 8 of the Code of the City of New Bedford is hereby amended by adding two new sections, to be known as Section 8-215 and Section 8-216, which shall read as follows:

Sec. 8-215 Convalescent and Nursing Homes, Rest Homes For The Aged; Scope.

The requirements of this Article shall apply to all buildings or part of a building designed, intended or used for the care of three or more persons admitted thereto for the purpose of rest, nursing or convalescent care and duly licensed under the General Laws, Chapter 111, Section 71 to 73 inclusive.

A. WIRING METHODS

The wiring method for new buildings and old buildings where renovations are being made shall be metal raceway, or type M.I. cable except as follows:

EXCEPTION ¶1. As provided in the “Massachusetts Electrical Code, Article 640 Sound Reproduction”, “Massachusetts Electrical Code, Article 800 Communication Circuits” and in “Massachusetts Electrical Code, Article 725, class 11 Remote Control and Signal Circuits.”

EXCEPTION ¶2. Where an existing building is currently being used as a convalescent or nursing home or a rest home for the aged and the existing method of wiring is other than required in Section A and where no renovations to the building are being made, any additional concealed wiring above the basement may be type AC metal clad cable as set forth in “Massachusetts Electrical Code, Article 336.” All additional wiring in the basement and exposed wiring above the basement shall be metal raceway or type M. I. cable.

B. SERVICES

The provisions of “Massachusetts Electrical Code, Article 230, Services” shall apply to all new buildings to be used for nursing or convalescent homes and rest homes for the aged except as follows:

EXCEPTION ¶1. Service entrance conductors shall be rubber covered or thermo-plastic covered and enclosed in rigid metal conduit from the point of supply to the service equipment.

EXCEPTION §2. Where the capacity of services to existing nursing homes or convalescent homes or rest homes for the aged are increased, the service entrance conductors shall be rubber covered or thermo-plastic covered and enclosed in rigid metal conduit from the point of supply to the service equipment.

EXCEPTION §3. Service conductors and service equipment shall have adequate current carrying capacity to safely conduct the current for the loads supplied and in all cases the minimum size shall not be less than 100 amperes.

C. BRANCH CIRCUITS

The provisions of "Massachusetts Electrical Code, Article 210 Branch Circuits" shall apply except as follows:

EXCEPTION §1. Receptacle Outlets Required — In every kitchen, dining room, living room, sun room, recreation room and bedroom, receptacle outlets shall be installed so that the maximum distance between any two successive receptacle outlets in any usable space shall not exceed twelve feet. The receptacle outlets shall insofar as practicable, be spaced equal distances apart.

EXCEPTION §2. Receptacle outlets shall be installed so that no more than six outlets shall be connected to a single branch circuit.

EXCEPTION §3. Receptacle outlets shall not be installed on lighting branch circuits.

EXCEPTION §4. Receptacle outlets in bedrooms shall be installed on only 15 ampere branch circuits and shall be of the grounding type. Where necessary, special receptacle outlets of greater capacity may be installed in bedrooms.

EXCEPTION §5. Lighting outlets shall be installed so that no more than six lighting outlets shall be connected to a single branch circuit.

D. GROUNDING

The provisions of "Massachusetts Electrical Code, Article 250 Grounding" shall apply except as follows:

All exposed non-current carrying metal parts of portable appliances, electrical apparatus, radios, televisions, heaters, ironers, air conditioners, floor and desk lamps and the like, shall be grounded by means of a separate grounding conductor which may be part of a flexible cord or cable assembly and properly connected and terminated so that a positive ground potential is accomplished.

E. HEAT DETECTORS

Oil and gas burning equipment which supplies warm air heat through a duct system by means of an electric blower or fan motor shall require heat detectors which shall cut off the power supply to the heating equipment and the blowers and fans at temperatures above 170°F. These heat detectors shall be installed within the duct system and not more than six feet (on the secondary side) from a blower or fan motor and shall also be connected to the fire alarm system.

Sec. 8-216 Requirements for Additional Receptacle Outlets in Existing Dwellings.

When adding new receptacle outlets in the kitchen, laundry, pantry, dining room and breakfast room of new and existing dwellings occupancies, Massachusetts Electrical Code, Article 220, Section 3, shall apply. In existing dwelling occupancies, these branch circuits shall be connected to feeders of not less than 30 ampere capacity.

When adding new receptacle outlets in rooms other than the kitchen, laundry, pantry, dining room and breakfast room of existing dwelling occupancies, they may be connected to an existing circuit provided that the total number of outlets including the additional outlet or outlets does not exceed fourteen in number and a type S fuse shall be used, otherwise a new circuit or circuits shall be installed and shall be connected to feeders of not less than 30 ampere capacity.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-five
AN ORDINANCE

FIXING AND ESTABLISHING ANNUAL VACATIONS FOR
MEMBERS OF THE FIRE AND POLICE DEPART-
MENTS OF THE CITY OF NEW BEDFORD.

Be it ordained by the City Council of the City of New Bedford
as follows:—

SECTION 1. Each year every member of the Police Department and of the Fire Department who has been in the service of said department for more than six months shall become entitled to a vacation without loss of pay. Such vacation shall be granted at such time or times as in the opinion of the Chief of the Department will cause the least interference with the performance of the regular work of such Department. Such vacations shall be computed in the following manner:

For more than (6) months and less than five (5) years' service, a vacation of two (2) weeks.

For five (5) years' service, but less than ten (10) years' service, a vacation of three (3) weeks.

For ten (10) years' service, or more, a vacation of four (4) weeks.

All vacations shall begin on Sunday at eight o'clock a.m.

The word "week" as used herein shall be defined as being a period of time consisting of such number of days as is equivalent to a calendar week reduced by the number of days off per seven day period to which a member of the Police or Fire Department has last been regularly entitled.

SECTION 2. Notwithstanding the provisions of Section 1 of this Ordinance, no member of the Police Department or of the Fire Department shall receive less vacation than he received during the year preceding the effective date of this Ordinance.

SECTION 3. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.) and any other applicable statute.

AN ORDINANCE

ESTABLISHING TEN LEGAL HOLIDAYS FOR CERTAIN
EMPLOYEES OF THE CITY OF NEW BEDFORD.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Title 5 of the Code of the City of New Bedford is hereby amended by adding the following new section:

Sec. 5-110. Establishing Legal Holidays for Certain Employees.

Every employee of the city, other than policemen, firemen, school teachers, incumbents of office specifically established by or under the authority of any General Law or special act, boards, commissions, or the likes, shall have the day off without loss of pay if any one of the following holidays falls on a working day: January first, February twenty-second, April nineteenth, May thirtieth, July fourth, the first Monday of September, October twelfth, November eleventh, Thanksgiving Day and Christmas Day.

SECTION 2. Any employee who is required to work on any of the above holidays shall be compensated with an extra day's pay.

SECTION 3. Every employee of the city covered by this ordinance required to work the sixth day, shall be paid at time and one half.

SECTION 4. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

AMENDING THE CITY CODE RELATIVE TO AMOUNT OF
VACATION LEAVE FOR MUNICIPAL EMPLOYEES.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 2 of Title 5 of the Code of the City of New Bedford is hereby amended by striking out the whole of Section 5-208 and inserting in place thereof a new Section 5-208 to read, as follows:

Sec. 5-208. Vacation Leave: Amount Of (Revised)

Employees of the city, except emergency employees, shall be credited as of June 1 with vacation leave with pay not to exceed the following:

(a) For less than one year's service completed on June 1, vacation leave of one day for each calendar month not to exceed 10 days. Vacation leave credit will begin at once for employees starting work on the first working day of a calendar month, otherwise, on the first day of the following calendar month.

(b) For each of the next succeeding four years completed from June 1, following date of employment, vacation of two weeks. If an employee enters the service on the first working day of a vacation year, that year shall constitute the first of the above four years.

(c) For each of the next succeeding five years completed from June 1, following the completion of the first four years, vacation of three weeks.

(d) Each year after the ninth such year is completed, vacation leave of four weeks.

(e) Vacation leave earned in any one year shall not be permitted to accumulate or carry over to a succeeding year, except that an employee who is ordered or requested to forego or postpone vacation leave in the public interest and thereby is prevented from taking vacation leave in any one year within the period from June 1 to May 31 in any year, may be granted compensatory vacation leave during the next year by his or her appointing officer or department head,

if said request is made before expiration of vacation period and has approval of the Mayor and notification of said request filed with the City Auditor immediately.

SECTION 2. This ordinance shall be effective as of June 1, 1965 for the purpose of thereafter acquiring credits which shall be computed and assigned to employees, in the first instance, as of June 1, 1966, and henceforth annually on June first.

Zoning Change No. 13

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-Five

AN ORDINANCE

Changing the zoning classification of property on the south side of CHAFFEE STREET, west of Acushnet Avenue, from Residence B to Business.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. That all of the property bounded and described, as follows:

Beginning at a point in the southerly line of Chaffee Street distant westerly therein one hundred three and 30/100 (103.30) feet from the westerly line of Acushnet Avenue;

thence southerly in a line parallel to and one hundred (100) feet distant from said westerly line of Acushnet Avenue a distance of eighty-two (82) feet more or less to a point;

thence westerly, a distance of sixty-two (62) feet more or less to a point;

thence northerly a distance of eighty and 79/100 (80.79) feet more or less to a point in the southerly line of Chaffee Street;

thence easterly in said southerly line of Chaffee Street, a distance of forty and 20/100 (40.20) feet more or less to the point of beginning.

all of which is now zoned as Residence B, be changed in its entirety to Business; all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

AMENDING THE ORDINANCE RELATIVE TO RAIN
LEADERS

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 3 of Title 8 of the Code of the City of New Bedford is hereby amended by striking out Paragraph (b) of Section 8-315 and inserting in place thereof a new Paragraph (b) which shall read as follows:

(b) Rain Leaders.

Connected to city storm sewer.

Unless otherwise authorized by the Commissioner of Public Works, no rain leaders or surface drains from buildings abutting a street or private way in which is located a public storm sewer shall be permitted to enter any drain or sewer designed for soil sewage. The storm drain from a point at the property line but not less than ten (10) feet outside the cellar wall (including the running trap) shall be of extra heavy cast iron pipe, size of the pipe and trap shall be not less than four (4) inches internal diameter. The trap shall be provided with a four (4) inch cleanout, a check valve shall also be provided for the displacement of surface water. Individual traps on the conductors shall be omitted. All rain leader risers inside of the building shall be provided with a cleanout, unless the branch to the riser does not exceed ten (10) feet from the trap. All rain leader pipes connected to drains outside of the building shall be of cast iron to a point at the property line, but not less than ten (10) feet from any building. All conductor pipes from buildings with roof area exceeding 400 square feet shall be connected to the storm drain, if any. All conductor pipes, except as later specified, attached to buildings abutting a public or private sewer or storm drain which are to be used for human occupancy and having a roof area exceeding 400 square feet, shall be connected to the storm sewer, if any. The above requirements shall not apply to conductor pipes from a roof of any abutment to a building when the roof area of said abutment does not exceed 100 square feet.

SECTION 2. Chapter 3 of Title 8 of the Code of the City of New Bedford is hereby amended by striking out Section 8-316 and inserting in place thereof a new Section 8-316 which shall read as follows:

Sec. 8-316 Surface drains entering combined sewers.

No opening into the house drain for the purpose of draining the cellar of surface water will be allowed, except by the permission of both the Building Department and the Commissioner of Public Works. The following regulations shall be made conditions of every such permit.

(a) A trap with a seal of not less than five (5) inches made with extra heavy fittings with a back water valve and cleanout placed on the house side shall be used. (This trap shall enter the main drain on the sewer side of the main house trap) and shall be not less than four (4) inches internal diameter.

(b) A rain leader of iron shall enter the trap with all joints connected with the leader inside the cellar leaded and caulked, as provided in the case of cast iron soil pipe.

SECTION 3. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

PROVIDING FOR THE FILING OF BONDS BY TAXI COMPANIES IN LIEU OF SECURING INSURANCE

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Section 12-112 of the Code of the City of New Bedford is hereby amended by striking said section in its entirety and inserting in place thereof the following:

Sec. 12-112 Insurance

No Class A Public vehicle license shall be issued by the city clerk until the applicant shall have presented, to be filed with the application, a certificate of an insurance company authorized to transact business in the commonwealth stating that the vehicle to which the license applies is properly insured under the laws of the commonwealth or a certificate of a surety company authorized to transact business in the commonwealth as surety, stating that a motor vehicle liability bond, payable to the commonwealth, which covers such motor vehicle, conforms to the provisions of Section 113A of Chapter 175 of the Massachusetts General Laws, and runs for a period at least co-terminous with such registration, has been executed by such applicant as principal and by such surety company as surety. Said certificate shall state the name and address of the owner of the vehicle, the name of the company in which the licensee is insured, the amount and character of insurance or bond, and a statement that the insurance policy or bond is applicable to passengers lawfully riding in the vehicle under the provisions of the ordinances of the city. Said insurance or bond shall be to the amount or limit of at least \$5,000 on account of injury to or death of any one person and of at least \$10,000 on account of any one accident resulting in the injury or death of more than one person and further certifying that said policy or bond shall not be cancelled without giving the city clerk five days' notice thereof. When notice of cancellation of an insurance policy or bond is received by the city clerk the licensee shall be notified, and unless he shall, before the expiration of the policy or bond to be cancelled, submit a new certificate of a valid insurance policy or bond, he shall return and

surrender his Class A public vehicle license. Failure on the part of the licensee to surrender promptly the license shall be reason and cause for suspension or revocation of the license by the city clerk, provided, however, that the license may be returned to the licensee by the city clerk on the presentation for filing of a new certificate of valid insurance or bond complying with this chapter.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

AMENDING THE ZONING ORDINANCE AND ESTABLISHING RESIDENCE "AA" DISTRICTS AND RESIDENCE "BB" DISTRICTS — GARDEN APARTMENT DISTRICTS

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 2 of Title 9 of the Code of the City of New Bedford is hereby amended by striking out in Section 9-201 the word "seven" in the first paragraph and inserting in place thereof the word "nine"; and, further amending the section by adding after item (7), the following:

(8) Residence "AA" districts

(9) Residence "BB" districts.

SECTION 2. Chapter 2 of Title 9 of the Code of the City of New Bedford is hereby amended by inserting after Section 9-270, the following:

RESIDENCE "AA" DISTRICTS

Sec. 9-271 Uses.

Within any Residence "AA" district, as indicated on the Building Zone Map, no premises shall be used for the storing or parking of house trailers and no building or premises shall be used and no building or structure shall be erected which is intended or designed to be used in whole or in part for industry, trade, manufacture, commerce, or for other than one or more of the following specified purposes.

1. A one-family detached house for one housekeeping unit only.
2. The renting of rooms or the furnishing of table board for not more than two lodgers or boarders in a dwelling occupied as a private residence, provided that such use is incidental only.
3. The office or studio of a physician or surgeon, dentist, artist, musician, lawyer, architect, teacher or other like professional person residing on the premises, providing that there is no

advertising exhibited except a small professional name plate, and provided that not more than two persons shall be employed who are not resident on the premises.

4. All other uses permitted in a Residence "A" district.

Sec. 9-272 Height.

The limit of height of a building or structure shall be two stories and an attic, but not over thirty-five (35) feet, except that the limit of height of churches, schools, libraries, and municipal or institutional buildings shall be three (3) stories, but not over sixty (60) feet.

Spires, cupolas, belfries, chimneys, and flag or radio poles are exempt from these provisions.

Sec. 9-273 Front Yards.

No story or part of any building except projecting eaves or uncovered steps shall be erected nearer to the street line of any street upon which it fronts than 15 feet; this front yard requirement shall apply to both sides of a corner lot.

Provided, that where a lot has a depth of less than one hundred (100) feet there shall be substituted for the word "fifteen" a figure which is fifteen (15) per cent of the depth of the lot in feet.

Sec. 9-274 Side yards.

There shall be a side yard along each side lot line, and it shall be at least eight (8) feet on one side and twelve (12) feet on the other, and extend unobstructed from front to rear yards.

Sec. 9-275 Rear yards.

There shall be a rear yard on every lot, and it shall be at least thirty (30) feet deep.

Where a lot is more than one hundred (100) feet deep, one half ($\frac{1}{2}$) of the additional depth of the lot in excess of one hundred (100) feet shall be added to said rear yard depth; but in no case shall a rear yard depth in excess of forty (40) feet be required.

Where a lot is less than one hundred (100) feet deep, one half ($\frac{1}{2}$) of the diminution in depth of the lot below one hundred (100) feet may be subtracted from said rear yard depth; but no part of said rear yard shall be less than twelve (12) feet in depth.

Sec. 9-276 Minimum lot width.

Every lot shall have a minimum street frontage of not less than 75 feet.

Sec. 9-277 Minimum lot area.

Every lot shall have a minimum area of seven thousand five hundred (7,500) square feet.

Sec. 9-278 Vision clearance on corner lots.

On a corner lot no fence, wall, or structure more than three and one half ($3\frac{1}{2}$) feet high above the plane of the established grades of the streets shall be erected on a front or side yard herein established which is included within the street lines of the intersecting streets and a straight line connecting said street lines at points which are twenty (20) feet distant from their point of intersection, measured along said street line, and no trees, hedges, or obstructions of any kind which will materially obstruct the view of a driver of a vehicle approaching the street intersection shall be placed or maintained within such area.

Sec. 9-279 Accessory buildings or structures.

1. Accessory buildings or structures for accessory uses permitted herein including private garages or stables, may occupy in the aggregate not over twenty (20) per cent of the required rear yard area.

2. Such buildings or structures shall not be erected over fifteen (15) feet in height.

3. No part of such buildings or structures shall be located within thirty (30) feet of any street line, and, if located within fifty (50) feet of the front line of the lot, no part of such buildings or structures shall be located within ten (10) feet of any side lot line intersecting such street.

4. In the case of corner lots less than fifty (50) feet in width, a garage not over twenty-four (24) feet in depth may be placed at the rear of the lot to comply with paragraph 3 as nearly as possible, provided that in no case shall the said garage be located less than twenty (20) feet from the street line bounding the longer side of the lot and not less than ten (10) feet from the lot line intersecting said street line.

5. The ten (10) feet restriction may be waived by mutual agreement between the adjoining property owners, secured by and filed with the Inspector of Buildings.

6. If an accessory building is to be used for the housing of animals or birds, it shall be located not less than ten (10) feet from

any side or rear lot lines, and not less than fifty (50) feet from any abutting street line.

The spaces required between an accessory building and the side and rear lines of a lot and the abutting street line, as described in the previous paragraph, shall not be used as a yard or run for the animals or birds. Any allowable yard or run shall be enclosed in an approved manner.

Sec. 9-280 Location of garage or stable.

No part of any garage or stable shall be erected within thirty (30) feet of any street line, and, if situated within fifty (50) feet of any street line, no part of any garage or stable shall extend within ten (10) feet of any side lot line intersecting such street.

Sec. 9-281 Cornices and belt courses.

A cornice shall not project more than one-third ($\frac{1}{3}$) of the width of a required open space.

A belt course or other ornamental feature shall not project more than nine (9) inches into a required open space.

RESIDENCE "BB" DISTRICTS GARDEN APARTMENT DISTRICTS

Sec. 9-282 Uses.

Within any Residence "BB" district, as indicated on the Building Zone Map, no building or premises shall be used and no building or structure shall be erected which is intended or designed to be used, in whole or in part, for industry, hotel, boarding or lodging house, or dormitory, trade, manufacturing, commerce, or for other than one or more of the following specified purposes:

1. A detached dwelling for one (1) or two (2) families or pair of semi-detached dwellings for two (2) families, provided it conforms to the height, front, side, and rear yard requirements of Residence "A" districts.
2. Any other use permitted in Residence "A" or "B" districts.
3. A building for three (3) or more families.

Sec. 9-283 Height.

The limit of height of a building or structure shall be three (3) stories, but not over thirty (30) feet, except that the limit of height of churches, schools, libraries, and municipal or institutional build-

ings shall be three (3) stories, but not over sixty (60) feet. The provisions with regard to height shall not apply to spires, cupolas, bell-fries, chimneys, flag or radio poles, penthouses enclosing stairs or elevators, or water tanks.

Sec. 9-284 Density.

A minimum of two thousand five hundred (2,500) square feet of lot area shall be provided for each family intended to be housed in each building or group of buildings on the same lot, except that this requirement may be reduced to one thousand five hundred (1,500) square feet in the case of any building or group of buildings intended to house elderly persons exclusively, provided: that no accommodation for any family contains more than one bedroom and that said building is erected either by an appropriate public agency or is financed under an official state or federal program to provide housing for the elderly.

Sec. 9-285 Front yards

No story or part of any building except projecting eaves or uncovered steps shall be erected nearer to the street line of any street on which it fronts than twenty-five (25) feet.

Sec. 9-286 Side yards.

There shall be a side yard along each side lot line and it shall have at least the following width:

Ten (10) feet if the length of the building along the yard is less than thirty (30) feet;

fifteen (15) feet if the length of the building along the yard is thirty (30) feet or more, but less than forty-five (45) feet;

twenty (20) feet if the length of the building along the yard is forty-five (45) feet or more.

Sec. 9-287 Rear yards.

Except as provided in this section, there shall be a rear yard on every lot, and it shall have a depth of at least forty (40) feet or one sixth the sum of the height and the length of the building along the rear yard, whichever is greater.

Where a lot is less than one hundred (100) feet deep, one half ($\frac{1}{2}$) of the diminution in depth of the lot below one hundred

(100) feet may be subtracted from said rear yard depth, but no part of said rear yard shall be less than twenty (20) feet in depth.

Where a lot is bounded on three (3) sides by public streets, or where an interior lot extends through from street to street, no rear yard shall be required.

Sec. 9-288 Spacing between buildings.

Distance requirements between any two buildings on the same lot designed to be used for residences shall be, as follows:

If the two buildings are end to end, the distance shall be at least twice the required side yard;

If the end of one building faces the front or rear of a second building, the distance shall be at least the sum of the side yard plus the front yard;

If the longest dimensions of the two buildings are parallel (or nearly so), the distance shall be at least the sum of the front yard plus the rear yard.

Sec. 9-289 Courts.

The minimum width of an outer court shall be twice the depth, where the depth is ten (10) feet or less, and three times the depth where the depth is over ten (10) feet.

The minimum width of an interior court shall be one hundred (100) feet or one-third ($\frac{1}{3}$) the length of the court, whichever is greater.

Sec. 9-290 Parking areas

All parking spaces (except in garages) shall be at least four (4) feet from any lot line or any building intended to be used for residence. All parking areas shall be screened by planting or walls where this is necessary to prevent headlight glare on adjoining residential properties.

The number of required off-street parking spaces may be reduced by the Board of Appeals in the case of buildings designed to be used for the elderly.

Sec. 9-291 Landscaping and Open Space.

Fifteen (15) per cent of the total lot area shall be landscaped with grass, shrubs, trees, or other planting, and an additional ten (10) per cent shall be kept open and developed in such a way that

it can be used for outdoor activities, including space and equipment for children by families living on the lot.

Sec. 9-292 Vision clearance on corner lots.

On a corner lot no fence, wall, or structure more than three and one half ($3\frac{1}{2}$) feet high above the plane of the established grades of the streets shall be built on a front or side yard, herein established, which is included within the street line of the intersecting streets and within a straight line connecting said street lines at points which are twenty (20) feet distant from their point of intersection measured along the view of a driver of a vehicle approaching the street intersection, shall be placed or maintained within each area.

Sec. 9-293 Accessory Buildings.

1. Accessory buildings or structures for accessory uses permitted herein, including private garages or stables may occupy in the aggregate not over twenty (20) per cent of the required rear yard area except than an open or lattice-enclosed fire escape or an open fireproof balcony to a fire tower may project into a rear yard.
2. Such buildings or structures shall not be erected over fifteen (15) feet in height.
3. If any accessory building is to be used for the housing of animals or birds, it shall be located not less than fifty (50) feet from any abutting street line.

The spaces required between an accessory building and the side and rear lines of a lot and the abutting street lines, as described in the previous paragraph, shall not be used as a yard or run for the animals or birds. Any allowable yard or run shall be enclosed in an approved manner.

One-story portions of buildings covering in the aggregate not more than ten (10) per cent of the area of the lot, unenclosed porches, bay windows, and steps shall not be included in determining the percentage of lot occupancy for the purposes of this paragraph.

4. No part of such buildings or structures shall be located within thirty (30) feet of any street line, and, if located within fifty (50) feet of the front line of the lot, no part of such buildings or structures shall be located within ten (10) feet of any side lot line intersecting such street.

5. In case of corner lots less than fifty (50) feet in width, a garage not over twenty-four (24) feet in depth may be placed at the rear of the lot to comply with paragraph 3 as nearly as possible, provided that in no case shall the said garage be located less than twenty (20) feet from the street line bounding the longer side of the lot and not less than (10) feet from the lot line intersecting said street line.
6. The ten (10) feet restriction may be waived by mutual agreement between the adjoining property owners secured by and filed with the Inspector of Buildings.

Sec. 9-294 Location of garages or stables.

No part of any garage or stable shall be erected within thirty (30) feet of any street line, and, if situated within fifty (50) feet of any street line, no part of any garage or stable shall extend within ten (10) feet of any side lot line intersecting such street.

Sec. 9-295 Cornices and belt courses.

A cornice shall not project more than one-third ($\frac{1}{3}$) of the width of a required open space.

A belt course or other ornamental feature shall not project more than nine (9) inches into a required open space.

SECTION 3. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

ZONING CHANGE No. 16**CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Sixty-five

AN ORDINANCE

Changing the zoning classification of property in the area bounded by PARKER STREET, LIBERTY STREET, DURFEE STREET and HATHAWAY BOULEVARD, from Residence B to Residence C.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. That all of the property bounded and described as follows: —

Beginning at a point in the easterly line of Hathaway Boulevard distant northerly therein eighty (80) feet from the northerly line of Parker Street;

thence continuing northerly in said easterly line of Hathaway Boulevard, a distance of one thousand eight hundred nine and $17/100$ (1,809.17) feet to a point;

thence easterly by land now or formerly belonging to G. Frank Grenier and of land belonging to Frank Moniz, Jr. and Edward R. Machado, a distance of one hundred ninety-nine and $73/100$ (199.73) feet to a point;

thence southerly by other land now or formerly belonging to Frank Moniz, Jr. and Edward R. Machado, a distance of two hundred fifty (250) feet to an angle;

thence southeasterly by land belonging to the City of New Bedford, and land now or formerly belonging to G. Frank Grenier, a distance of one thousand seventy-two and $68/100$ (1,072.68) feet to an angle;

thence easterly by land of said G. Frank Grenier, a distance of two hundred sixty (260) feet to an angle;

thence southeasterly by land of said G. Frank Grenier, a distance of six hundred forty-four and $89/100$ (644.89) feet to a point in the northerly line of Parker Street;

thence westerly in said northerly line of Parker Street; a distance of eight hundred three and $42/100$ (803.42) feet to a point;

thence northerly by land now or formerly belonging to Theresa G. Souza, a distance of eighty (80) feet to a point;

thence westerly by land of said Theresa G. Souza, a distance of one hundred fifty (150) feet to a point in the easterly line of Hathaway Boulevard, being the point of beginning;

all of which is now zoned as Residence B, be changed in its entirety to Residence C; all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-five

AN ORDINANCE

ESTABLISHING THE DATE FOR THE SECOND REGULAR MEETING OF THE CITY COUNCIL IN THE MONTH OF DECEMBER, 1965.

WHEREAS, the deferred operation of this ordinance would in part defeat its purpose, it is hereby declared to be an emergency ordinance in accordance with the provisions of Section 20 of Chapter 43 of the General Laws (Ter. Ed.) and necessary for the preservation of the public's safety, necessity and convenience.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Notwithstanding the provisions of Sec. 2-106 of The City Code, the second regular meeting of the City Council for the month of December, 1965, shall be held on the 22nd day of December, 1965.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

Zoning Change No. 17

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-five

AN ORDINANCE

Changing the zoning classification of property on the northeast corner of ROCKDALE AVENUE and STEPHEN STREET from Residence C to Business.

Be it ordained by the City Council of the City of New Bedford as follows:

SECTION 1. That all of the property bounded and described as follows: Beginning at the point of intersection with the northerly line of Rockdale Avenue and the easterly line of Stephen Street;

thence northerly in said easterly line of Stephen Street, a distance of sixty and 01/100 (60.01) feet to a point;

thence easterly by land now or formerly belonging to Alphonse M. and Mary M. Barboza, a distance of ninety (90) feet to a point;

thence southerly by land now or formerly belonging to New Bedford Housing Authority, a distance of one hundred twenty-three and 06/100 (123.06) feet to a point in the northerly line of Rockdale Avenue;

thence westerly in said northerly line of Rockdale Avenue, a distance of one hundred nine and 86/100 (109.86) feet to the point of beginning.

all of which is now zoned as Residence C, be changed in its entirety to Business; all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).
